HunterDouglas Architectural

Project : Pakhuismeesteren, Rotterdam, The Netherlands
Product : Stretch Metal Planks

DESIGNED TO WORK FOR YOU EN

Hunter Douglas is fluent in design. Working with architects and contractors, we translate aesthetic specifications into construction requirements, creating solutions that express the vision of each project. For over 60 years, this collaborative approach has contributed to thousands of buildings around the world.

We define success by our ability to meet unique challenges, define new products and applications, and find ways to do more with less. From pre-engineered standards to innovative custom systems, the Hunter Douglas Architectural team helps you create versatile, sustainable and durable ceiling and wall solutions.

CONÇUS POUR VOUS FR

Hunter Douglas est un maître du design. En collaboration avec des architectes et des entrepreneurs, nous transformons les caractéristiques esthétiques en exigences de construction, en créant des solutions reflétant la vision de chaque projet. Pendant plus de 60 ans, cette approche collaborative a contribué à des milliers de bâtiments dans le monde entier.

Nous définissons la réussite comme notre capacité à relever des défis uniques, à définir de nouveaux produits et applications et à trouver de nouvelles manières d'en faire plus avec moins. Des systèmes standard préconçus aux systèmes personnalisés innovants, l'équipe de Hunter Douglas Architectural vous aide à créer des solutions de plafonds et de murs polyvalentes et durables.

ENTWORFEN, UM FÜR SIE ZU ARBEITEN DE

Hunter Douglas spricht die Sprache des Designs. Wir arbeiten eng mit Architekten und Dienstleistern zusammen, um ästhetische Vorgaben in bauliche Anforderungen umzusetzen und entwerfen so Lösungen, welche die Vision jedes Projekts ausdrücken. Seit mehr als 60 Jahren können wir diese kooperative Vorgehensweise auf Tausende von Gebäuden auf der Welt anwenden.

Wir definieren Erfolg anhand unserer Fähigkeit, einzigartige Herausforderungen zu meistern, neue Produkte und Anwendungen zu entwickeln und Wege zu finden, um mit weniger mehr zu erreichen. Von vorgefertigten Standards bis hin zu innovativen kundenspezifischen Systemen hilft Ihnen das Team von Hunter Douglas Architectural, vielseitige, nachhaltige und langlebige Decken- und Wandlösungen zu schaffen.

DESIGNED TO WORK FOR YOU NL

Hunter Douglas is een meester in vormgeving. In samenwerking met architecten en aannemers vertalen wij esthetische specificaties naar constructievereisten, waarmee we oplossingen creëren die de visie van de architect tot uitdrukking brengen. Deze op samenwerking gebaseerde aanpak heeft de afgelopen 60 jaar geleid tot de uitvoering van duizenden projecten in gebouwen over de hele wereld.

Succes betekent voor ons dat we in staat zijn unieke uitdagingen aan te gaan, nieuwe producten en toepassingen te ontwerpen en manieren te vinden om meer te doen met minder. Van voorontworpen standaardoplossingen tot innovatieve systemen op maat - het Hunter Douglas Architectural-team vindt voor elke opdrachtgever veelzijdige, esthetische en duurzame plafond- en wandoplossingen.

DISEÑADO PARA TRABAJAR PARA TI ES

Hunter Douglas tiene un diseño fluido. Trabajando con arquitectos y contratistas, traducimos las especificaciones estéticas en requisitos de construcción, creando soluciones que expresan la visión de cada proyecto. Durante más de 60 años, este enfoque de colaboración ha contribuido a miles de edificios en todo el mundo.

Definimos el éxito por nuestra capacidad para enfrentar desafíos únicos, definir nuevos productos y aplicaciones, y encontrar formas de hacer más con menos. Desde estándares prediseñados hasta sistemas personalizados innovadores, el equipo de arquitectura de Douglas Douglas lo ayuda a crear soluciones versátiles, sostenibles y duraderas para techos y paredes.

ZAPROJEKTOWANY DO PRACY DLA CIEBIE PL

Hunter Douglas jest firmą doświadczoną w projektowaniu. Przy współpracy z architektami i wykonawcami przekształcamy projekty architektoniczne w specyfikacje techniczne, tworząc rozwiązania, które realizują koncepcje estetyczne każdego projektu. Przez ponad 60 lat takie podejście przyczyniło się do powstania tysięcy budynków na całym świecie.

Sukces definiujemy poprzez naszą zdolność do stawiania czoła wyjątkowym wyzwaniom, kreowania nowych produktów i ich aplikacji oraz znajdowania sposobów na otrzymanie większego efektu mniejszym kosztem. Od standardowych produktów po innowacyjne systemy projektowane indywidualnie, zespół Hunter Douglas Architectural pomaga tworzyć uniwersalne, zrównoważone i trwałe rozwiązania sufitowe i ścienne.

DESIGNED TO WORK FOR YOU IT

Hunter Douglas conosce bene il mondo del design. Grazie alla preziosa collaborazione con architetti e imprese, traduciamo le specifiche estetiche in requisiti costruttivi, creando soluzioni che esprimono la visione di ogni progetto. Da oltre 60 anni, questo approccio collaborativo viene applicato in migliaia di edifici in tutto il mondo.

Definiamo il successo sulla base della nostra capacità di affrontare sfide uniche, creare nuovi prodotti e applicazioni e trovare modi per fare di più con meno. Dai sistemi standard, alle applicazioni innovative personalizzate, il team Hunter Douglas Architectural, vi aiuta a creare soluzioni di controsoffitti e rivestimenti versatili, sostenibili e durevoli.

BUSINESS IS PEOPLE EN

At Hunter Douglas, we pride ourselves in our employees - a network of experienced, intelligent, passionate and creative men and women from over 100 countries who work together in a spirit of collaboration. Along with proven manufacturing processes and material usage, that is what keeps Hunter Douglas at the forefront of innovation and design.

NOS EMPLOYÉS, L'ATOUT MAJEUR DANS NOTRE RÉUSSITE FR

Chez Hunter Douglas, nous sommes fiers de nos employés, un réseau d'hommes et de femmes expérimentés, intelligents, passionnés et créatifs dans plus de 100 pays qui travaillent ensemble, dans un esprit de collaboration. Outre des processus de fabrication et une utilisation des matériaux éprouvés, c'est ce qui permet à Hunter Douglas de rester à la pointe de l'innovation et de la conception.

UNTERNEHMEN BESTEHT AUS MENSCHEN DE

Bei Hunter Douglas sind wir stolz auf unsere Mitarbeiter - ein Netzwerk aus erfahrenen, intelligenten, passionierten und kreativen Männern und Frauen aus über 100 Ländern, die mit Kooperationsgeist zusammenarbeiten. Neben bewährten Herstellungsprozessen und Materialeinsatz sind sie es, die Hunter Douglas seinen Platz an der Spitze von Innovation und Design garantieren.

BUSINESS IS PEOPLE NL

Bij Hunter Douglas zijn wij trots op onze medewerkers, een netwerk van ervaren, intelligente, gepassioneerde en creatieve mensen uit meer dan 100 landen die intensief met elkaar samenwerken. Die medewerkers - samen met productieprocessen en materialen die hun succes hebben bewezen - zorgen ervoor dat Hunter Douglas toonaangevend is in innovatie en vormgeving.

LOS NEGOCIOS SON PERSONAS ES

En Hunter Douglas, nos enorgullecemos de nuestros empleados: una red de hombres y mujeres experimentados, inteligentes, apasionados y creativos de más de 100 países que trabajan juntos en un espíritu de colaboración. Junto con procesos de fabricación comprobados y uso de materiales, eso es lo que mantiene a Hunter Douglas a la vanguardia de la innovación y el diseño.

BIZNES TO LUDZIE PL

W Hunter Douglas jesteśmy dumni z naszych pracowników - sieci doświadczonych, inteligentnych, pełnych pasji, kreatywnych mężczyzn i kobiet z ponad 100 krajów, którzy twórczo współpracują ze sobą. Wraz ze sprawdzonymi procesami produkcyjnymi i ze zrównoważonym użyciem materiałów to właśnie sprawia, że Hunter Douglas jest liderem innowacji i wzornictwa.

LE AZIENDE SONO FATTE DALLE PERSONE IT

Noi di Hunter Douglas siamo orgogliosi dei nostri dipendenti, una rete di uomini e donne competenti, brillanti, appassionati e creativi provenienti da oltre 100 Paesi, che lavorano insieme con spirito di collaborazione, in realtà produttive collaudate e uso appropriato di materiali: è questo che permette ad Hunter Douglas di essere sempre all'avanguardia nell'innovazione e nel design.

EN

SUSTAINABILITY AND CORPORATE SOCIAL RESPONSIBILITY

SOUND MATERIALS

EN

Environmentally sound materials are key to sustainable buildings. Our strategy is to pick materials that have good environmental properties to start with. We've optimized our processes to use up to 99% of recycled content to produce the right alloy for our products. Our wood is FSC certified and we embrace the Cradle to Cradle principle in our product development.

CORPORATE SOCIAL RESPONSIBILITY

Keen on Green is an important company-wide initiative to reduce energy consumption, water usage and our overall carbon-footprint. We embrace the ISO 14001 framework to actively manage our Keen on Green objectives. Hunter Douglas and its employees actively support the communities in which we live and work, as well as those on a more global scale. Business is people. We pride ourselves on our worldwide network of experienced, intelligent, passionate and creative people that have consciously chosen Hunter Douglas as their employer.

MATÉRIAUX RESPECTUEUX DE L'ENVIRONNEMENT

FR

Des matériaux écologiquement rationnels sont essentiels pour des bâtiments durables. Notre stratégie consiste à choisir des matériaux présentant de bonnes propriétés environnementales. Nous avons optimisé nos processus pour utiliser jusqu'à 99% de contenu recyclé afin de produire le bon alliage pour nos produits. Notre bois est certifié FSC et nous appliquons le principe Cradle to Cradle dans le développement de nos produits.

RESPONSABILITÉ SOCIALE D'ENTREPRISE

Keen on Green est une initiative importante à l'échelle de l'entreprise visant à réduire la consommation d'énergie, l'utilisation d'eau et notre empreinte carbone globale. Nous adoptons le cadre ISO 14001 pour gérer activement nos objectifs Keen on Green. Hunter Douglas et ses employés soutiennent activement les communautés dans lesquelles nous vivons et travaillons, ainsi que celles à plus grande échelle. Nous sommes fiers de notre réseau mondial de personnes expérimentées, intelligentes, passionnées et créatives qui ont consciemment choisi Hunter Douglas comme employeur.

UMWELT-BEWUSSTE MATERIALIEN

DE

Umweltverträgliche Materialien sind der Schlüssel zu nachhaltigen Gebäuden. Unsere Strategie ist es, Materialien auszuwählen, die von Anfang an gute Umwelteigenschaften aufweisen. Wir haben unsere Prozesse so optimiert, dass bis zu 99% des recycelten Inhalts zur Herstellung der richtigen Legierung für unsere Produkte verwendet werden. Unser Holz ist FSC-zertifiziert und wir verfolgen bei unserer Produktentwicklung das Cradle-to-Cradle-Prinzip.

UNTERNEHMENS-GESELLSCHAFTLICHE VERANTWORTUNG

Keen on Green ist eine wichtige unternehmensweite Initiative zur Reduzierung des Energie- und Wasserverbrauchs und unseres gesamten CO_2-Fußabdrucks. Wir bekennen uns zum ISO 14001-Rahmen, um unsere umweltorientierten Ziele aktiv umzusetzen. Hunter Douglas und seine Mitarbeiter unterstützen aktiv die Gemeinden, in denen wir leben und arbeiten, sowie das globale Umfeld. Wir sind stolz auf unser weltweites Netzwerk erfahrener, intelligenter, leidenschaftlicher und kreativer Mitarbeiter, die sich bewusst für Hunter Douglas als Arbeitgeber entschieden haben.

MILIEUBEWUSTE MATERIALEN

NL

Milieuvriendelijke materialen zijn de sleutel tot duurzame gebouwen. Onze strategie is om materialen te kiezen die om te beginnen goede milieueigenschappen hebben. We hebben onze processen geoptimaliseerd om tot 99% gerecycled materiaal te gebruiken om de juiste legering voor onze producten te produceren. Ons hout is FSC-gecertificeerd en we omarmen het Cradle to Cradle-principe in onze productontwikkeling.

MAATSCHAPPELIJK VERANTWOORD ONDERNEMEN

Keen on Green is een belangrijk bedrijfsbreed initiatief om het energieverbruik, het waterverbruik en onze algemene CO_2 footprint te verminderen. We omarmen het ISO 14001-raamwerk om onze Keen on Green-doelstellingen actief te beheren. Hunter Douglas en zijn werknemers ondersteunen actief de gemeenschappen waarin we wonen en werken, evenals die op een meer wereldwijde schaal. We zijn trots op ons wereldwijde netwerk van ervaren, intelligente, gepassioneerde en creatieve mensen die bewust Hunter Douglas als hun werkgever hebben gekozen.

MATERIALES AMBIENTALMENTE CONSCIENTES

ES

Los materiales ecológicamente racionales son clave para los edificios sostenibles. Nuestra estrategia es elegir materiales que tengan buenas propiedades ambientales para comenzar. Hemos optimizado nuestros procesos para utilizar hasta el 99% del contenido reciclado para producir la aleación adecuada para nuestros productos. Nuestra madera tiene certificación FSC y adoptamos el principio Cradle to Cradle en el desarrollo de nuestros productos.

RESPONSABILIDAD SOCIAL CORPORATIVA

Keen on Green es una importante iniciativa de toda la empresa para reducir el consumo de energía, el uso del agua y nuestra huella de carbono en general. Adoptamos el marco ISO 14001 para gestionar activamente nuestros objetivos Keen on Green. Hunter Douglas y sus empleados apoyan activamente a las comunidades en las que vivimos y trabajamos, así como a aquellas en una escala más global. Los negocios son personas. Nos enorgullecemos de nuestra red mundial de personas experimentadas, inteligentes, apasionadas y creativas que han elegido conscientemente a Hunter Douglas como su empleador.

EKOLOGICZNE MATERIAŁY PL

Materiały przyjazne dla środowiska są kluczem do zrównoważonych budynków. Naszą strategią jest wybór materiałów o dobrych właściwościach środowiskowych. Zoptymalizowaliśmy nasze procesy, wykorzystując do 99% materiałów pochodzących z recyklingu, aby wyprodukować odpowiedni stop dla naszych produktów. Nasze drewno posiada certyfikat FSC i w rozwoju naszych produktów stosujemy zasadę Cradle to Cradle.

SPOŁECZNA ODPOWIEDZIALNOŚĆ BIZNESU

Keen on Green, to ważna dla całej firmy inicjatywa, mająca na celu zmniejszenie zużycia energii, zużycia wody i naszego ogólnego śladu węglowego. Wdrożyliśmy standard ISO 14001, aby właściwie zarządzać naszymi celami w zakresie ekologii. Hunter Douglas i jego pracownicy aktywnie wspierają społeczności, w których żyją i pracują, a także społeczność w skali globalnej. Biznes to ludzie. Jesteśmy dumni z naszej światowej sieci doświadczonych, inteligentnych, pełnych pasji i kreatywnych ludzi, którzy świadomie wybrali Hunter Douglas na swojego pracodawcę.

MATERIALI ECOCOMPATIBILI IT

Partendo dalla scelta di materiali ecologici e sostenibili, abbiamo ottimizzato i nostri processi di produzione, al fine di utilizzate fino al 99% di contenuto riciclato nella produzione della lega per i nostri sistemi metallici. I sistemi in legno sono certificati FSC. Hunter Douglas adotta la filosofia del prodotto Crandle to Crandle.

RESPONSABILITÀ SOCIALE AZIENDALE

Keen on Green è un'importante iniziativa volta alla riduzione del consumo di energia, dell'utilizzo dell'acqua e delle emissioni di CO_2. Applichiamo il sistema ISO 14001 per il raggiungimento degli obiettivi Keen on Green. Hunter Douglas e tutto il suo team supportano attivamente le comunità in cui vivono e lavorano. Siamo orgogliosi di tutti i nostri collaboratori, un team di persone esperte, intelligenti, appassionate e creative, presenti in tutto il mondo.

Project : HSBC Headquarters, Birmingham, United Kingdom
Product : Veneered Wood Grills
Architect : tp bennett

GREENEST IN THE CITY

The stringent environmental considerations that HSBC has insisted upon and Hunter Douglas Architectural's commitment to sustainability has led to HSBC's new ring-fenced banking headquarters in Birmingham become one of the greenest in the city.

The new HSBC UK building on Broad Street is the first in Birmingham to be constructed to the Leadership in Energy and Environmental Design (LEED) Gold accreditation standard - the globally recognised symbol of sustainability achievement.

To attain the Gold LEED, the internal design was built using sustainable timber approved by the Forest Stewardship Council, which was sourced by Hunter Douglas Architectural. All the wood sourced by Hunter Douglas Architectural is FSC certified and the company is also committed to the Cradle to Cradle principle in its product development.

Hunter Douglas Architectural is committed to sustainability and responsible development through its continuous efforts to improve production processes, eliminate waste and reduce maintenance. As well as using FSC timber, it has increased the amount of recycled aluminium it uses in its ceilings, with its own produced aluminium containing 90% recycled material. All of its own production scrap is collected and re-worked into new valuable input for its melting processes.

OUR FOUNDING

Hunter Douglas was built on recycled aluminium. In 1940, company founder Henry Sonnenberg moved to America from Holland and founded the Douglas Machinery Corporation. A few years later, he began a critical collaboration with inventor Joe Hunter, who had invented a casting machine that could convert scrap aluminium into ultra-hard alloys.

CEILING DEVELOPMENT

Based on this unique casting machine and developments of roll-forming and stamping equipment, Henry and Joe pioneered the development of the aluminium venetian blind, and jointly created Hunter Douglas as we know it today. In 1962, Hunter Douglas introduced linear metal ceilings, creating a standard system that today has evolved into a complete range of products for projects of all types.

WORLDWIDE PRESENCE

Today, a significant part of Hunter Douglas' business remains dedicated to recycled aluminium, with a recycling facility, smelter, and continuous caster in Rotterdam, Holland. From that base, the company operates fabrication and distribution facilities in over 100 countries, with installations in thousands of projects around the world.

SUSTAINABILITY

Hunter Douglas stands at the forefront of developing sustainable product concepts. We seek to simplify assembly, improve production processes, eliminate waste and reduce maintenance within our own operations, while also partnering with organizations such as C2C Products Innovation Institute, to make an impact on all phases of the building industry.

TAIM

As member of TAIM we are obliged to audit our production to the requirements of the TAIM certification scheme. Proof of a positive conclusion is the annually issued TAIM Certificate.

OEKOTEX

Products with this icon are tested on harmful substances and safe skin contact.

CERTIFIED CRADLE TO CRADLE

The Cradle to Cradle Certified™ Product Standard guides designers and manufacturers through a continual improvement process that looks at a product through five quality categories - material health, material reutilization, renewable energy and carbon management, water stewardship, and social fairness.

ISO 9001

Our production plant is ISO 9001 certified to ensure that products and services consistently meet customer's requirements, and that quality is consistently improved.

FORMALDEHYDE (E1)

Formaldehyde emission level (E1 = lowest test result possible).

VOC

The VOC emission performance in accordance with the French labelling requirements.

RECYCLED CONTENT

The recycled content of the product as verified by a third party or based on average market data.

EPD

For metal ceiling products with this icon an EPD (Environmental Product Declaration) based on EN 15804 is available.

EPD

For HeartFelt® products with this icon an EPD (Environmental Product Declaration) based on EN 15804 is available.

ISO 14001

Our production plant is ISO 14001 certified providing assurance to company management and employees as well as external stakeholders that environmental impact is consistently being measured and improved.

EXPLANATION TECHNICAL PERFORMANCE ICONS

REACTION TO FIRE
Reaction to fire classification in accordance with EN 13501-1 expressed as Euroclass (A1 - F).

FIRE STABILITY
Fire stable ceilings available.
(Belgium only)

PERFORATIONS / PATTERNS
Custom perforations/patterns available.

SOUND ABSORPTION
A single-number rating for random incidence sound absorption coefficients as calculated by reference to EN ISO 11654 (α_W) or, as calculated by reference to ASTM C423 (NRC).

SOUND ABSORPTION CLASS
A classification for sound absorption (A - E) based upon the sound absorption α_W value.

ACOUSTIC INFILLS
Custom acoustic infills available.

DIMENSIONS
Custom sizes available.

SHAPES
Custom shapes available.

WEIGHT
Weight per unit area of the product (kg/m²).

COLOURS
Custom colours available.

LIGHT REFLECTANCE
Light reflection is the proportion of incident light that is reflected back off the product, when tested in accordance with EN 410.

SCRATCH RESISTANCE
Superior level of surface scratch resistance.

VENEERS
Additional custom wood veneer effects possible.

IMPACT SOLUTIONS
Impact resistant ceiling available.

SERVICE INTEGRATION
Custom factory cut-outs for service integration available.

SWING-DOWN FUNCTION
Swing-down functionality available.

EXTERIOR SOLUTIONS
Exterior ceiling available.

HUMIDITY RESISTANCE
Maximum relative humidity conditions for installation and lifetime of ceiling.

TEMPERATURE/RH
Classification of climate class according EN 13964 in which the ceiling can be used.

CEILING APPLICATION
A ceiling application is available.

WALL APPLICATION
A wall application is available.

CLEANING AND DISINFECTION
The frequency and cleaning method of a ceiling varies from one application to another. All products can at least be cleaned with a dry cloth or vacuum cleaner.

Wipeable with a dry cloth / soft brush.

Wipeable with a moist cloth.

HunterDouglas Architectural

NOTRE FONDATEUR

Hunter Douglas s'est bâtie sur l'aluminium recyclé. En 1940, le fondateur de l'entreprise, Henry Sonnenberg, a quitté les Pays-Bas pour l'Amérique et a fondé la Douglas Machinery Corporation. Quelques années plus tard, il a démarré une collaboration essentielle avec l'inventeur Joe Hunter, qui avait imaginé une machine de coulée en continu qui transformait les débris d'aluminium en alliages extrêmement résistants.

DÉVELOPPEMENT DE PLAFONDS

Grâce à cette machine de coulée en continu unique et au développement d'équipements de profilage et de poinçonnage, Henry et Joe ont été les premiers à concevoir le store vénitien en aluminium et, conjointement, ils ont créé la société Hunter Douglas telle que nous la connaissons aujourd'hui. En 1962, Hunter Douglas a introduit les plafonds linéaires en métal, créant ainsi un système standard ayant aujourd'hui évolué vers une gamme complète de produits pour des projets de tous types.

PRÉSENCE MONDIALE

Aujourd'hui, une part importante de l'activité de Hunter Douglas reste dédiée à l'aluminium recyclé, grâce à des installations de recyclage, de fonderie et de coulée en continue à Rotterdam, aux Pays-Bas. Depuis ces locaux, la société gère des sites de fabrication et de distribution dans plus de 100 pays, avec des milliers de projets dans le monde entier.

DURABILITÉ

Hunter Douglas est un pionnier du développement de concepts durables. Notre objectif est de simplifier l'assemblage, d'améliorer les procédés de production, d'éliminer les déchets et de réduire la maintenance au sein de nos opérations, tout en nous associant avec des organisations telles que C2C Products Innovation Institute afin d'influencer toutes les phases du secteur de la construction.

TAIM

En tant que membre de TAIM, nous devons auditer notre de production conformément aux exigences du système de certification TAIM. Le certificat TAIM délivré annuellement est la preuve que la conclusion est positive.

OEKOTEX

Les produits portant cette icône sont testés sur des substances nocives et une possible irritation de la peau.

CRADLE TO CRADLE

La norme de produit Cradle to Cradle Certified™ guide les concepteurs et les fabricants tout au long d'un processus d'amélioration continue qui consiste à analyser un produit en cinq catégories de qualité: santé des matériaux, réutilisation des matériaux, énergie renouvelable et gestion du carbone, gestion de l'eau et équité sociale.

ISO 9001

Notre usine de production est certifiée ISO 9001 afin de garantir que les produits et services répondent systématiquement aux exigences du client et que la qualité soit constamment améliorée.

FORMALDÉHYDE (E1)

Niveau d'émission de formaldéhyde (E1 = résultat de test le plus bas possible).

COV

La performance en émission de COV conforme aux exigences de l'étiquetage français.

CONTENU RECYCLÉ

Le contenu recyclé du produit tel que vérifié par un tiers ou basé sur les données du marché moyen.

EPD

Pour les produits portant cette icône, une déclaration environnementale de produit (EPD) basée sur la norme EN 15804 est disponible.

EPD

Pour les produits HeartFelt® dotés de cette icône, une EPD (Environmental Product Declaration) basée sur la norme EN 15804 est disponible.

ISO 14001

Notre usine de production est certifiée ISO 14001, fournissant aux responsables de la société et aux collaborateurs externes ainsi qu'aux parties prenantes externes l'assurance que l'impact sur l'environnement est régulièrement mesuré et amélioré.

ICÔNES DE PERFORMANCE TECHNIQUE D'EXPLICATION

RÉACTION AU FEU
Réaction au feu conformément à la norme EN 13501-1, Euroclasses (A1 -F).

STABILITÉ AU FEU
Plafonds stables au feu.
(Belgique uniquement)

PERFORATIONS / MOTIFS
Perforations sur mesure / Motifs disponibles.

ABSORPTION PHONIQUE
Une évaluation chiffrée en un seul nombre pour les coefficients d'absorption sonores aléatoires d'incidence tels que calculés par référence à EN ISO 11654 ou calculés par référence ATSM.

CLASSE ABSORPTION PHONIQUE
Classification absorption phonique (A-E) basé sur l'absorption phonique α_W.

GARNISSAGE ACOUSTIQUE
Garnissage acoustique disponible.

DIMENSIONS
Dimension personnalisées possible.

FORMES
Formes sur mesure disponible.

POIDS
Poids par unité de produit (kg/m²).

COLORIS
Choix de la couleur possible.

REFLECTANCE DE LA LUMIERE
Le reflet de la lumière correspond à la proportion de lumière qui est renvoyée par le produit lorsque celui ci est testé selon la norme EN 410.

RÉSISTANCE AUX RAYURES
Surface haute résistance aux rayures.

EFFETS BOIS
Autres effets bois disponibles.

SOLUTION CONTRE LES IMPACTS
Plafond résistant aux impacts disponible.

SERVICE INTEGRATION
Découpes d'usine personnalisées pour l'intégration d'appareils et luminaires.

FONCTION BASCULANTE
Fonction basculante possible.

SOLUTIONS EXTERIEURES
Plafonds extérieurs possible.

RÉSISTANCE A L'HUMIDITÉ
Conditions d'humidité relative maximales pour l'installation et la durée de vie du plafond.

TEMPERATURE / RH
Classification de la classe climatique selon la norme EN 13964 dans lequel le plafond peut être utilisé.

UTILISATION EN PLAFOND
Utilisation en plafond possible.

UTILISATION EN MURAL
Utilisation en mural possible.

NETTOYAGE ET DÉSINFECTION
La fréquence et la méthode de nettoyage d'un plafond varient d'une application à l'autre. Tous les produits peuvent au moins être nettoyés avec un chiffon sec ou un aspirateur.

Essuyage avec un chiffon sec / brosse douce.

Essuyage avec un chiffon humide.

HunterDouglas Architectural

DE

FIRMENGRÜNDUNG

Die Unternehmensgeschichte von Hunter Douglas begann mit recyceltem Aluminum. 1940 zog der Unternehmensgründer Henry Sonnenberg von Holland nach Amerika und gründete die Douglas Machinery Corporation. Ein paar Jahre später ging er eine entscheidende Zusammenarbeit ein mit dem Erfinder Joe Hunter, der eine Gießmaschine erfunden hatte, die Aluminiumabfälle in ultraharte Legierungen umwandeln konnte.

DECKENENTWICKLUNG

Auf Grundlage dieser einzigartigen Gießmaschine und der Entwicklung von Stanz- und Profilieranlagen wurden Henry und Joe zu Vorreitern in der Entwicklung von Aluminium-Jalousien und gründeten gemeinsam das Unternehmen Hunter Douglas, wie wir es heute kennen. 1962 führte Hunter Douglas lineare Metalldecken ein und schuf ein Standardsystem, das bis heute zu einem kompletten Produktsortiment für Projekte aller Art ausgebaut wurde.

WELTWEITE PRÄSENZ

Recyceltes Aluminium ist auch heute noch ein wesentlicher Bestandteil der geschäftlichen Aktivitäten von Hunter Douglas. Das Unternehmen unterhält eine Recyclinganlage, ein Hüttenwerk und eine Stranggießanlage im holländischen Rotterdam. Von hier aus steuert das Unternehmen Herstellungs- und Vertriebsanlagen in über 100 Ländern, mit Installationen in Tausenden von Projekten überall auf der Welt.

UMWELTVERTRÄGLICHKEIT

Bei Hunter Douglas steht die Entwicklung nachhaltiger Produktkonzepte im Vordergrund. Wir möchten die Montage vereinfachen, Produktionsprozesse verbessern, Abfall reduzieren und den Wartungsaufwand in unseren eigenen Anlagen reduzieren, während wir gleichzeitig mit Organisationen wie dem C2C Products Innovation Institute zusammenarbeiten, um in alle Phasen der Bauabläufe involviert zu sein.

TAIM

Als Mitglied von TAIM sind wir verpflichtet, unser Produktion gemäß den Anforderungen des TAIM-Zertifizierungsschemas zu auditieren. Ein positiver Abschluss ist das jährlich ausgestellte TAIM-Zertifikat.

OEKOTEX

Produkte mit diesem Symbol werden auf Schadstoffe und mögliche Hautreizungen geprüft.

CERTIFIED CRADLE TO CRADLE

Der Cradle to Cradle Certified™- Produktstandard führt Designer und Hersteller durch einen kontinuierlichen Verbesserungsprozess, bei dem ein Produkt anhand von fünf Qualitätskategorien untersucht wird: Materialgesundheit, Materialverwendung, Management erneuerbarer Energien und Kohlenstoff, Wasserverantwortung und soziale Fairness.

ISO 9001

Unsere Produktionsstätte ist nach ISO 9001 zertifiziert, um sicherzustellen, dass Produkte und Dienstleistungen den Kundenanforderungen beständig entsprechen und die Qualität stetig verbessert wird.

FORMALDEHYDE (E1)

Formaldehyd-Emissionsniveau (E1 = niedrigstes mögliches Testergebnis).

VOC

Die VOC-Emissionsleistung entspricht den französischen Kennzeichnungsvorschriften.

RECYCELTER INHALT

Der recycelte Inhalt des Produkts, der von einem Dritten überprüft wurde oder auf durchschnittlichen Marktdaten basiert.

EPD

Für Produkte mit diesem Symbol ist eine auf EN 15804 basierende EPD (Environmental Product Declaration) erhältlich.

EPD

Für HeartFelt®-Produkte mit diesem Symbol ist eine EPD (Environmental Product Declaration) basierend auf EN 15804 verfügbar.

ISO 14001

Unsere Produktionsstätte ist nach ISO 14001 zertifiziert und bietet der Unternehmensleitung und den Mitarbeitern sowie externen Interessengruppen die Sicherheit, dass die Umweltauswirkungen kontinuierlich gemessen und verbessert werden.

ERLÄUTERUNG TECHNISCHE LEISTUNGSIKONEN

BRANDSCHUTZKLASSIFIZIERUNG
Brandklasse in Übereinstimmung mit EN 13501 1 analog zu Euroclass (A1 - F).

FEUERRESISTENZ
Feuerresistente Paneelen erhältlich.
(Nur Belgien)

PERFORATIONEN / MUSTER
Kundenwunsch Perforationen / Muster auf Anfrage möglich.

SCHALLABSORPTION
Es wurden Werte für generelle Schallabsorptionen in Relation nach EN ISO 11654 (α_W) berechnet oder unter Bezugnahme auf ASTM C423 (NRC).

SCHALLABSORPTIONSGRAD/ SCHALLABSORPTIONSKLASSE
Schallabsorptionsklasse (A - E) basierend auf dem Wert von α_W.

AKUSTIK-EINLAGEN
Kundenspezifische Akustikeinlagen erhältlich.

ABMESSUNGEN/DIMENSIONEN
Kundenspezifische Masse möglich.

FORMEN
Kundenspezifische Formen möglich.

GEWICHT
Produktgewicht (kg/m²).

FARBEN
Kundenspezifische Farben möglich.

LICHTREFLEXION
Lichtreflexion ist der Anteil des einfallenden Lichts, welches vom Produkt reflektiert wird (geprüft nach EN 410).

KRATZFESTIGKEIT
Oberfläche höchst kratzresistent.

FURNIERE
Zusätzliche Furniere auf spezifischen Kundenwunsch verfügbar.

STOSS-/SCHLAGFESTIGKEIT
Stoss-/schlagfeste Decken erhältlich.

WARTUNGSZUGANG
Kundenspezifische Lösungen/Cut-outs für Wartungszugang möglich.

SWING-DOWN
Abklapp-Version erhältlich.

AUSSENANWENDUNG
Für Anwendung im Aussenbereich geeignet.

FEUCHTIGKEITSKLASSE
Maximale relative (Luft-)Feuchtigkeit für die Installation und Lebensdauer der Paneelen.

TEMPERATUR/RF
Klassifizierung der Klima-/Temperaturklasse nach EN 13964 in welchem die Decke verwendet werden kann.

DECKENINSTALLATION
Für Deckeninstallation geeignet.

WANDINSTALLATION
Für Wandinstallation geeignet.

REINIGUNG/PFLEGE/DESINFEKTION
Die Notwendigkeit und die Art der Reinigung differenziert von einem System zum anderen. Alle Produkte können zumindest mit trockenen Tüchern und Staubsauger gereinigt werden.

Reinigung mit trockenem Tuch oder weicher Bürste.

Reinigung mit feuchtem Tuch.

HunterDouglas Architectural

NL

ONZE ONTSTAANSGESCHIEDENIS

Hunter Douglas is ontstaan uit de verwerking van gerycled aluminium. In 1940 emigreerde de oprichter Henry Sonnenberg van Nederland naar Amerika, waar hij de Douglas Machinery Corporation oprichtte. Enkele jaren later begon hij een cruciale samenwerking met de uitvinder Joe Hunter die een gietmachine had uitgevonden die van aluminiumschroot zeer harde legeringen kon maken.

ONTWIKKELING VAN PLAFONDS

Op basis van deze unieke gietmachine en ontwikkelingen van rolvorming- en stansgereedschappen ontpopten Henry en Joe zich tot voorlopers in de ontwikkeling van aluminium jaloezieën. Uit hun samenwerking ontstond Hunter Douglas zoals we dat vandaag kennen. In 1962 introduceerde Hunter Douglas lineaire metalen plafonds, met een standaardsysteem dat zich in de loop der jaren heeft ontwikkeld tot een uitgebreide reeks van producten voor alle soorten projecten.

WERELDWIJD VERTEGENWOORDIGD

Gerecycled aluminium vormt nog steeds een belangrijk deel van de activiteiten van Hunter Douglas, met een recyclinginrichting, een smelterij en een continugietlijn in Rotterdam. Vanuit die centrale locatie beheert het bedrijf productie- en distributie-vestigingen in meer dan 100 landen, met installaties in duizenden projecten wereldwijd.

DUURZAAMHEID

Hunter Douglas is pionier in de ontwikkeling van duurzame productconcepten. We streven ernaar assemblage te vereenvoudigen, productieprocessen te verbeteren, afvalproductie te voorkomen en onderhoudswerkzaamheden bij onze eigen activiteiten te verminderen. Daarnaast werken we samen met organisaties als C2C Products Innovation Institute om in alle fasen van bouwprocessen het verschil te maken.

TAIM

Als lid van TAIM zijn wij verplicht om onze productie te auditen volgens de vereisten van het TAIM-certificatieschema. Het bewijs van een positieve conclusie is het jaarlijks afgegeven TAIM-certificaat.

OEKOTEX

Producten met dit pictogram zijn getest op schadelijke stoffen en mogelijke huidirritatie.

GECERTIFICEERDE CRADLE TOT CRADLE

De Cradle to Cradle Certified™ productstandaard begeleidt ontwerpers en fabrikanten door een continu verbeterings-proces waarbij een product door vijf kwaliteitscategorieën wordt bekeken - materiaalgezondheid, materiaalhergebruik, hernieuwbare energie en koolstofbeheer, waterbeheer en sociale rechtvaardigheid.

ISO 9001

Onze productie-installatie is ISO 9001-gecertificeerd om ervoor te zorgen dat producten en diensten consistent voldoen aan de eisen van de klant en dat de kwaliteit constant wordt verbeterd.

FORMALDEHYDE (E1)

Formaldehyde-emissieniveau (E1 = laagste testresultaat mogelijk).

VOC

De VOC-emissieprestaties in overeenstemming met de Franse etiketteringsvoorschriften.

RECYCLED CONTENT

De gerecyclede inhoud van het product zoals geverifieerd door een derde of gebaseerd op gemiddelde marktgegevens.

EPD

Voor producten met dit pictogram is een EPD (Environmental Product Declaration) gebaseerd op EN 15804 beschikbaar.

EPD

Voor HeartFelt®-producten met dit pictogram is een EPD (Environmental Product Declaration) gebaseerd op EN 15804 beschikbaar.

ISO 14001

Onze productie-installatie is ISO 14001-gecertificeerd en biedt bedrijfsmanagement en werknemers en externe belanghebbenden zekerheid dat de impact op het milieu consequent wordt gemeten en verbeterd.

TOELICHTING TECHNISCHE PRESTATIEPICTOGRAMMEN

REACTIE OP BRAND
Classificatie bij brand volgens EN 13501-1 uitgedrukt als Euroklasse (A1 - F).

BRANDSTABILITEIT
Vuurvaste plafonds beschikbaar.
(Alleen België)

PERFORATIES / PATRONEN
Aangepaste perforaties/patronen beschikbaar.

GELUID ABSORPTIE
Een cijfer met één nummer voor geluidsabsorptiecoëfficiënten voor willekeurige incidentie zoals berekend aan de hand van EN ISO 11654 (α_W) of, zoals berekend aan de hand van ASTM C423 (NRC).

GELUIDSABSORPTIEKLASSE
Een classificatie voor geluidsabsorptie (A - E) op basis van de waarde voor geluidsabsorptie α_W.

AKOESTISCHE VULLINGEN
Aangepaste akoestische infills beschikbaar.

AFMETINGEN
Aangepaste formaten beschikbaar.

VORMEN
Aangepaste vormen beschikbaar.

GEWICHT
Gewicht per oppervlakte-eenheid van het product (kg/m²).

KLEUREN
Aangepaste kleuren beschikbaar.

LICHTREFLECTIE
Lichtreflectie is de hoeveelheid invallend licht die wordt teruggekaatst door het product, wanneer het wordt getest volgens EN 410.

KRASBESTENDIGHEID
Superieur niveau van krasbestendigheid.

VENEERS
Extra aangepaste houtfineereffecten mogelijk.

IMPACTOPLOSSINGEN
Slagvast plafond beschikbaar.

SERVICE-INTEGRATIE
Aangepaste fabrieksuitsparingen voor service-integratie beschikbaar.

SWING-DOWN FUNCTIE
Swing-down functionaliteit beschikbaar.

BUITENOPLOSSINGEN
Buitenplafond beschikbaar.

VOCHTIGBESTENDIGHEID
Maximale relatieve luchtvochtigheid voor installatie en levensduur van plafond

TEMPERATUUR/RV
Classificatie van klimaatklasse volgens EN 13964 waarin plafond kan worden gebruikt.

PLAFONDTOEPASSING
Plafondtoepassing beschikbaar.

WANDTOEPASSING
Muurtoepassing is beschikbaar.

REINIGING EN DESINFECTIE
De frequentie en reinigingsmethode van een plafond varieert van toepassing tot toepassing. Alle producten kunnen minimaal worden gereinigd met een droge doek of stofzuiger.

Afneembaar met een droge doek / zachte borstel.

Afneembaar met een vochtige doek.

HunterDouglas Architectural

NUESTRO FUNDADOR

Hunter Douglas fué fundado en base al aluminio reciclado. En 1940, el fundador de la compañía, Henry Sonnenberg, se mudó a Estados Unidos desde Holanda y fundó Douglas Machinery Corporation. Unos años más tarde, comenzó una colaboración crítica con el inventor Joe Hunter, quien había inventado una máquina de fundición que podía convertir chatarra de aluminio en aleaciones ultraduras.

DESARROLLO DE TECHO

Basado en esta máquina de fundición única y en los desarrollos de equipos de estampado y laminado, Henry y Joe fueron pioneros en el desarrollo de la persiana veneciana de aluminio y crearon conjuntamente Hunter Douglas tal como lo conocemos hoy. En 1962, Hunter Douglas introdujo techos metálicos lineales, creando un sistema estándar que hoy se ha convertido en una gama completa de productos para proyectos de todo tipo.

PRESENCIA MUNDIAL

Hoy, una parte importante del negocio de Hunter Douglas sigue dedicada al aluminio reciclado, con una instalación de reciclaje, fundición y fundición continua en Rotterdam, Holanda. Desde esa base, la compañía opera instalaciones de fabricación y distribución en más de 100 países, con instalaciones en miles de proyectos en todo el mundo.

SOSTENIBILIDAD

Hunter Douglas está a la vanguardia del desarrollo de conceptos de productos sostenibles. Buscamos simplificar el ensamblaje, mejorar los procesos de producción, eliminar el desperdicio y reducir el mantenimiento dentro de nuestras propias operaciones, al tiempo que nos asociamos con organizaciones como el Instituto de Innovación de Productos C2C, para tener un impacto en todas las fases de la industria de la construcción.

TAIM

Como miembro de TAIM, estamos obligados a auditar nuestra de producción según los requisitos del esquema de certificación TAIM. Prueba de una conclusión positiva es el Certificado TAIM emitido anualmente.

OEKOTEX

Los productos con este icono se prueban en sustancias nocivas y posibles irritaciones de la piel.

CUNA A CUNA CERTIFICADA

El estándar de producto Cradle to Cradle Certified™ guía a los diseñadores y fabricantes a través de un proceso de mejora continua que analiza un producto a través de cinco categorías de calidad: salud del material, reutilización del material, gestión de energías renovables y carbono, administración del agua y equidad social.

ISO 9001

Nuestra planta de producción cuenta con la certificación ISO 9001 para garantizar que los productos y servicios cumplan constantemente con los requisitos del cliente, y que la calidad se mejore constantemente.

FORMALDEHÍDO (E1)

Nivel de emisión de formaldehído (E1 = resultado de prueba más bajo posible).

VOC

El rendimiento de emisión de VOC de acuerdo con los requisitos de etiquetado francés.

CONTENIDO RECICLADO

El contenido reciclado del producto verificado por un tercero o basado en datos promedio del mercado.

EPD

Para productos con este icono, una EPD. (Declaración ambiental del producto) basada en EN 15804 está disponible.

EPD

Para los productos HeartFelt® con este icono, se encuentra disponible una EPD (Declaración Ambiental de Producto) basada en EN 15804.

ISO 14001

Nuestra planta de producción cuenta con la certificación ISO 14001, lo que garantiza a la gerencia de la empresa y a los empleados, así como a las partes interesadas externas, que el impacto ambiental se mide y mejora constantemente.

EXPLICACIÓN ICONOS DE DESEMPEÑO TÉCNICO

REACCIÓN AL FUEGO
Clasificación de reacción al fuego según EN 13501-1 expresada como Euroclase (A1 - F).

ESTABILIDAD AL FUEGO
Techos estables al fuego disponibles.
(Solo Bélgica)

PERFORACIONES / PATRONES
Perforaciones / patrones personalizados disponibles.

ABSORCIÓN DE SONIDO
Una clasificación de un solo número para los coeficientes de absorción acústica de incidencia aleatoria calculada con referencia a EN ISO 11654 (α_W) o, calculada con referencia a ASTM C423 (NRC).

CLASE DE ABSORCIÓN DE SONIDO
Una clasificación para la absorción acústica (A - E) basada en el valor α_W de absorción acústica.

RELLENOS ACÚSTICOS
Rellenos acústicos personalizados disponibles.

DIMENSIONES
Tamaños personalizados disponibles.

FORMAS
Formas personalizadas disponibles.

PESO
Peso por unidad de área del producto (kg/m²).

COLORES
Colores personalizados disponibles.

REFLEXIÓN DE LUZ
La reflexión de la luz es la proporción de luz incidente que se refleja en el producto, cuando se prueba de acuerdo con la norma EN 410.

RESISTENCIA AL RAYADO
Nivel superior de resistencia al rayado de la superficie.

CHAPAS DE MADERA
Efectos adicionales de chapa de madera personalizados posibles.

SOLUCIONES DE IMPACTO
Techo resistente a impactos disponible.

INTEGRACION DE SERVICIO
Recortes de fábrica personalizados para la integración de servicios disponibles.

FUNCIÓN ABATIBLE
Funcionalidad de giro hacia abajo disponible.

SOLUCIONES EXTERIORES
Techo exterior disponible.

RESISTENCIA A LA HUMEDAD
Condiciones máximas de humedad relativa para la instalación y la vida útil del techo.

TEMPERATURA/RH
Clasificación de la clase climática según EN 13964 en la que se puede utilizar el techo.

APLICACIÓN DE TECHO
Una aplicación de techo está disponible.

APLICACIÓN DE PARED
Una aplicación de pared está disponible.

LIMPIEZA Y DESINFECCION
La frecuencia y el método de limpieza de un techo varía de una aplicación a otra. Todos los productos se pueden limpiar al menos con un paño seco o una aspiradora.

Se puede limpiar con un paño seco / cepillo suave.

Se puede limpiar con un paño húmedo.

HunterDouglas Architectural

NASZE KORZENIE

Hunter Douglas został zbudowany na aluminium z recyklingu. W 1940 roku założyciel firmy Henry Sonnenberg przeniósł się do Ameryki z Holandii i założył Douglas Machinery Corporation. Kilka lat później rozpoczął przełomową współpracę z wynalazcą Joe Hunterem, który stworzył maszynę odlewniczą mogącą przetwarzać złom aluminiowy w ultra twarde stopy.

ROZWÓJ PRODUKCJI SUFITÓW

Opierając się na tej wyjątkowej maszynie odlewniczej i udoskonalając urządzenia do formowania i tłoczenia, Henry i Joe jako pionierzy opracowali aluminiową żaluzję okienną i wspólnie stworzyli Hunter Douglas, jaki znamy dzisiaj. W 1962 roku Hunter Douglas wprowadził liniowe sufity metalowe, tworząc standardowy system, który dziś przekształcił się w pełną gamę produktów do wszelkiego typu projektów.

OBECNOŚĆ NA CAŁYM ŚWIECIE

Obecnie znaczna część działalności Hunter Douglas nadal jest poświęcona recyklingowi aluminium, z zakładem recyklingu, hutą i ciągłym odlewem w Rotterdamie w Holandii.Z tej bazy firma prowadzi zakłady produkcyjne i dystrybucyjne w ponad 100 krajach świata i ma w portfolio instalacje produktów w tysiącach projektów na całym świecie.

ZRÓWNOWAŻONY ROZWÓJ

Hunter Douglas jest liderem w opracowywaniu koncepcji zrównoważonych produktów. Staramy się uprościć montaż, usprawnić procesy produkcyjne, wyeliminować odpady i ograniczyć konserwację w ramach naszych własnych operacji, a także współpracując z organizacjami takimi jak C2C Products Innovation Institute, aby wywrzeć wpływ na wszystkie fazy procesu budowlanego.

TAIM

Jako członek TAIM jesteśmy zobowiązani do audytu naszej produkcji zgodnie z wymogami programu certyfikacji TAIM. Dowodem pozytywnego wniosku jest corocznie wydawany certyfikat TAIM.

OEKOTEX

Produkty oznaczone tą ikoną są wolne od substancji szkodliwych w stężeniach mających negatywny wpływ na stan zdrowia człowieka oraz negatywny wpływ na środowisko.

CERTYFIKAT CRADLE TO CRADLE

Zasada “od kołyski do kołyski” prowadzi projektantów i producentów zgodnie ze standardowymi wytycznymi Cradle to Cradle Certified™ w ciągłym procesie ulepszania produktów w ramach wytycznych opierających się na pięciu kryteriach: materiały bezpieczne dla zdrowia, ponowne wykorzystanie surowców, korzystanie ze źródeł energii odnawialnej, emisja dwutlenku węgla, zarządzanie zasobami wodnymi i odpowiedzialność społeczna.

ISO 9001

Nasz zakład produkcyjny posiada certyfikat ISO 9001, który gwarantuje, że produkty i usługi permanentnie spełniają wymagania klientów, a jakość jest konsekwentnie poprawiana.

FORMALDEHYD (E1)

Poziom emisji formaldehydu (E1 = najniższy możliwy wynik testu).

LZO

Poziom emisji LZO - lotnych związków organicznych - zgodnie z francuskimi wymogami dotyczącymi etykietowania.

ZAWARTOŚĆ Z RECYKLINGU

Zawartość w produkcie materiałów pochodzących z recyklingu zweryfikowana przez stronę trzecią lub na podstawie średnich danych rynkowych.

EPD

Dla sufitów metalowych oznaczonych tą ikoną dostępna jest EPD - Środowiskowa Deklaracja.Produktu - oparta na EN 15804.

EPD

Dla produktów HeartFelt® z oznaczonych tą ikoną dostępna jest EPD - Środowiskowa Deklaracja Produktu - oparta na EN 15804.

ISO 14001

Nasz zakład produkcyjny posiada certyfikat ISO 14001, co zapewnia zarządowi firmy i pracownikom, a także zewnętrznym interesariuszom, że wpływ na środowisko jest stale mierzony i poprawiany.

LEGENDA DLA SYMBOLI OPISUJĄCYCH WŁAŚCIWOŚCI TECHNICZNE

REAKCJA NA OGIEŃ
Klasyfikacja reakcji na ogień zgodnie z EN 13501-1 wyrażona w Euroklasie wyrobu (A1 - F).

STABILNOŚĆ OGNIOWA
Możliwe sufity o określonej stabilności ogniowej. (Tylko Belgia)

PERFORACJE/WZORY
Możliwe wykonanie niestandardowych perforacji/wzorów.

POCHŁANIANIE DŹWIĘKU
Współczynniki pochłaniania dźwięków o wybranych częstotliwościach wyznaczone zgodnie z EN ISO 11654 (αw) lub to ASTM C423 (NRC).

KLASA POCHŁANIANIA DŹWIĘKU
Klasyfikacja pochłaniania dźwięku - klasa A-E, oparta na współczynniku αw.

WKŁADY AKUSTYCZNE
Możliwe zastosowanie niesystemowych, dodatkowych wypełnień akustycznych.

WYMIARY
Możliwe niestandardowe wymiary produktu.

KSZTAŁTY
Możliwe niestandardowe kształty produktu.

MASA
Masa jednostkowa produktu (kg/m^2).

KOLORY
Możliwe kolory niestandardowe.

ODBICIE ŚWIATŁA
Odbicie światła to procent światła odbitego od powierzchni produktu określony zgodnie z EN 410.

ODPORNOŚĆ NA ZARYSOWANIE
Najwyższy poziom odporności na zarysowania powierzchni.

FORNIRY
Możliwe dodatkowe niestandardowe efekty dla forniru.

ODPORNOŚĆ NA UDERZENIA
Dostępny sufit odporny na uderzenia.

INTEGRACJA Z INSTALACJAMI
Możliwe niestandardowe fabryczne wycięcia do montażu instalacji.

FUNCJA SWING-DOWN
Dostępna funkcja otwierania (opuszczania) sufitu.

ZASTOSOWANIE ZEWNĘTRZNE
Możliwe zastosowanie zewnętrzne produktu.

ODPORNOŚĆ NA WILGOĆ
Warunki maksymalnej wilgotności względnej dla montażu i użytkowania sufitu.

TEMPERATURA/RH
Klasyfikacja klasy klimatycznej według EN 13964, w której można zastosować sufit.

ZASTOSOWANIE NA SUFICIE
Możliwe zastosowanie na suficie.

ZASTOSOWANIE NA ŚCIANIE
Możliwe zastosowanie jako zabudowy ściennej.

CZYSZCZENIE I DEZYNFEKCJA
Częstotliwość i sposób czyszczenia różnią się w zależności od zastosowanego produktu. Wszystkie produkty można czyścić suchą ściereczka lub odkurzaczem.

Można czyścić suchą szmatką / miękką szczotką.

Można czyścić wilgotną szmatką.

HunterDouglas Architectural

LE NOSTRE ORIGINI

Hunter Douglas nasce come azienda per la lavorazione dell'alluminio riciclato. Nel 1940, il fondatore Henry Sonnenberg si trasferisce in America dall'Olanda e fonda la Douglas Machinery Corporation. Alcuni anni dopo, avvia una collaborazione che si rivelerà decisiva con Joe Hunter, inventore di una macchina di pressofusione in grado di convertire i rottami di alluminio in leghe ultra-dure.

SVILUPPO DEI CONTROSOFFITTI

A partire da questa esclusiva invenzione e con lo studio e l'utilizzo di apparecchiature per la profilatura e lo stampaggio, Henry e Joe, furono pionieri nello sviluppo delle tende veneziane in alluminio, e insieme diedero vita a Hunter Douglas, così come la conosciamo oggi. Nel 1962, Hunter Douglas ha introdotto nel mercato i controsoffitti a doghe lineari, creando un sistema standard, che oggi si è evoluto in una gamma completa di prodotti per progetti di ogni tipo.

PRESENZA GLOBALE

Ancora oggi, una porzione significativa dell'attività di Hunter Douglas è dedicata all'alluminio riciclato, con un impianto di riciclaggio, una fonderia a pressofusione continua a Rotterdam, Olanda. Da qui, la società gestisce stabilimenti di produzione e distribuzione in oltre 100 Paesi, con installazioni in migliaia di progetti in tutto il mondo.

SOSTENIBILITÀ

Hunter Douglas è all'avanguardia nello sviluppo di prodotti sostenibili. Ci impegniamo a semplificare l'assemblaggio, migliorare i processi produttivi, eliminare gli scarti e ridurre la manutenzione all'interno delle nostre attività, collaborando anche con organizzazioni come il C2C Products Innovation Institute, a beneficio di tutte le fasi del settore delle costruzioni.

TAIM

Come membro di TAIM, siamo tenuti a controllare la nostra produzione secondo i requisiti dello schema di certificazione TAIM. Prova di una conclusione positiva è il certificato TAIM rilasciato annualmente.

OEKOTEX

Oeko-Tex è una certificazione che attesta l'atossicità e salubrità dei tessuti

CRANDLE TO CRANDLE

La filosofia del prodotto Crandle to Crandle, guida progettisti e produttori verso un processo di miglioramento continuo, analizzando il prodotto in cinque punti: materiali sicuri per l'uomo e l'ambiente, materiali riciclabili, energie rinnovabili e gestione delle emissioni di CO_2, gestione delle risorse idriche ed impegno sul fronte della giustizia sociale ed ambientale.

ISO 9001

Il nostro impianto di produzione è certificato ISO 9001 per garantire che prodotti e servizi soddisfino costantemente i requisiti del cliente e che la qualità sia costantemente migliorata.

FORMALDEIDE (E1)

Livello di emissione di formaldeide
E1 = (certifica il miglior risultato possibile).

VOC

Certifica le emissioni di COV (Composti Organici Volatili) secondo i requisiti francesi.

CONTENUTO RICICLATO

Il contenuto riciclato del prodotto, verificato da una terza parte o basato su dati di mercato medi.

EPD

Attesta la disponibilità della DAP (Dichiarazione Ambientale di Prodotto) secondo la EN 15804.

EPD

Attesta la disponibilità della DAP (Dichiarazione Ambientale di Prodotto) secondo la EN 15804, per il sistema HeartFelt®.

ISO 14001

Il nostro impianto di produzione è certificato ISO 14001 e garantisce alla direzione aziendale, ai dipendenti e ai soggetti esterni che l'impatto ambientale viene costantemente misurato e migliorato.

LEGENDA SIMBOLI

REAZIONE AL FUOCO
Certificazione di reazione al fuoco, Euroclasse (A1 - F), in conformità alla normativa EN 13501-1.

STABILITÀ AL FUOCO
Soffitti stabili disponibili.
(Solo Belgio)

TIPI DI FORATURA
Forature speciali a richiesta

ASSORBIMENTO ACUSTICO
Un singolo valore per l'incidenza random dei coefficienti di assorbimento acustico calcolati secondo la normativa EN ISO 11654 (α_W) o ASTM C423 (NRC).

CLASSIFICAZIONE ASSORBIMENTO ACUSTICO
Classe di assorbimento acustico (A - E) secondo i coefficienti di assorbimento (α_W).

RIEMPIMENTO ACUSTICO
Riempimento acustico disponibile a richiesta.

DIMENSIONI
Misure speciali disponibili a richiesta.

FORME
Forme speciali disponibili a richiesta.

PESO
Peso stimato (kg/mq).

COLORE
Colori speciali disponibili a richiesta.

RIFLESSIONE LUMINOSA
La riflessione luminosa, testata secondo la normativa EN 410, rappresenta la percentuale di luce che viene riflessa dal prodotto.

RESISTENZA AI GRAFFI
Elevata resistenza ai graffi.

IMPIALLACCIATI
Impiallacciati speciali a richiesta.

SOLUZIONI PER IMPIANTI SPORTIVI
Disponibile per installazione in impianti sportivi.

INTEGRAZIONE APPARECCHI
A richiesta il sistema può essere fornito già predisposto per l'integrazione di apparecchi.

VERSIONE SWING-DOWN
Versione swing-down disponibile.

SOLUZIONI PER ESTERNI
Disponibile anche nella versione per installazione in esterni.

RESISTENZA ALL'UMIDITA'
Condizioni di umidità relativa massima per l'installazione e la durata del controsoffitto.

TEMPERATURA/RH
Classificazione della classe climatica per l'impiego del controsoffitto, in base alla normativa EN 13964.

INSTALLAZIONE A SOFFITTO
Adatto per installazione a soffitto.

INSTALLAZIONE A PARETE
Adatto per installazione a parete.

PULIZIA
La frequenza ed il metodo di pulizia varia in funzione delle caratteristiche del controsoffitto. In generale, tutti i sistemi, possono essere puliti utilizzando un panno asciutto o un aspirapolvere.

Utilizzare un panno asciutto o una spazzola morbida.

Utilizzare un panno umido.

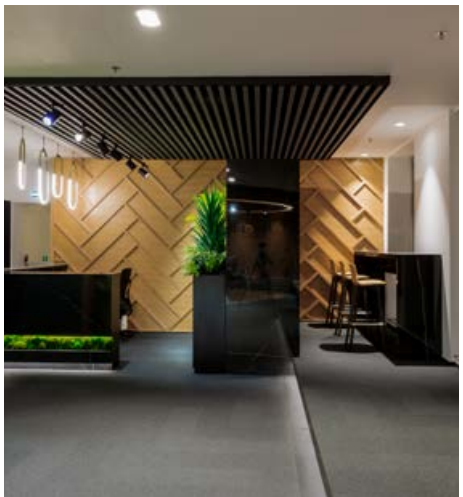
HunterDouglas Architectural

CONTENTS

HEARTFELT® CEILINGS

Based on our deep knowledge of ceilings and their applications, combined with expertise in textiles and production techniques we have developed new ceiling design possibilities with HeartFelt®. This new ceiling material provides outstanding acoustic performance and an aesthetic appearance which results in a warm ambiance rarely experienced before.

EUROSUN
MINING



Project : Euro Sun, Enescu Building, Bucharest
Architect: AMA design
Product : HeartFelt® linear

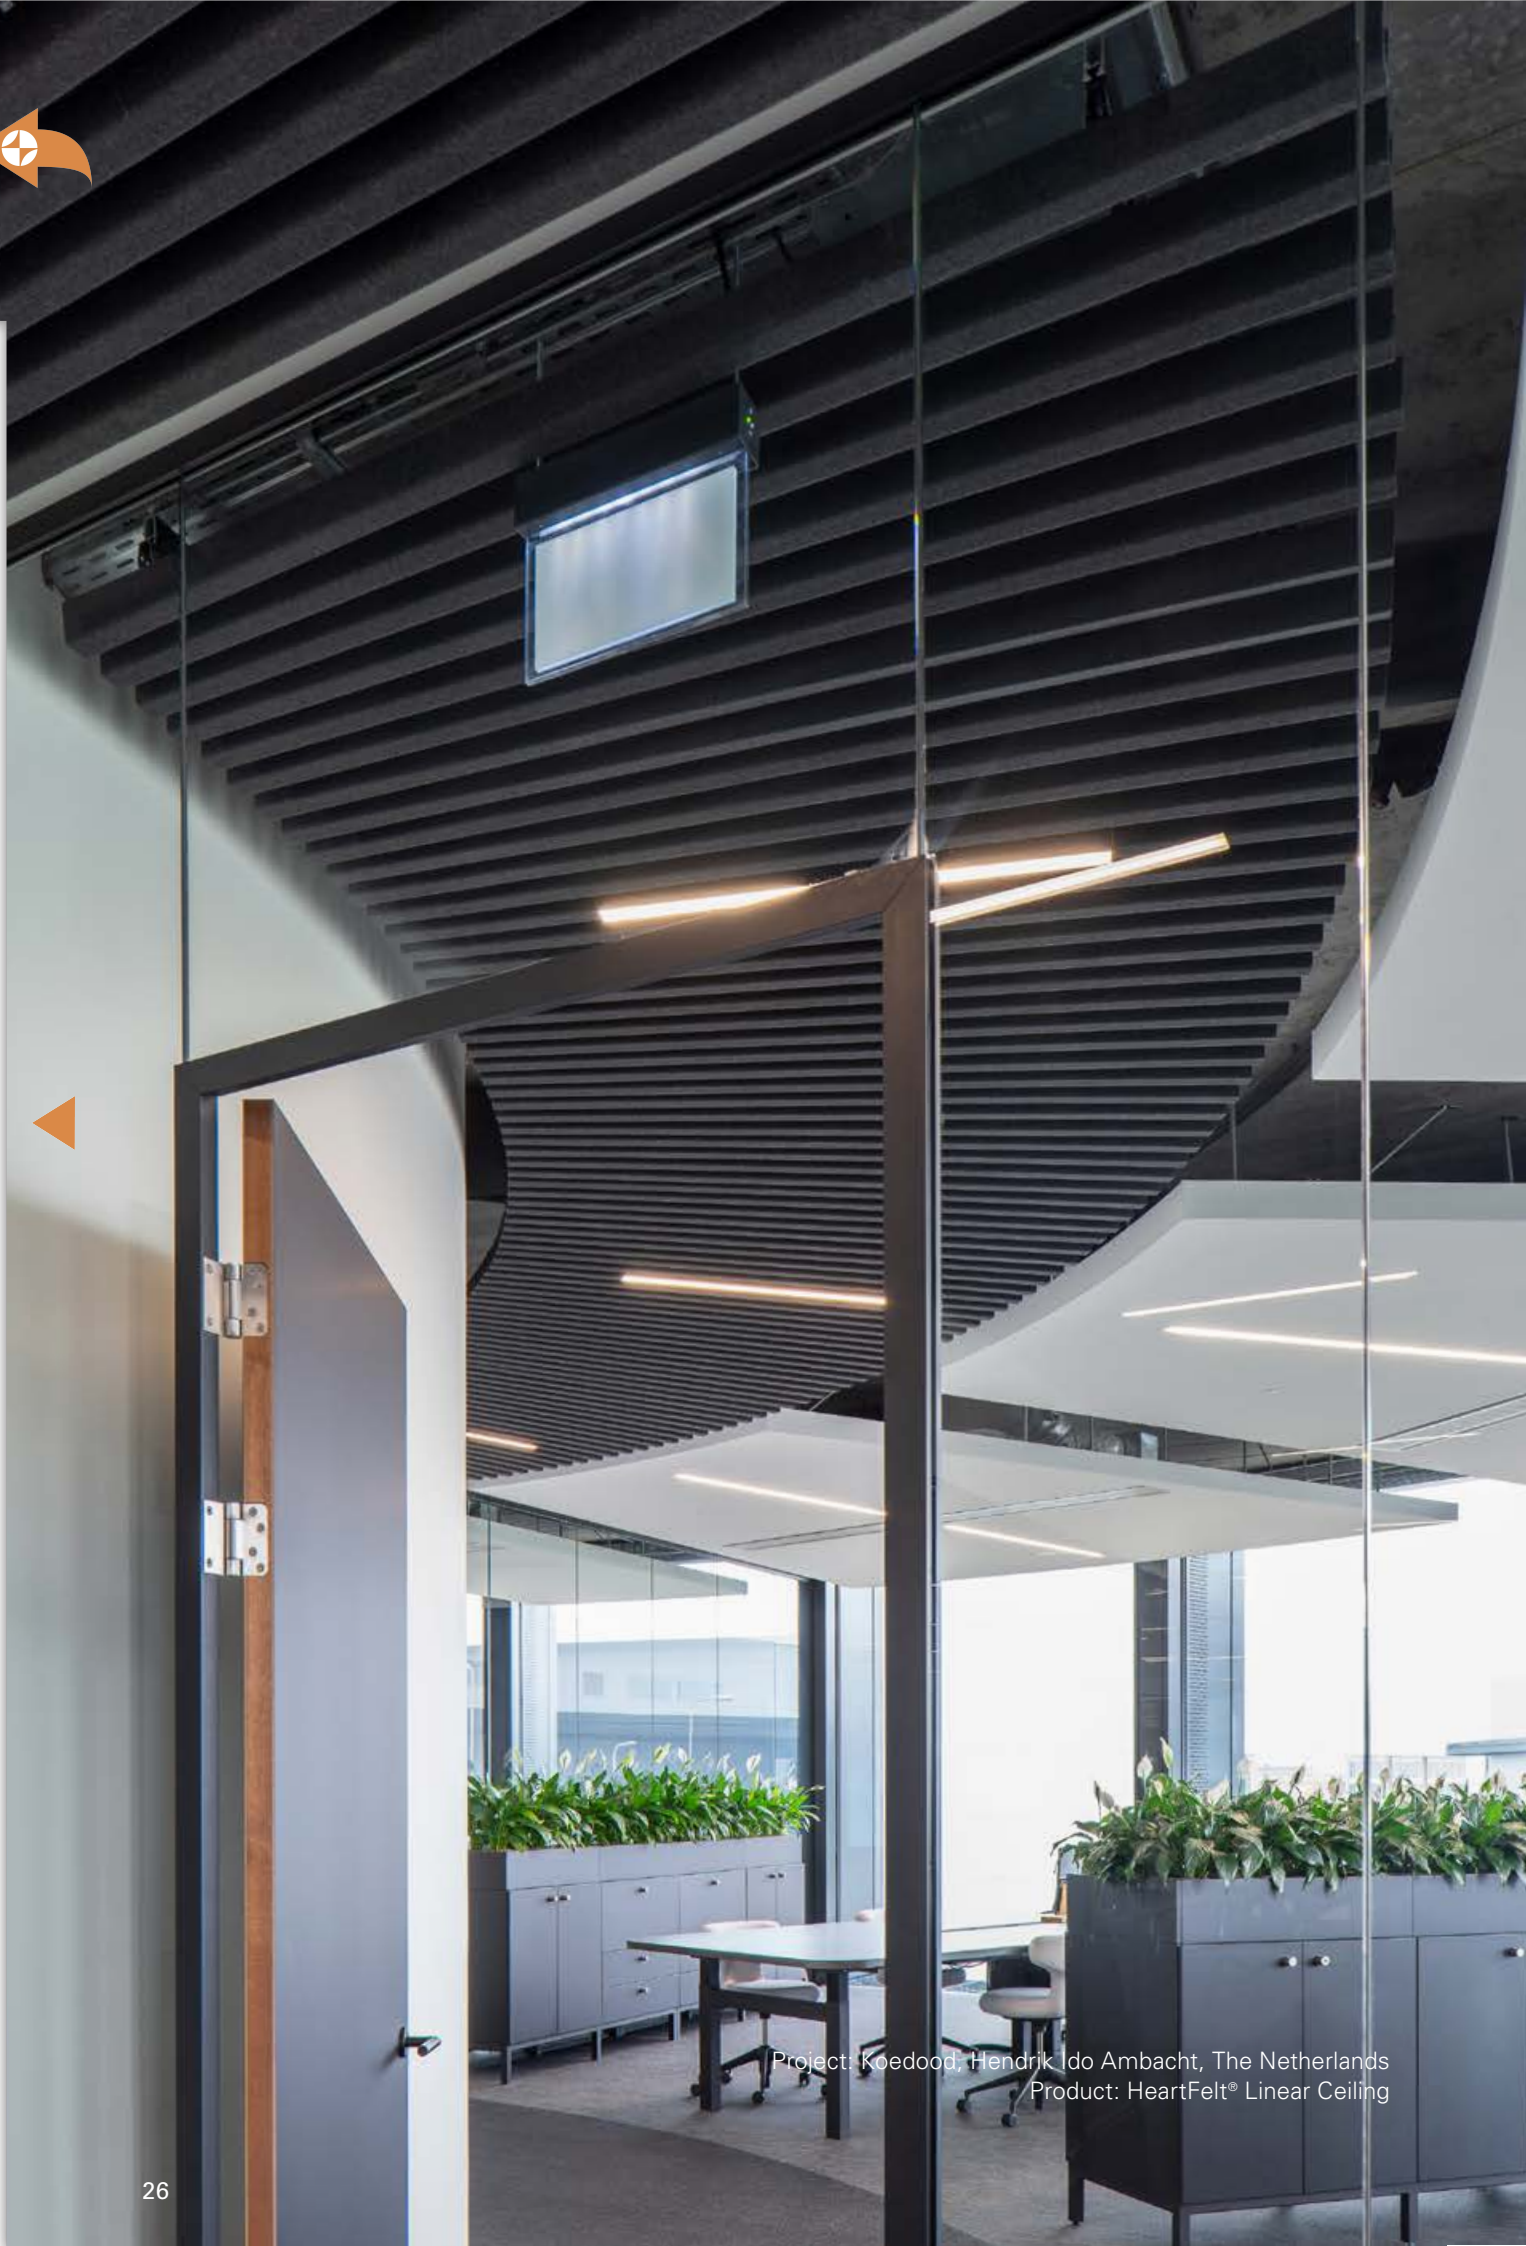
"A SPECIAL DESIGN WITH GREAT ACOUSTIC PERFORMANCE"

When Euro Sun, a major Canadian mining company, opened its first office in Romania, it selected one of Bucharest's premium, grade A office buildings for its headquarters: the Enescu Building.

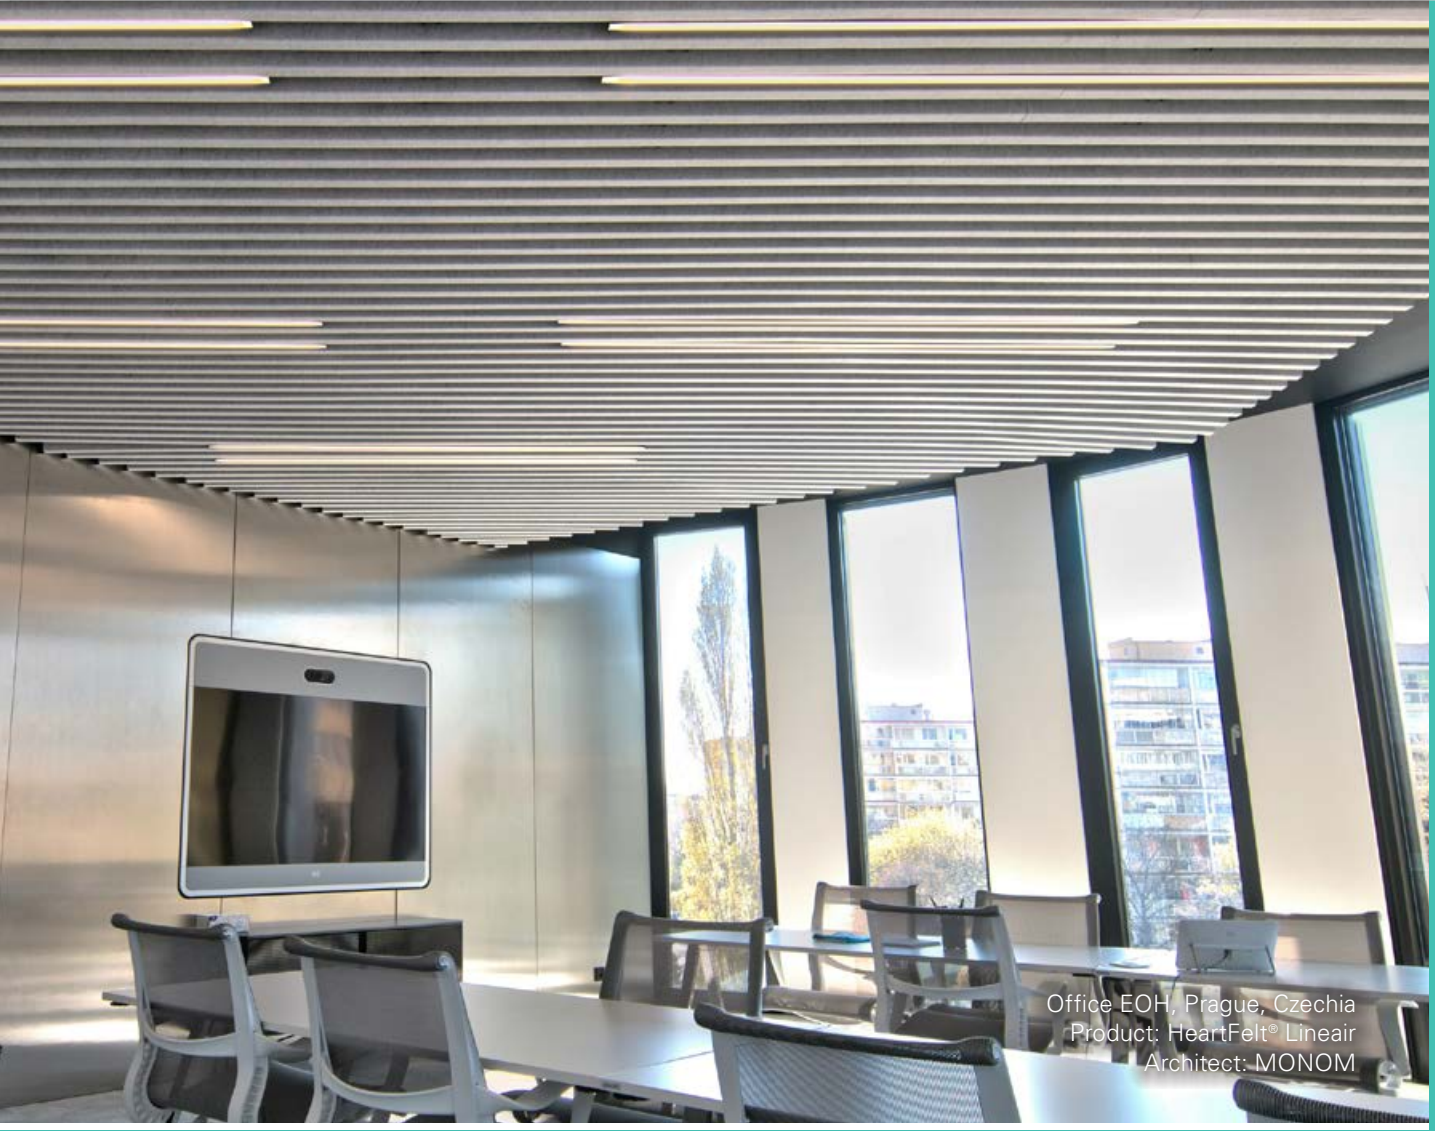
It commissioned a refurbishment of the ninth-floor office of the building, which is also home of the Norwegian Embassy and KLM. The architect AMA Design created a private lounge for VIP presentations, which included Hunter Douglas Architectural's innovative and award-winning HeartFelt® felt ceiling.

Architect Anda Manu said: "The use of HeartFelt® had actually two purposes: a special design in the ceiling cut-outs and more importantly, for the sound absorption that it can offer. As the HVAC machines are above this floor and are very noisy, the acoustic performance required an additional use of sound-absorbing materials. Therefore, we chose the HeartFelt® ceiling system."

"This particular ceiling system is an innovative and a quality solution for a wide range of differently shaped cut-outs in the ceiling, as well as it presents great acoustic properties. It manages to create an appealing aesthetics and it is easy to maintain."

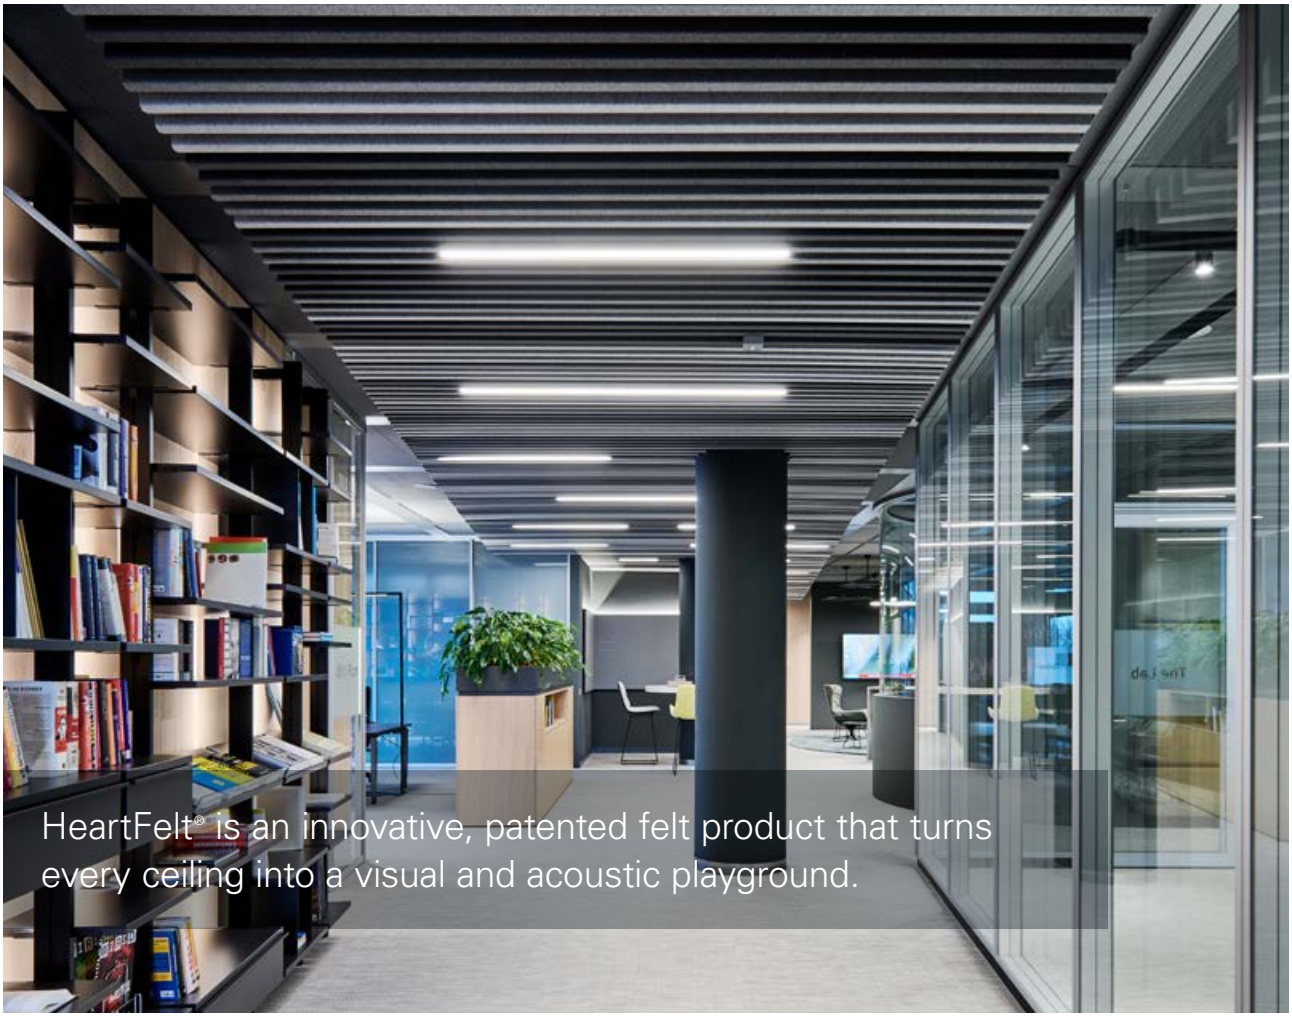


Project: Koedood, Hendrik Ido Ambacht, The Netherlands
Product: HeartFelt® Linear Ceiling



Office EOH, Prague, Czechia
Product: HeartFelt® Lineair
Architect: MONOM

HEARTFELT® CEILINGS



Project: Office, Gutersloh, Germany - Product: HeartFelt® -Linear

KEY FEATURES

- Modular ceiling system with felt panels
- Panel dimensions 40 x 55 mm, 40 x 80 mm and 40 x 105 mm
- Panel length 1000 to 6000 mm
- Eleven standard carrier modules to vary reveal (M50-M200) for acoustics and aesthetics
- Easy plenum access
- Interior applications
- Also available as wall solution
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

WOOD SOLUTIONS

The Wood Solutions for ceilings and walls provides you a wide selection of natural looks, that are as durable as they are distinctive. Whether choosing our solid wood panels, wood veneered solutions or natural looking woodprints, all will bring a natural feel to any project.

Project : Amity University Dubai
Architect: IR Design
Product : Nano perforated veneered wood panels

"AN EYE-CATCHING ENTRANCE WITH SUPERIOR ABSORPTION QUALITIES"

Hunter Douglas Architectural created an eye-catching entrance for the flagship campus of Amity University in Dubai, comprising a wood panel wall and ceiling system that spreads across the atrium.

Interior design specialists IR Design specified the new range of wooden ceiling and wall system because it enabled them to create a seamless look.

The system has nano-perforations that contain countless microscopic perforations - hardly visible to the naked eye and providing superior absorption qualities. Another design detail was the direction of the wood grain and veneer on each panel of the 1800 m^2 of cherry veneer that had to match perfectly. This required each 1200 x 600 mm panel to be numbered so that it could be installed in the correct position and place.

The microscopic nano-perforated panels have an acoustic value up to α_w: 0.95 compared to standard perforations, which achieve about α_w: 0.75.

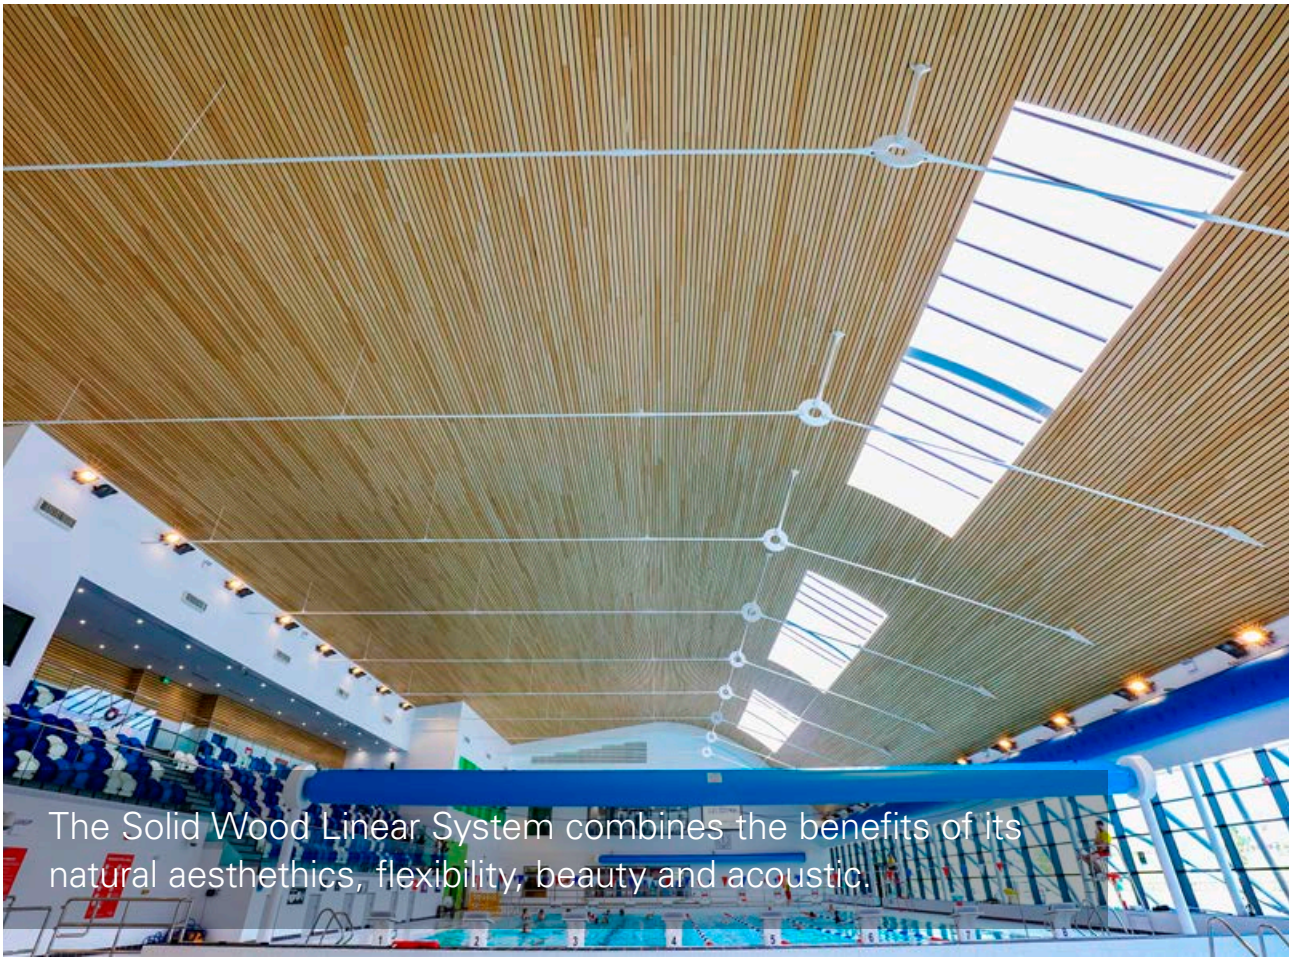
Architect: Dannatt Johnson Architects
Product: Solid Wood Linear

Project: Cluj Arena, Cluj-Napoca, Romania
Architect: Dico si Tiganas
Product: Veneered Wood Linear Ceiling and Wall Panels

WOOD SOLUTIONS



Project: Edenbrook Leisure Centre, Fleet, United Kingdom - Product: Solid Wood Linear, open - Architect: GT3 Architects

KEY FEATURES

- Interior applications
- Three ceiling solutions: Linear Open, Multi-panel & Linear Closed, fixed or 50% demountable
- Panel widths from 63 mm up to 184 mm
- Mixed length with a minimum of 900 mm, manufactured inclusive tongue and groove connection. Fixed length on request
- Panel thickness from 15 up to 20 mm
- Available in different modules and joint width
- With the multi-panel system various widths can be combined to create a dynamic look and feel
- Other sizes are available upon request
- The standard colours of the non woven tissue between the joint is black, white or grey. Other options on request
- Quick and invisible mounting according to a fixed pattern due to the specially developed fixing method
- Budgetary flexibility with over 15 wood species within various price categories
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible
- Special system coatings available for humid area application
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

Produced and certified by Derako International

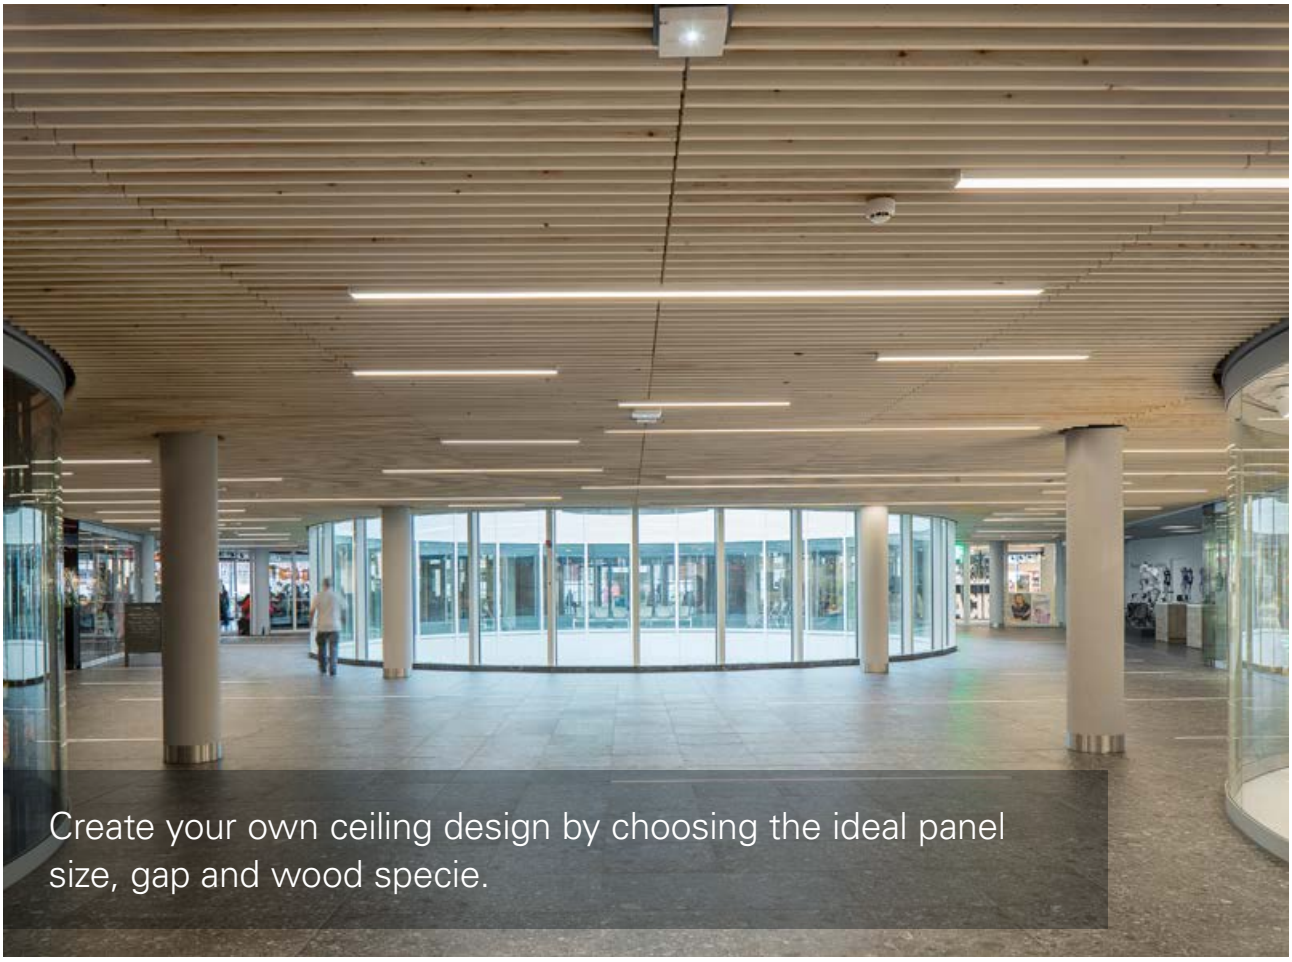
SOLID WOOD
GRILL



Project: Chirec LOT 23, Brussel, Belgium - Product: Solid Wood Grill system - Architect: Assar Architects

KEY FEATURES

- Interior applications
- Made to measure wooden ceiling solution. Design the sizes of the slats and the distance between the slats. Together this will form the Grill element
- The slat thickness can be between 15 mm and 35 mm, depending per wood specie.
- The slat height can be between 35 mm and 140 mm, depending per wood specie
- The distance between the slats can be 25 mm up to 140 mm
- The length of the assembled grill elements will be determined by the structural conditions. This can vary between 590 mm and 3590 mm, depending on the available raw material
- The Grill element is available with 12 mm or 20 mm metal dowel. The standard colour is black, other colours are on request
- Easily and individually demountable
- Budgetary flexibility with over 15 wood species within various price categories
- Optionally supplied with acoustic non woven tissue cut to size of the panel
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible. Also radial panels and CNC milled panels on request available
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

WOOD SPECIES AND FINISHES

An extensive range of wood species is available, ranging from deep warm colours to the light wood tones. Other types of wood possibilities can be looked at on request. Standard, the wood is finishes in a transparent varnish. Optionally a wide range of colour is available. The finish adds a nice touch to the wood with the natural tones and structures of the wood being maintained. For each application the right system coating is determined that is necessary to protect the wood.

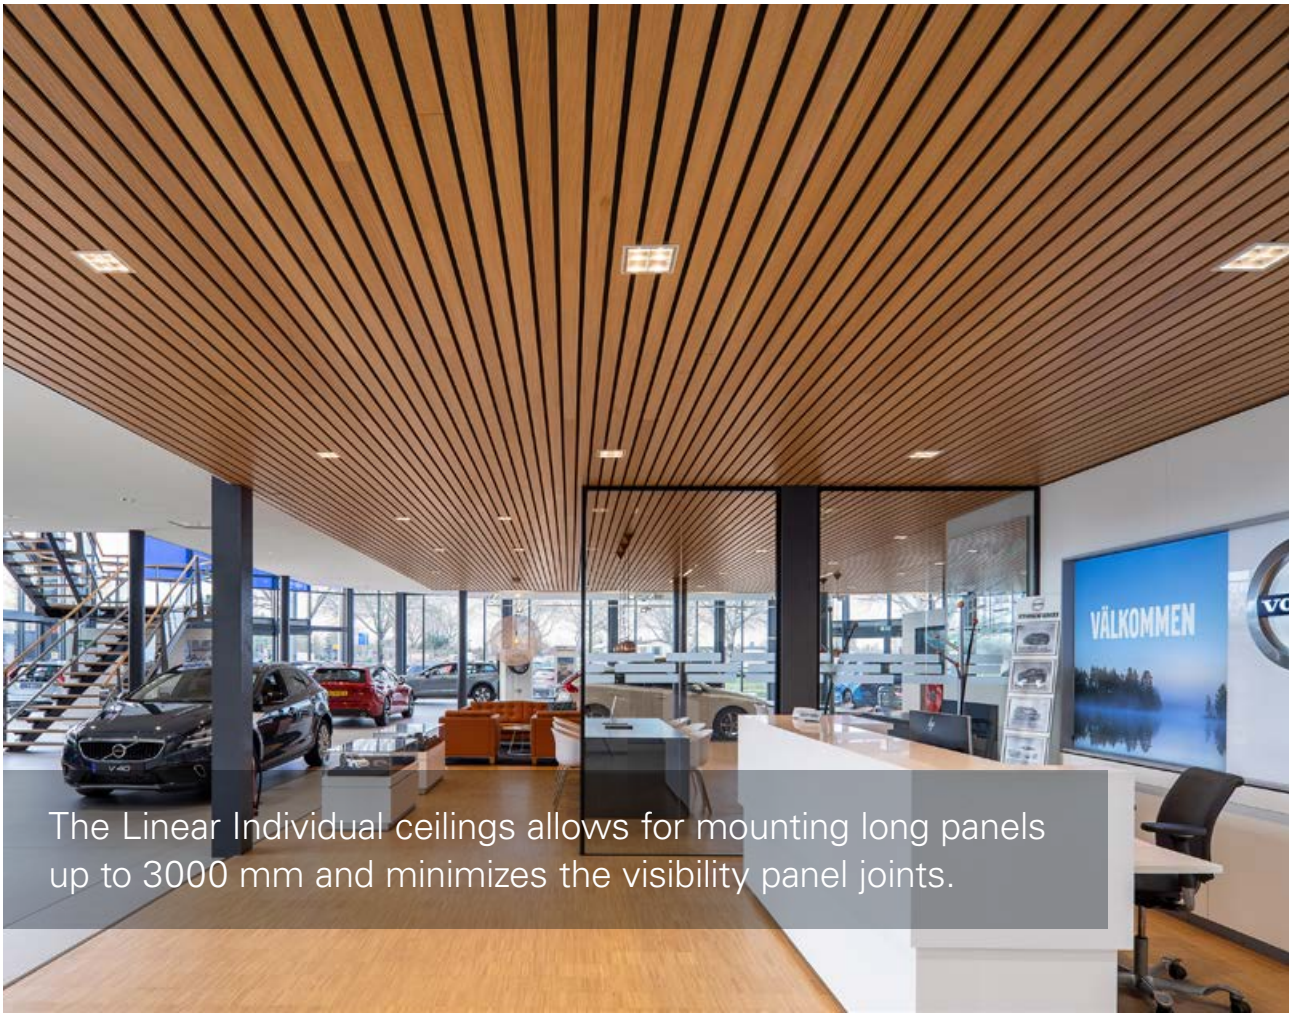
VENEERED WOOD
LINEAR INDIVIDUAL



The Linear Individual ceilings allows for mounting long panels up to 3000 mm and minimizes the visibility panel joints.

Project: Volvo Hooftman, Woerden, The Netherlands - Product: Veneered Wood Linear

KEY FEATURES

- Interior applications
- MDF core finished with wood veneer
- Multi-panel layouts possible, combining different widths
- Fire retardant and moisture resistant solutions
- Acoustic fleece to fill gaps
- Staining possibilities
- Available as wall solution
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Easy installation and demounting in standard T 24 grid
- Minimal joints between the panel connections
- Panel length: 1500 / 1950 / 2400 / 2700 / 3000 mm
- Panel width: 65 / 90 / 120 / 150 / 200 / 230 mm
- Joint width: 5 / 10 / 15 / 20 / 30 mm
- Panel thickness: 17 mm
- Other sizes and dimensions are available upon request

WOOD SPECIES

Hunter Douglas offers a wide choice of wood species and finishes. As wood is a 100% natural product, the images below can differ from actual samples or products. Please request a sample at your nearest sales office.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer types shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during his lifetime, making each veneer unique.

Birch

Spruce

Unsteamed Beech

Steamed Beech

Sycamore

Cherry

Ash

Basswood

Hemlock

Maple

Gaboon

Zebrano

Bamboo Natural

Pine

Oak

Pear

Walnut

Chestnut

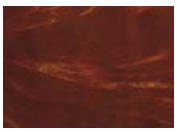
Yellow Poplar

Ayous

Red Oak

Bamboo Caramel

Teak



Sapeli Mahogany

Besides the wide range of Organic Veneers, Hunter Douglas also offers a selection of other finishes.

Engineered veneers
Engineered Veneer is a type of veneer that is known for their consistent appearance. Although Engineered Veneer is made from 100% wood, due to the special production process, a uniform look can be obtained.

High Pressure Laminate
Hunter Douglas works with some of the worlds leading HPL manufacturers. In most cases, we are able to apply HPL instead of veneer, to match other finishes in your project.

RAL Finishes
We offer the possibility to have the products finished in any RAL colour.

For more information, please contact your local sales office.

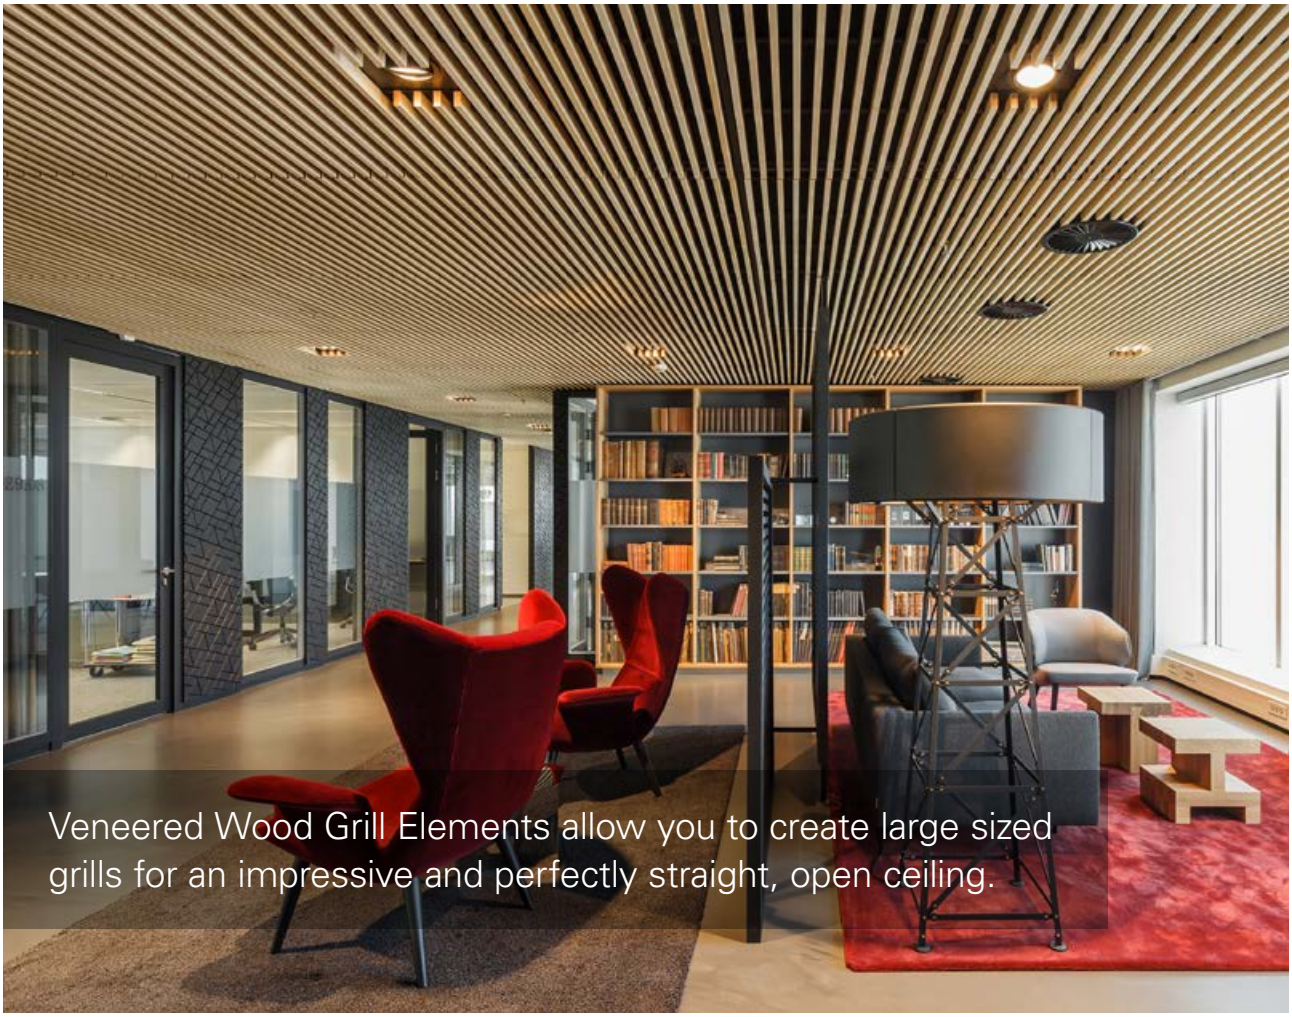
VENEERED WOOD
GRILL ELEMENT



Project: Maastoren, Rotterdam, The Netherlands - Product: Veneered Wood Grill - Architect: OTH architecten

KEY FEATURES

- Interior applications
- Pre-assembled grill elements connected with metal dowel
- MDF core finished with wood veneer
- Fire retardant and moisture resistant solutions
- Add acoustical wool for increase sound absorption
- Staining possibilities
- Available as wall solution
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Easy installation and demounting in standard T 24 grid
- Element length: 1200 / 1500 / 1950 / 2400 / 2700 mm
- Element width: varies between 300 to 500 mm
- Slat width: 17 / 25 / 31 / 39 mm
- Slat height: 55 / 62 / 81 / 104 / 143 mm
- Slat gaps: varies
- Other sizes and dimensions are available upon request
- Note: Grill dimensions may be restricted due to weight or may require a reinforced substructure

- Fire retardant and moisture resistant solutions
- Staining possibilities
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Easy installation and demounting in T 24 grid
- Semi-exposed edge detail
- Suitable for ceilings with limited plenum
- Dimensions: 600 x 600 / 1200 x 600 / 1800 x 600 mm
- Other sizes and dimensions are available upon request
- Perforations: Single / Double / Nano perforation

WOOD SPECIES

Hunter Douglas offers a wide choice of wood species and finishes. As wood is a 100% natural product, the images below can differ from actual samples or products. Please request a sample at your nearest sales office.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer types shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during his lifetime, making each veneer unique.

Birch

Spruce

Unsteamed Beech

Steamed Beech

Sycamore

Cherry

Ash

Basswood

Hemlock

Maple

Gaboon

Zebrano

Bamboo Natural

Pine

Oak

Pear

Walnut

Chestnut

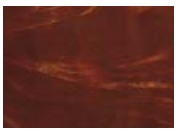
Yellow Poplar

Ayous

Red Oak

Bamboo Caramel

Teak



Sapeli Mahogany

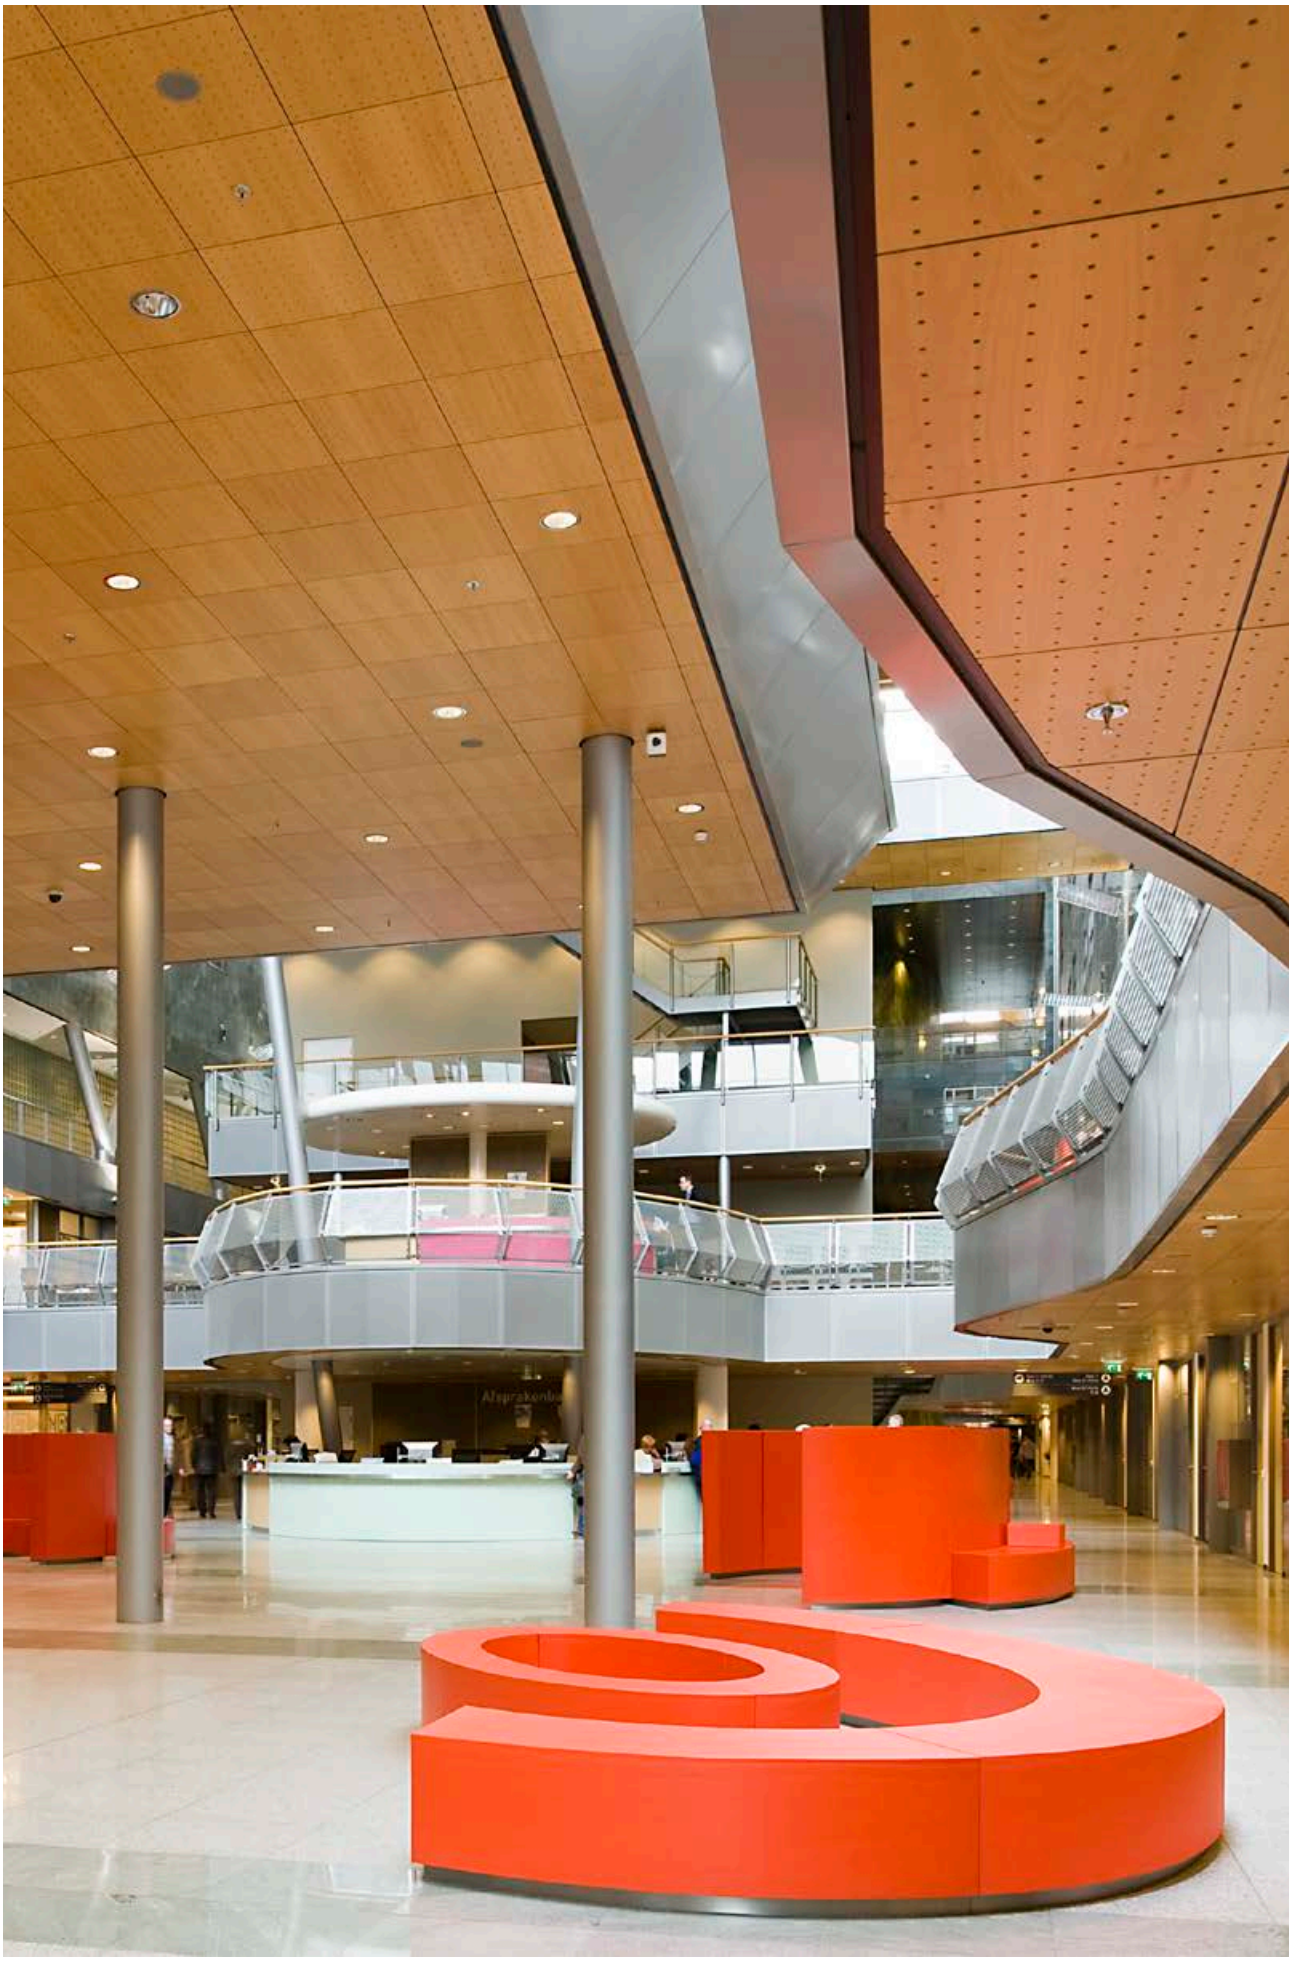
Besides the wide range of Organic Veneers, Hunter Douglas also offers a selection of other finishes.

Engineered veneers
Engineered Veneer is a type of veneer that is known for their consistent appearance. Although Engineered Veneer is made from 100% wood, due to the special production process, a uniform look can be obtained.

High Pressure Laminate
Hunter Douglas works with some of the worlds leading HPL manufacturers. In most cases, we are able to apply HPL instead of veneer, to match other finishes in your project.

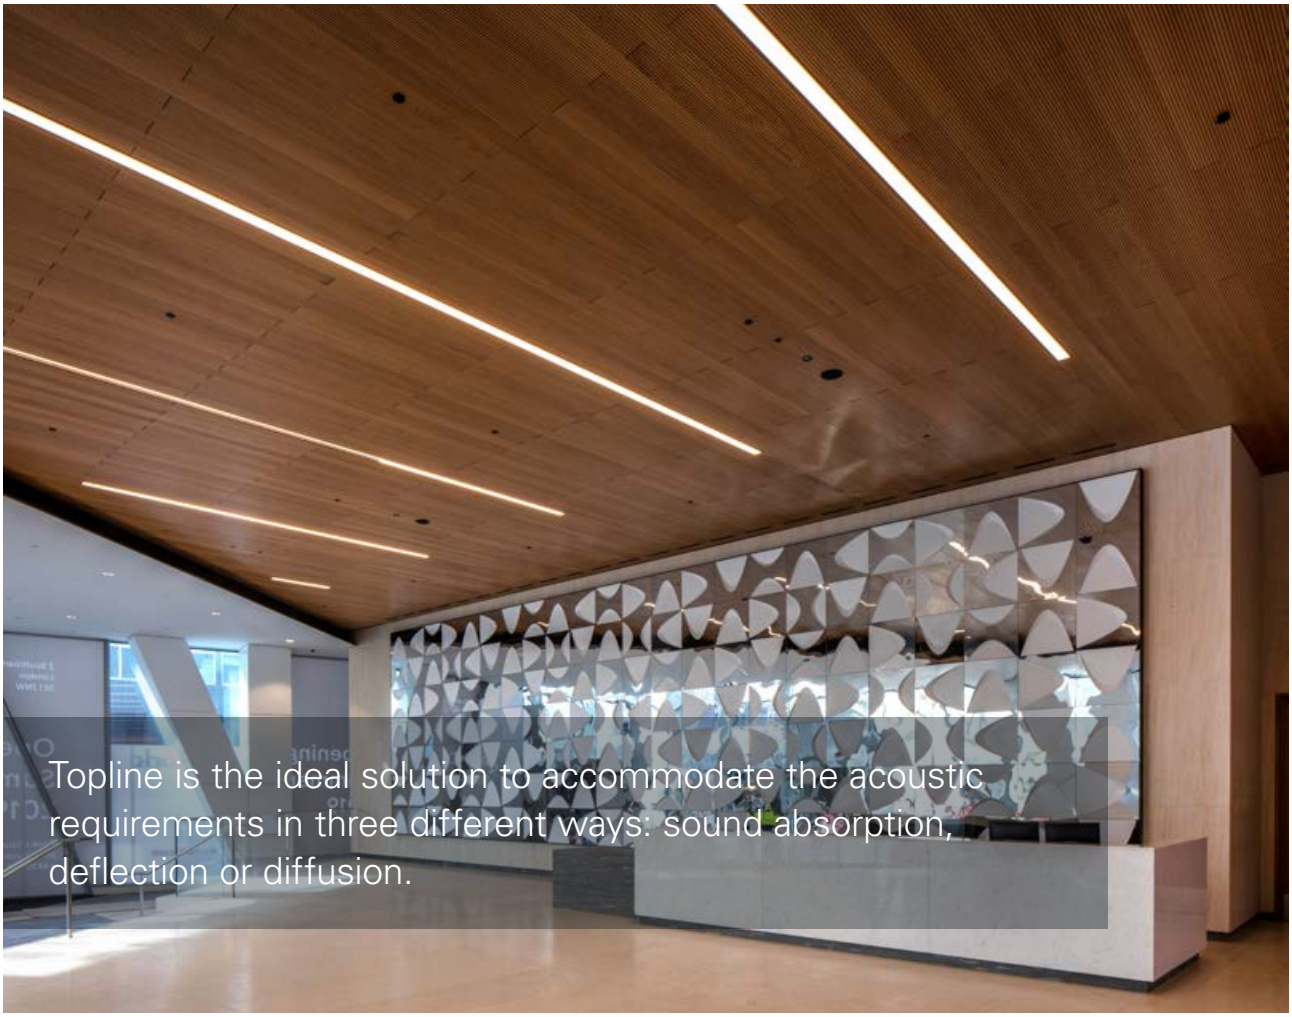
RAL Finishes
We offer the possibility to have the products finished in any RAL colour.

For more information, please contact your local sales office.



Project: Orbis Medical Centre, Sittard, The Netherlands - Product: Veneered Wood Ceiling (Classic Plus) - Architect: Bonnema Architecten

TOPLINE



Project: Southbank Centre, London, United Kingdom - Product: Veneered wood Topline - Architect: Kohn Pedersen Fox

KEY FEATURES

- Interior applications
- High performance sound absorbing panels
- Pre-applied acoustic non-woven material on reverse side
- MDF core finished with wood veneer
- Various slotted perforations with different acoustic performances and designs
- Fire retardant and moisture resistant solutions
- Staining possibilities
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Easy installation and demounting in standard T 24 grid
- Tongue and groove connection to create uniform appearance
- Various perforation designs and acoustical performance
- Panel length: 2400 / 2700 mm
- Panel width: 128 / 256 mm
- Panel thickness: 17 mm
- Other sizes and dimensions are available upon request

METAL WOODPRINT

Project: EKZ Mall, Liepziger Platz, Berlin, Germany - Product: Multi-Panel 30BD and 80B, Metal Woodprint - Architect: ARGE LP12

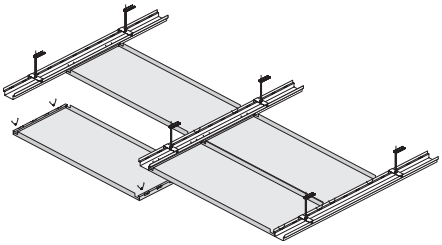
KEY FEATURES

- Interior applications
- Realistic wood designs available for our metal ceilings range
- Use the benefits of metal, with the looks of natural wood
- Direct print or transfer prints solutions
- Acoustic solutions available
- Also available for exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

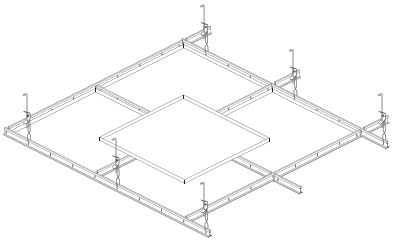
Project : Shopping Center Las Huertas, Palencia, Spain
Product : Multi-Panel 30BD, Metal Woodprint
Architect: B+R Arquitectos Asociados

WOODPRINT APPLICATIONS

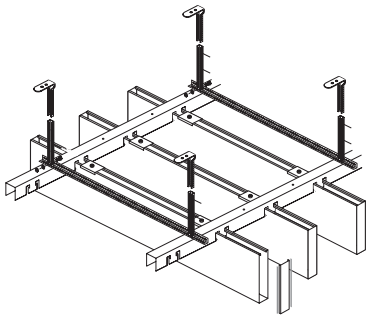
Woodprint finishes are available as standard for the following HunterDouglas® Metal Ceilings:



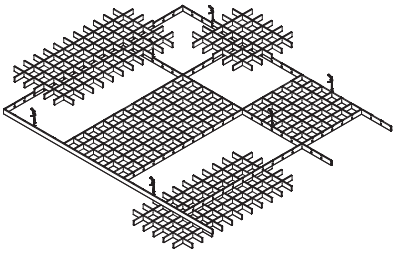
Planks (see page 88 - 115)



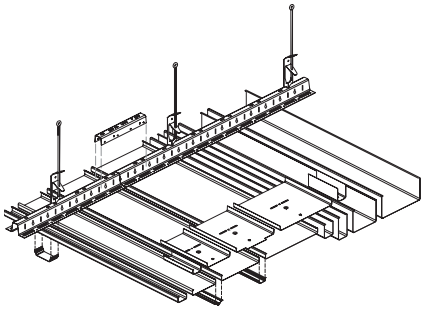
Tiles (see page 116 - 123)



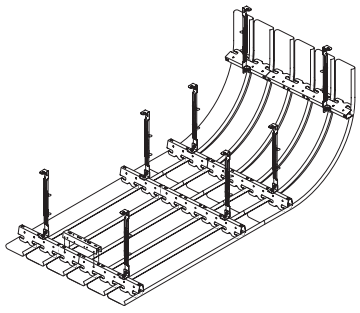
Baffles (see page 152 - 163)



Cell (see page 166 - 173)



Linear (see page 174 - 193)



Curved (see page 194 - 205)

COLOURS AND FINISHES

Hunter Douglas offers a wide choice of colours, wood prints and finishes, with different printing techniques. See our website for the most up to date information. The images are for illustration purposes only.

METAL CEILINGS

With a 60 year legacy of product innovation, our metal ceiling systems continue to lead in design, function and sustainability.

When the law firm AKD wanted to refurbish the 29th floor of its offices in Rotterdam's Maas Tower, the tallest building in the Benelux region, the architects took their inspiration from the dock yards of Rotterdam. The building, which sits on the banks of the river Maas, opened in 2010 and comprises two towers - the first being just over 164 metres high and the second tower, where AKD is located, is 108 metres high.

Project : Maastower, Rotterdam, The Netherlands
Architect: OTH Architects
Product : MultiPanel-BXD ceiling

"TWO STUNNING CEILINGS NOT LOOKING LIKE A USUAL OFFICE"

The new reception and conference centre, designed by OTH architects, features strong materials such as leather, dark wood and blue steel. This look has been complemented by two stunning Hunter Douglas Architectural ceilings. For the reception, corridors and waiting room areas, Hunter Douglas Architectural was specified to supply grill wood veneer in poplar, while the industrial-looking metal ceiling was also specified for the staff lounge and bar area.

Hunter Douglas Architectural worked closely with the installation contractor: "This was a special project for us, because it was the first time we got to experience the Multipanel BXD metal ceiling. It felt like a puzzle as there are lots of different measurements and we worked with the Hunter Douglas team to make sure our people understood how it should be installed. Preparation is key and there's no doubt that it's a very good ceiling that is well made and we're pleased with the result and how it looks."

Ferdinand van Dam, OTH architects, said: "Our client, AKD really challenged us to come up with an inspiring interior concept, not looking like a usual office, but more like a club or a lounge of a restaurant. "By creating the concept of 'dock yards of Rotterdam', we gave the space a specific raw identity, fitting both the building and location. The grill-like ceilings, in mismatched wood and dark metal, we found in the collection of Hunter Douglas Architectural complemented the desired look and feel of the interior really well, while providing a great acoustical quality to the space."

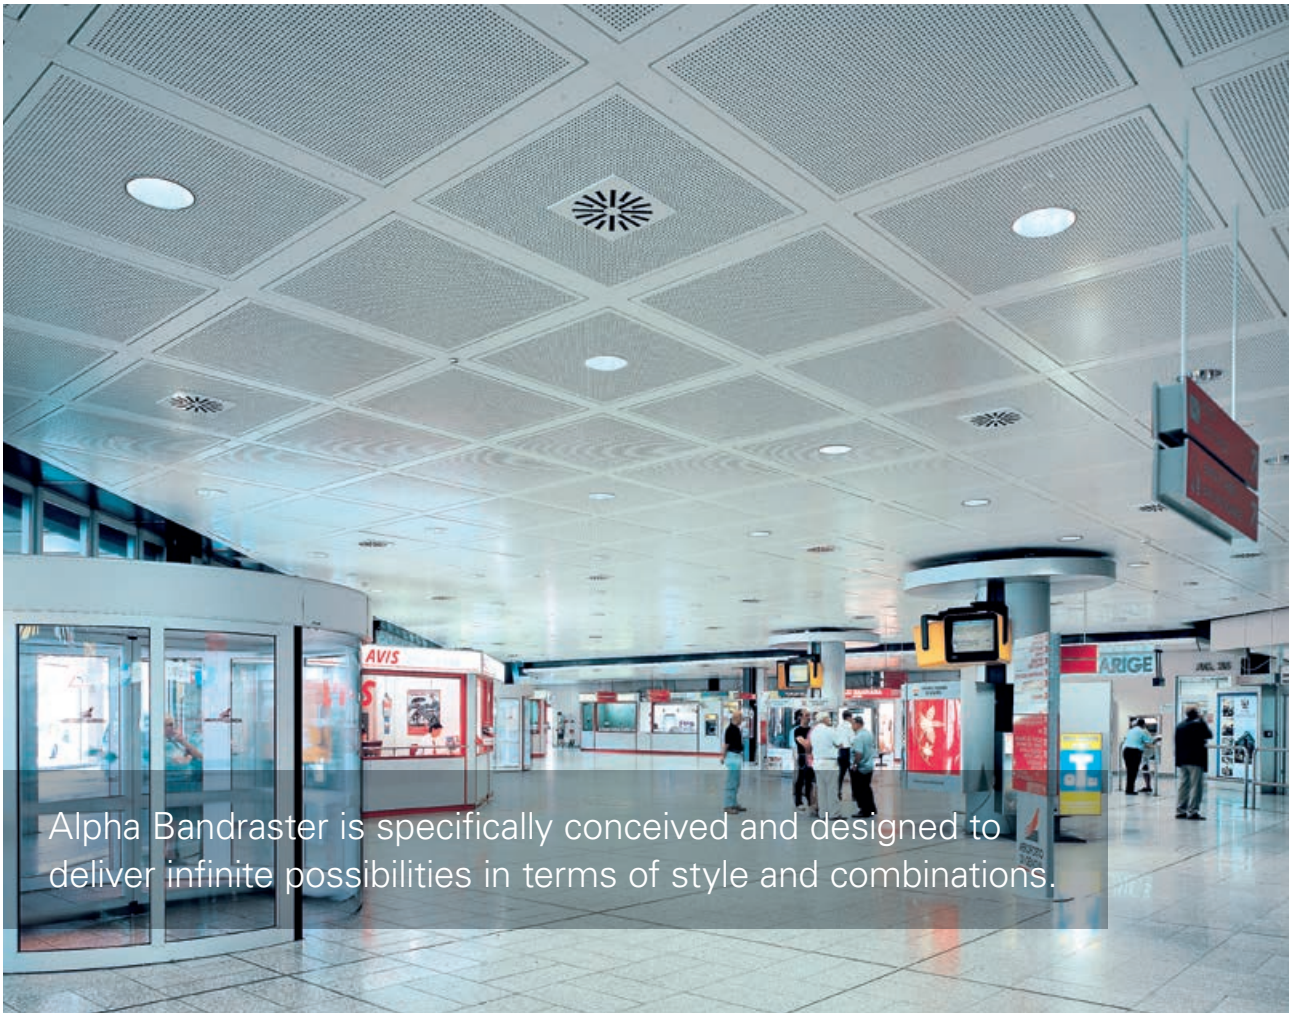
METAL CEILINGS

PLANKS

ALPHA BANDRASTER



Alpha Bandraster is specifically conceived and designed to deliver infinite possibilities in terms of style and combinations.

Project: Airport Genova, Genova, Italy - Product: Planks Alpha Bandraster

KEY FEATURES

- Panel sizes*:
  - Width: from 300 to 600 mm
  - Length: from 1000 to 2400 mm
- Square-edge design in parallel or cross design installation
- Perforated panels with non-woven tissue for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium or steel
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

PLANKS

BETA HOOK-ON ISOLA

Project: Centro Commerciale Top Center, Trento, Italy - Product: Planks Beta Hook-on Isola

KEY FEATURES

- Panel sizes*:
  - minimum 300 x 600 mm
  - maximum 800 x 2000 mm
- Square-edge design
- Perforated panels with non-woven tissue for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium or steel
- Hook-on feature allows point-access and 100% access to plenum
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

**For large dimensions contact our sales unit*

KEY FEATURES

- Panel sizes:
  - with reinforcement maximum 680 x 2800 mm (depends on mesh type)
- Flat sheets with welded reinforcement profiles
- Mesh panels with lay-on pads for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium or steel
- Hook-On feature allows point-access and 100% access to plenum
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

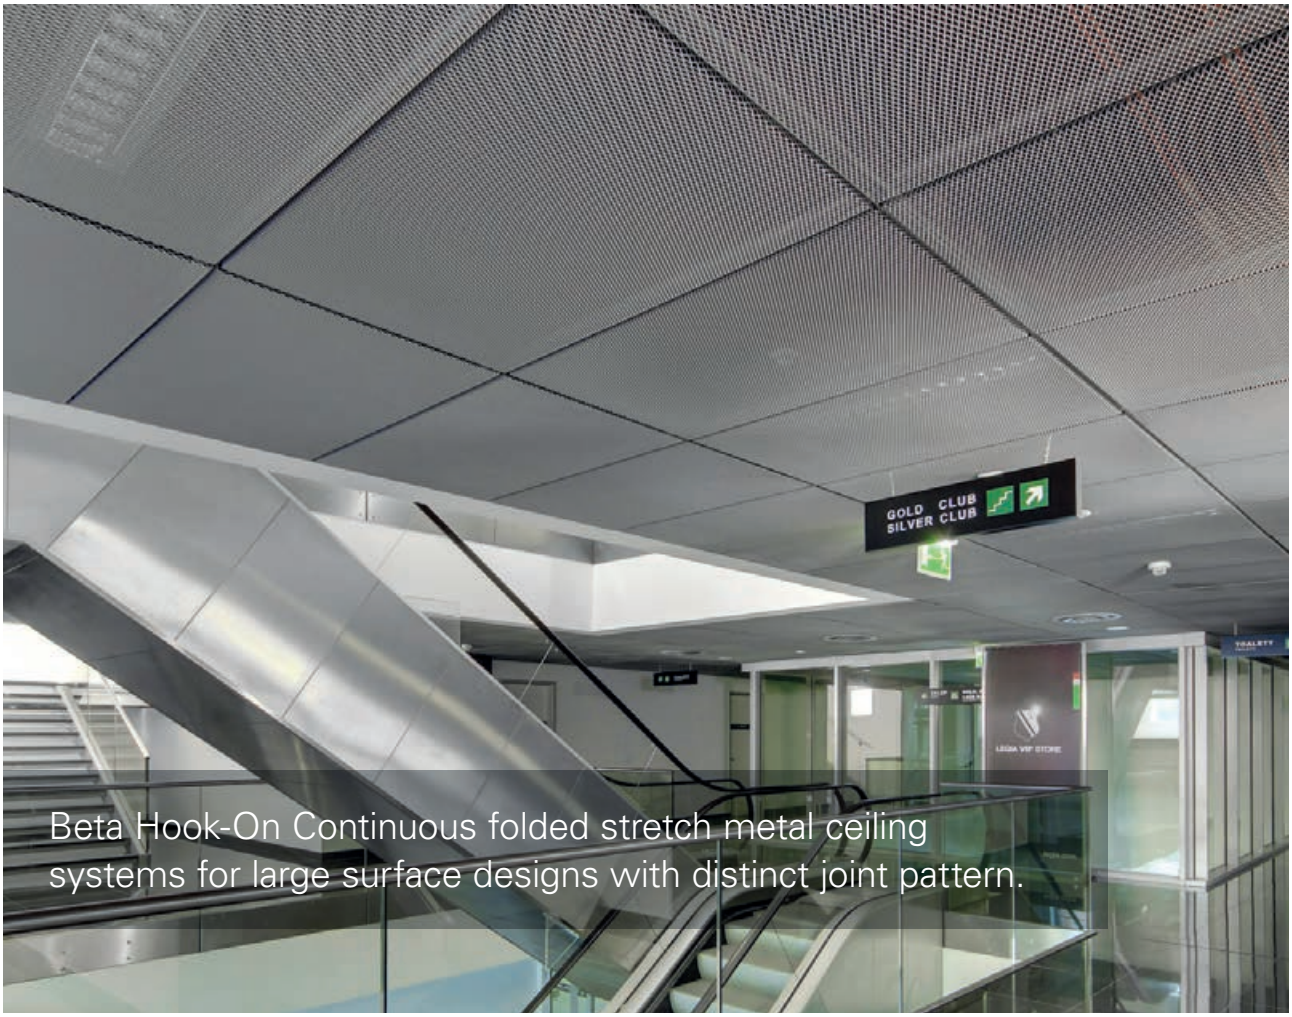
STRETCH METAL

BETA HOOK-ON CONTINUOUS - FOLDED



Beta Hook-On Continuous folded stretch metal ceiling systems for large surface designs with distinct joint pattern.

Project: Pepsi Arena Legia Football Stadium, Warsaw, Poland - Product: Stretch Metal Beta Hook-On Continuous - Folded - Architect: JSK

KEY FEATURES

- Panel sizes:
  - with reinforcement maximum 600 x 2800 mm
- Square-edge design
- Mesh panels with lay-on pads for acoustic control
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium or steel
- Easy installation - no fasteners or tools required
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

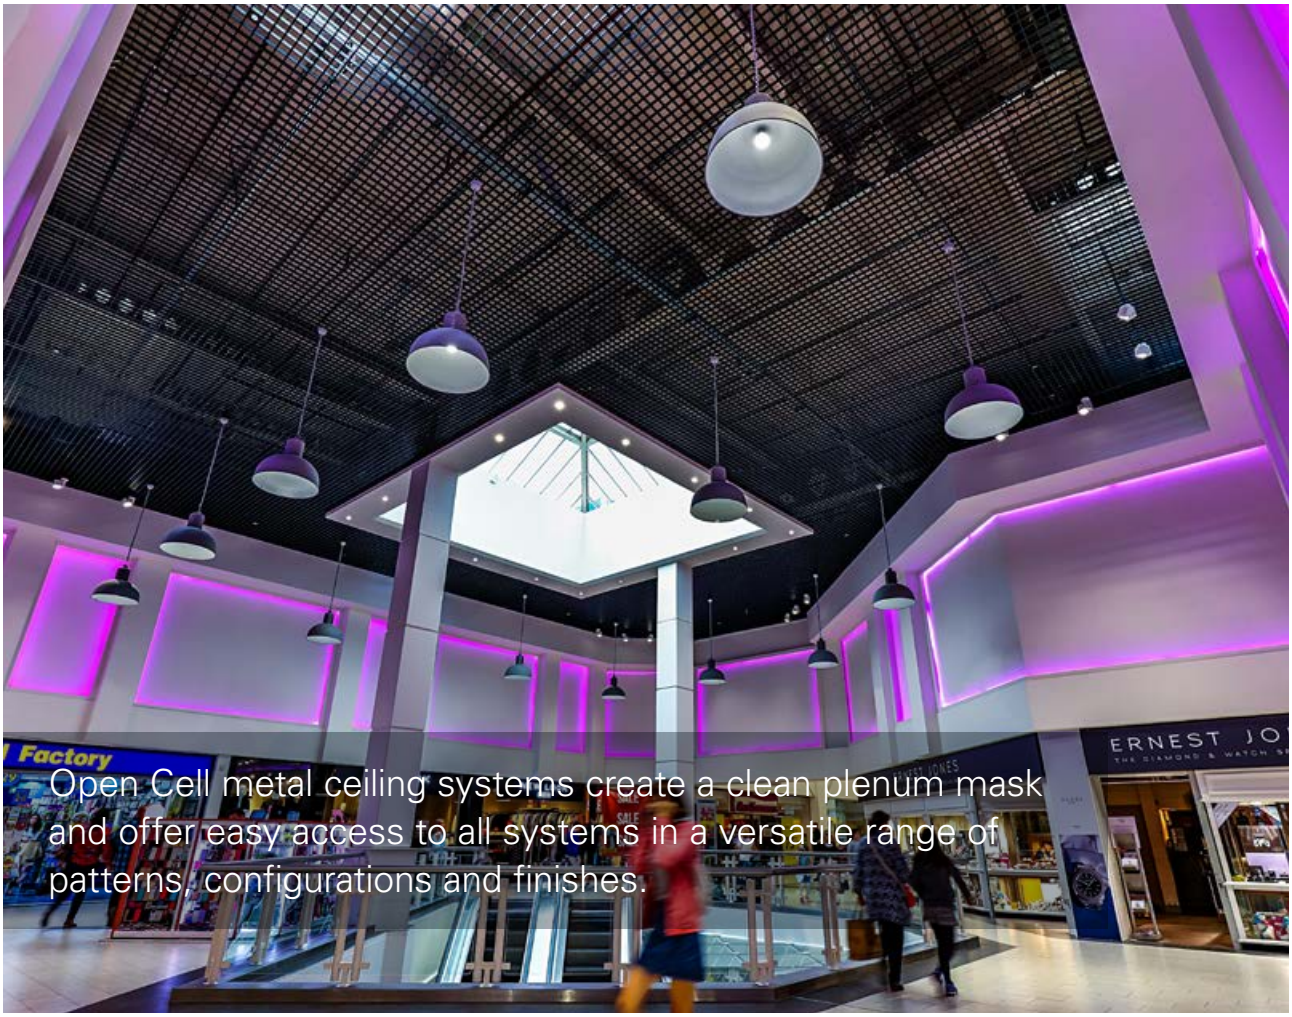
CELL 40/50/50E



Open Cell metal ceiling systems create a clean plenum mask and offer easy access to all systems in a versatile range of patterns, configurations and finishes.

Project: Darwin centre, Shrewsburry, United Kingdom - Product: Cell 40 - Architect: Chapman Taylor, London

KEY FEATURES

- Tile dimensions 600 x 600 mm and 600 x 1200 mm
- Profile heights: 40 and 50 mm
- Profile width 10 mm
- Standard modules 50, 60, 75, 86, 100, 120, 150 and 200 mm
- Other dimensions and modules available on request
- Bi-directional plenum mask
- Monolithic design with integrated support structure
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

Production by Hunter Douglas Ceiling Center

EN 13964 E1 | A+ | 92%

Curved Carrier metal ceilings create shaped designs with straight panels.

Project: Hotel Ambassador, Zermatt , Switzerland - Product: Linear 30BD Curved Carrier - Architect: Vogel Architekten

KEY FEATURES

- Panel width: 300 mm or 100 mm module
- Panel length: 800 - 6000 mm
- Segmented carrier: minium radius convex 5 m, concave 2 m
- Flexible carrier: minimum radius convex 600 mm, concave 400 mm (depends on panel type)
- Ceilings in concave, convex or ondulating
- On site waste reduction with factory fabricated dimensional material
- Easy plenum access
- Interior and exterior applications
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

PROJECT SOLUTIONS

At Hunter Douglas we are proud on the capabilities of our technical engineers. Their creative and technical skills are there to help you to deliver a ceiling system on even the most complex of building projects. Our knowledgeable consultants, BIM experts, and project engineers work on applications of every kind and will help design and specify sustainable materials, design integration of systems, and create a ceiling topography that gives every space its own personality.

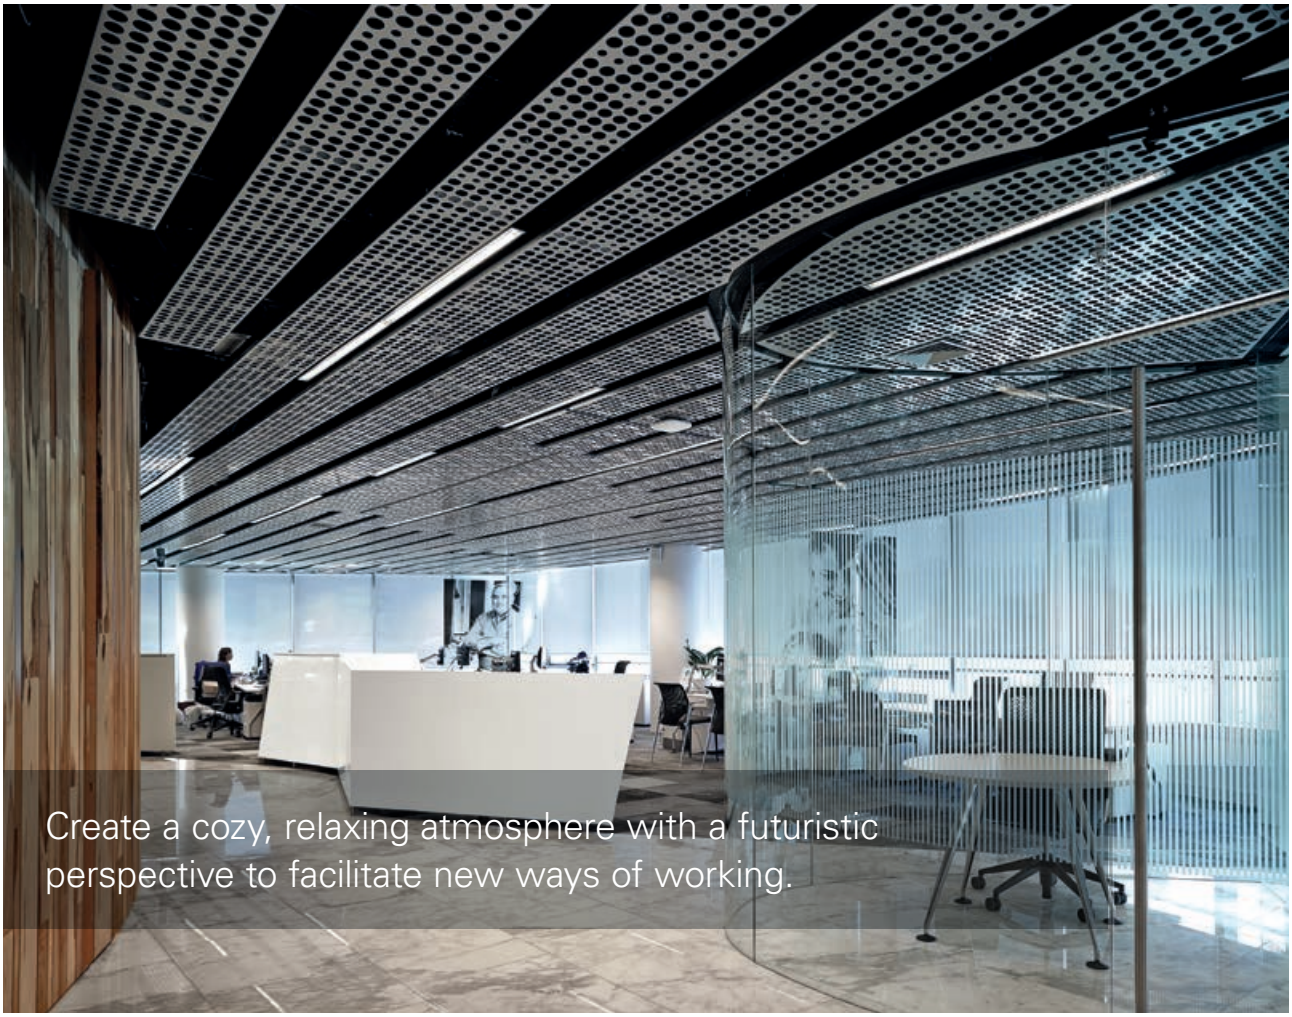
PROJECT SOLUTIONS



Project: Entel Office Building, Santiago, Chile - Product: Custom Wide Panel 300C/300L (Special perforation) - Architect: Sabbagh Architects

THE PROJECT

The design of a corporate building has a dual objective, represent the company's image today, and also the image it seeks to project into the future. It represents its present particular way of facing the world, its business culture; but also its future, that is, where it wants to go. In turn it must be understood and interpreted by both its regular users; part of the company, as the common public who come in for services.

In this sense, the great challenge was choosing the materials that would make up the design of the new corporate building of Entel and being able to create a cozy, relaxed atmosphere, to facilitate new ways of working. And at the same time transmit a modern high-tech image vanguard. Be sufficiently noble and essential to withstand the test of time and fashions.

The Wide Panel ceiling, in a modular width and variable length is ideal for applications in corridors, providing a monolithic look. It is a suitable metal indoor ceiling due to the system of profiles used in the installation. Perforated metal panels with acoustic fleece have a high sound absorption coefficient (α_w).

Project: Spoorzone Delft, The Netherlands - Product: Custom Baffle ceiling Architect: Benthem Crouwel Architects

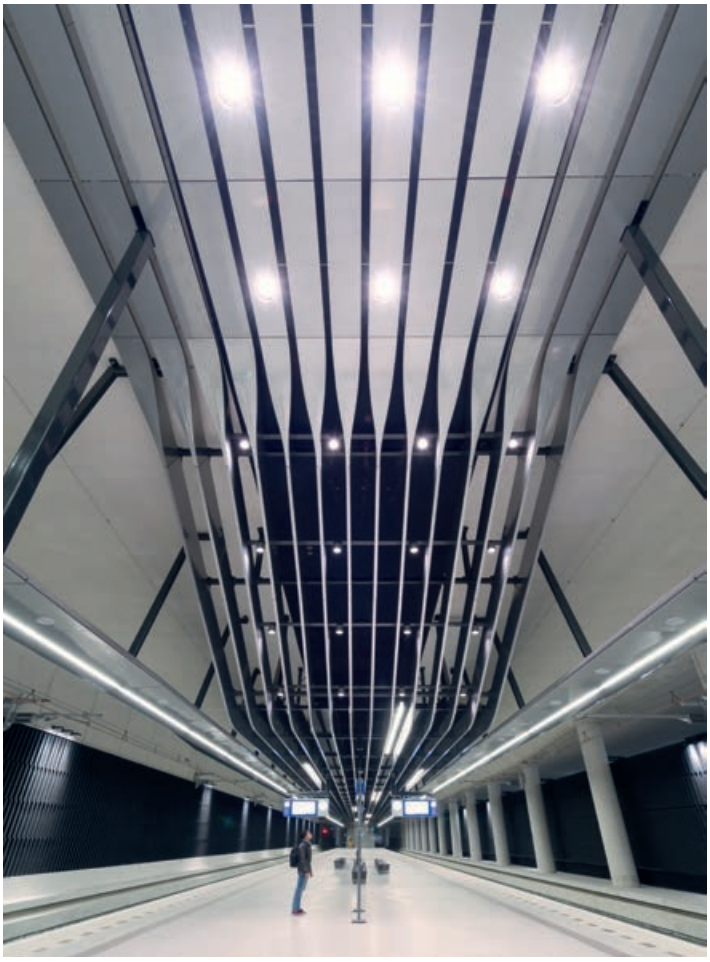
THE PROJECT

Hunter Douglas's expertise for complex projects is demonstrated in designing a logistically challenging - and eye-catching - ceiling for the platform in the new railway station in Delft, the Netherlands. Amsterdam's Benthem Crouwel Architects wanted the terminal to be uncluttered and well-lit and the design of the ceiling, particularly the baffles, played an integral role in this vision.

Combining hand-crafted and polished tapered baffles of extruded aluminium with a fixed, perforated baffle above the ceiling means optimal sound absorption and a reverberation time of less than one second. The baffles' exceptional light reflection, at 110 gloss units (2 layers), maximizes the output of the artificial lighting to be installed between the baffles.

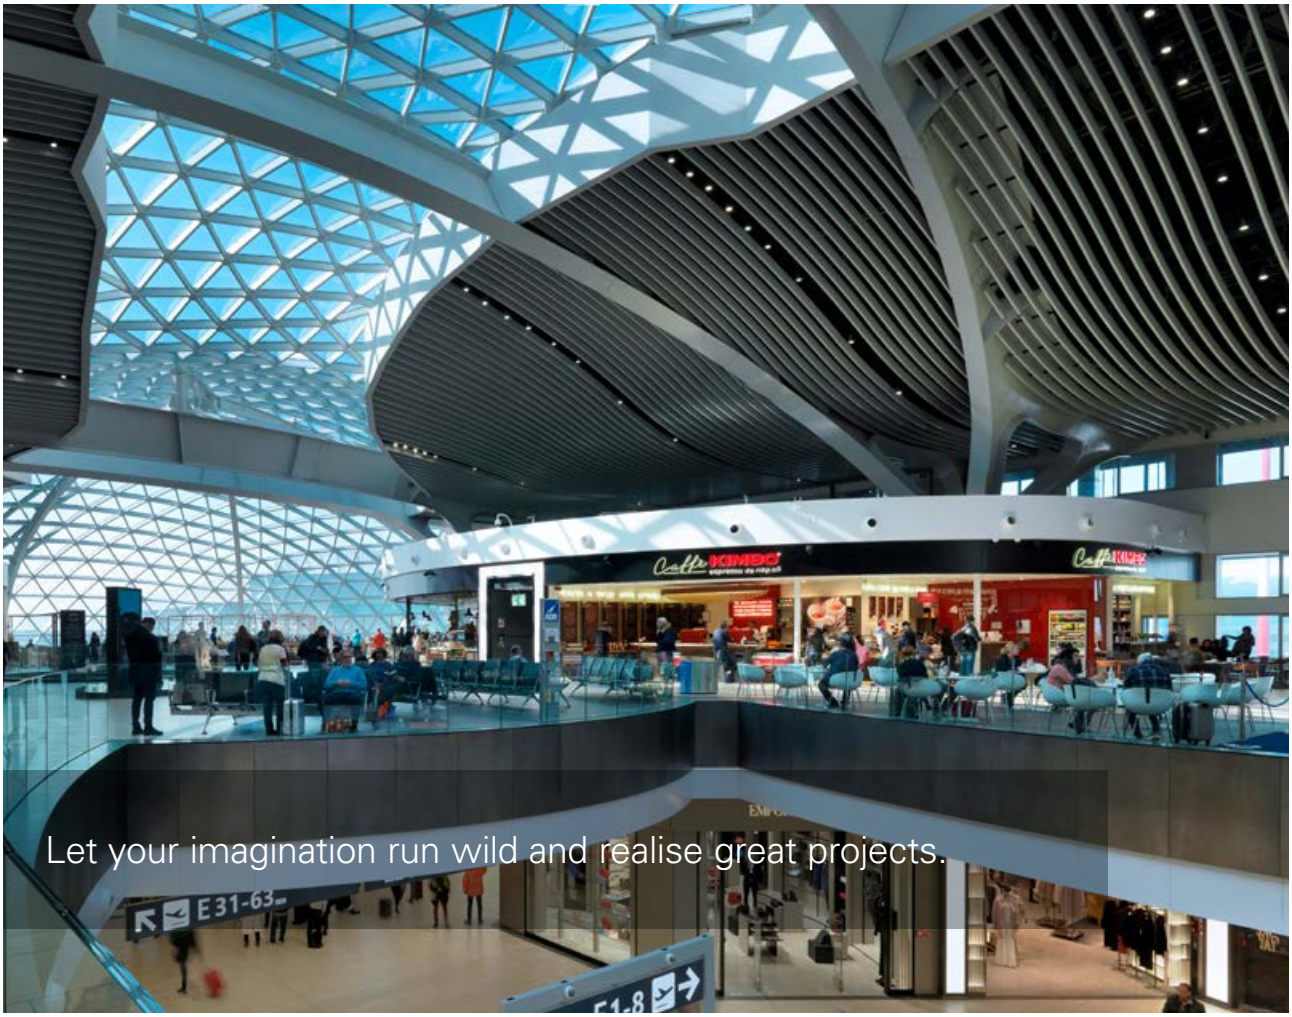
Production by Hunter Douglas Ceiling Center

EN 13964 E1 | A+ | 60%



A UNIQUE CUSTOM CEILING

The underground train station Delft is part of the complete redevelopment of the railway zone in Delft. The project includes among others a tunnel with underground station, parking facilities, new municipal offices, homes and offices, a park and water features. A unique ceiling which was realised by a close cooperation of Hunter Douglas and Benthem Crouwel Architects.



Project: Rome Fiumicino Airport Gate C, Rome, Italy - Product: Custom Baffle ceiling - Architect: The Design Solution, AdR, SPEA Engineering and Studio Muzzi

THE PROJECT

The refurbishment of Italy's Fiumicino airport in Rome has seen the design and specification of a vast sweeping ceiling canopy incorporating Hunter Douglas Architectural's Custom Baffle ceiling system. The ceiling canopy, which has been designed to let in great amounts of natural light, looks down on over 10.000 sqm of luxury retail outlets on the first floor and a 3.000 sqm Italian food and beverage street which also features Hunter Douglas Architectural's Custom Baffle system within the ceiling void.

Baffle ceilings are ideal for such environments creating atmosphere, increased spatial awareness and contribute to a highly efficient and comfortable acoustic environment. They have been specified on a number of major transport hubs around the world. Hunter Douglas Architectural experience with the Tavola™ Baffle ceiling has led us in designing this custom solution of a lightweight steel curved composite baffle. The convex and concave curved baffles emphasise the shape of the building. The opening in the ceiling flushes the space with natural daylight, crating a comfortable ambiance for the many travellers passing underneath.

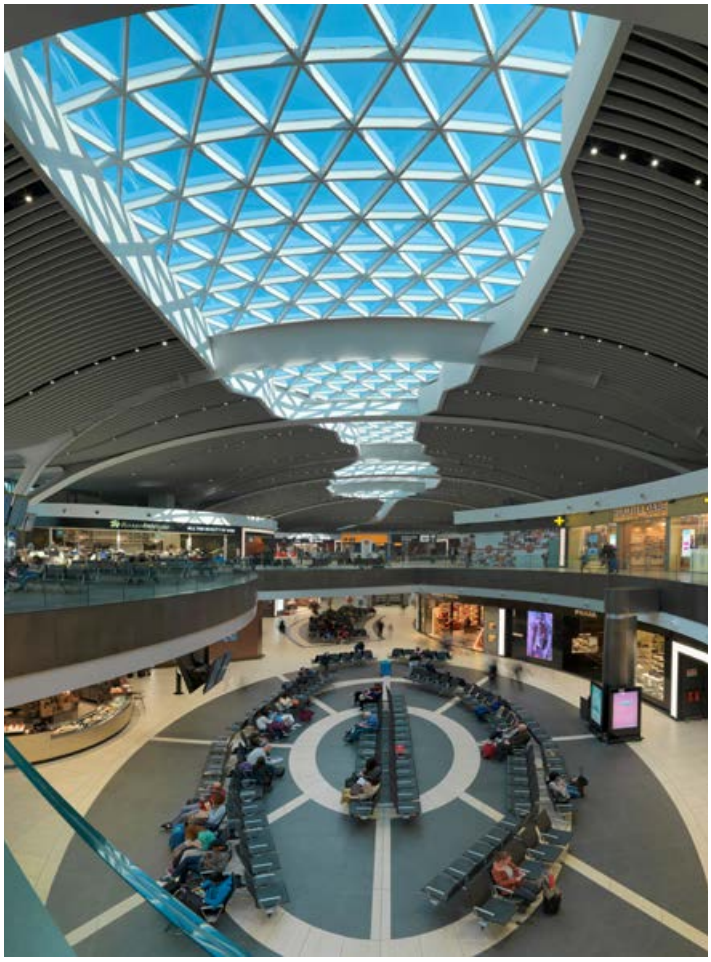
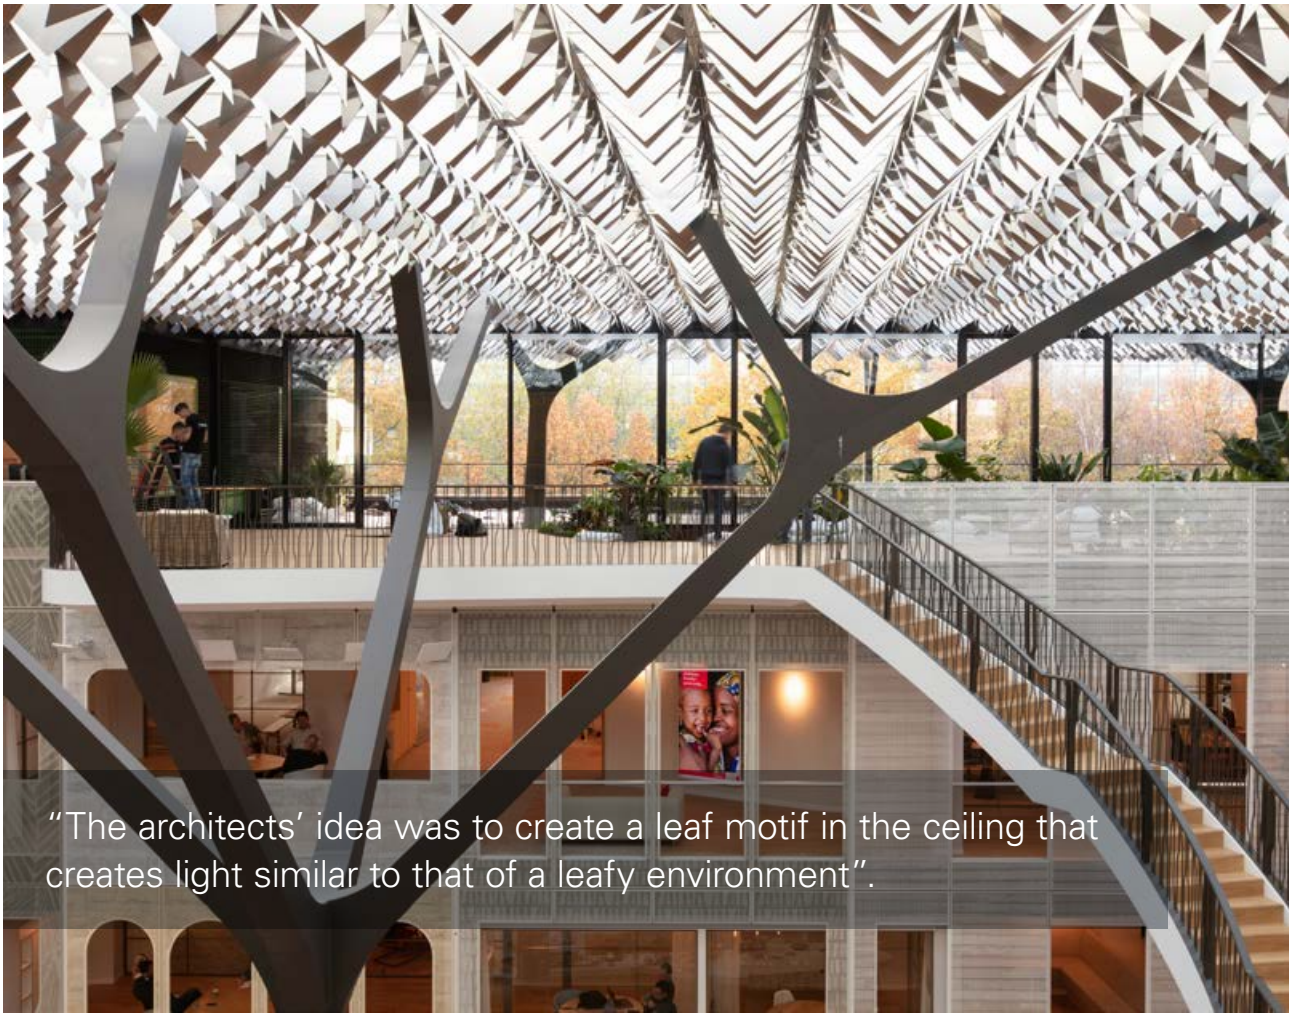
EN 13964 E1 | A+ | 60%





Project: Dutch Charity Lottery, Amsterdam, The Netherlands - Product: Custom Planks - Architect: Benthem Crouwel Architects

THE PROJECT

The offices of the Dutch Charity Lottery in the trendy Zuidas business district of Amsterdam are located in the most sustainably transformed office building in the Netherlands. The project was recently completed and has already gained iconic fame. The main reason is the striking leaf canopy that graces the atrium and forecourt at the entrance to the building. In addition to the eye-catching aesthetics, the canopy's architecture reveals high-quality technical innovations, developed by Hunter Douglas.

The office building was designed by architectural firm Benthem Crouwel of Amsterdam. Located on the Amsterdam's Beethovenstraat, the building has been awarded the highest possible sustainability label: BREEAM Outstanding. The certificate is related not just to the sustainability aspects of the design, but also to sustainable choices made during the construction process. The way in which the atrium and entrance ceiling were designed and installed is an important part of this. "The architects' idea was to create a leaf motif in the ceiling that filters light similar to that of a leafy environment". "Both inside and outside, the steel columns of the supporting structure have the irregular shapes of trees and branches. A canopy-like ceiling was the obvious next step. Hunter Douglas designed and produced a flat ceiling, using a total of 3,500 square meters of roof panels, and making sure the inside and outside panels had the same dimensions. The panels consist of tiles of 650 mm by 650 mm, fixed to an aluminium profile.

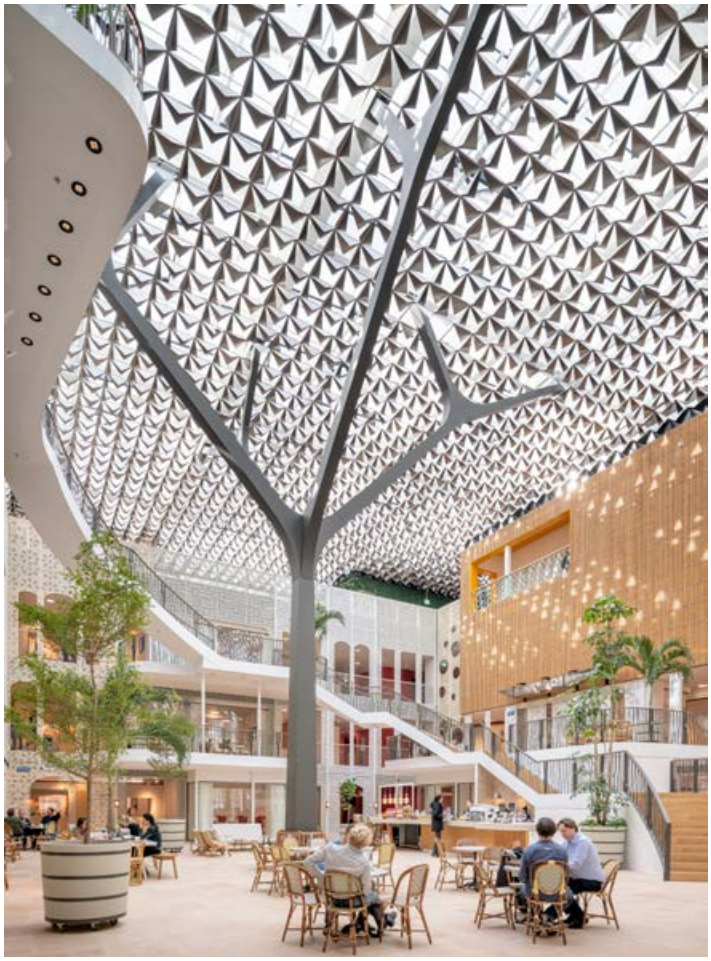
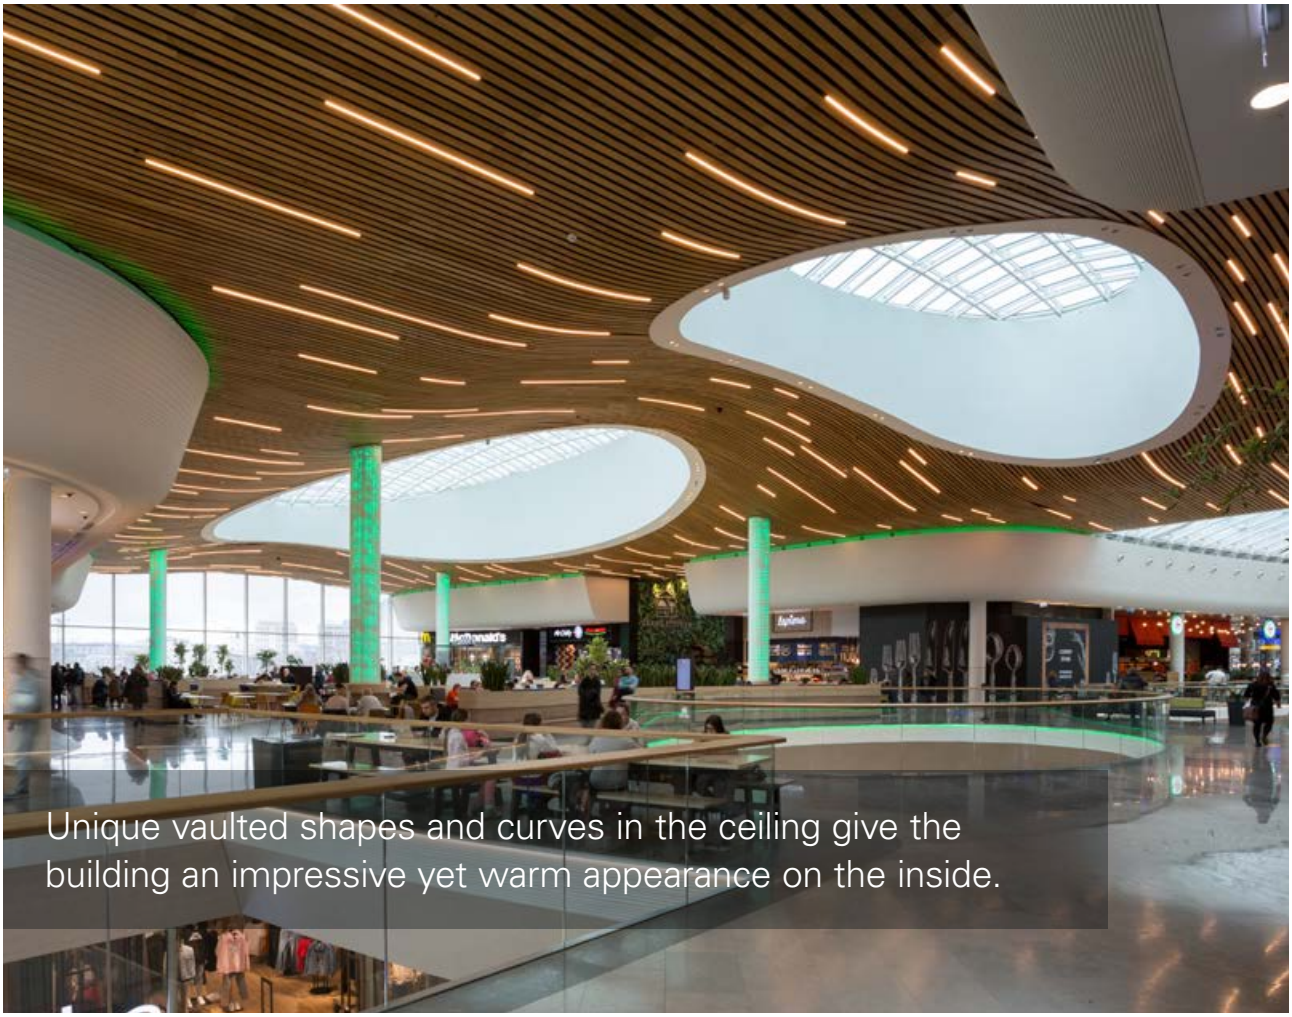
SPECIAL LIGHT

The design is based on four triangular leaves folded down in different angles. The sets of four leaves were fixed to the ceiling with 58 different types of mounts to form one big, complicated puzzle. The corners of the panels move like leaves. No two profiles are the same, which produces a very special kind of lighting.





Project: Wroclavia shopping mall, Wroclav, Poland - Product: Solid Wood Linear ceilings and walls, Veneered Wood Grill systems - Architect: IMD Asymetria

THE PROJECT

The Wroclavia Shopping Centre was recently completed in Wroclaw, Poland. This beautiful shopping center, developed by Unibail-Rodamco, has the solid wood linear system in which the wood slats are curved in a special way. This made unique vaulted shapes and curves in the ceiling possible, which give the building an impressive yet warm appearance on the inside. The veneered wooden grill ceiling system has also been installed in other areas of the shopping center and give the project a nice appearance en ambiance.

During the design and construction phase, everything was geared towards sustainability, using natural shapes and materials. From this principle, the architect IMD Asymetria created a unique and welcoming atmosphere, in which humans and their experience are the central focus.

A specially designed wooden ceiling runs through the entire shopping centre in an undulating motion following the contours of the shell. From the design vision, which required natural materials and shapes combined with a BREEAM certification, the solid wood linear naturally curved system was chosen. By making technical adjustments to the product itself and the support system, it's possible to shape the wood of the slats in a natural way.
Unlike standard curved ceilings and walls, where the slats are straight and the support system is curved, the curve in this implementation of the linear system comes directly from the wood itself. This adds an extra dimension with which very special organic and never-before-seen shapes can be achieved.

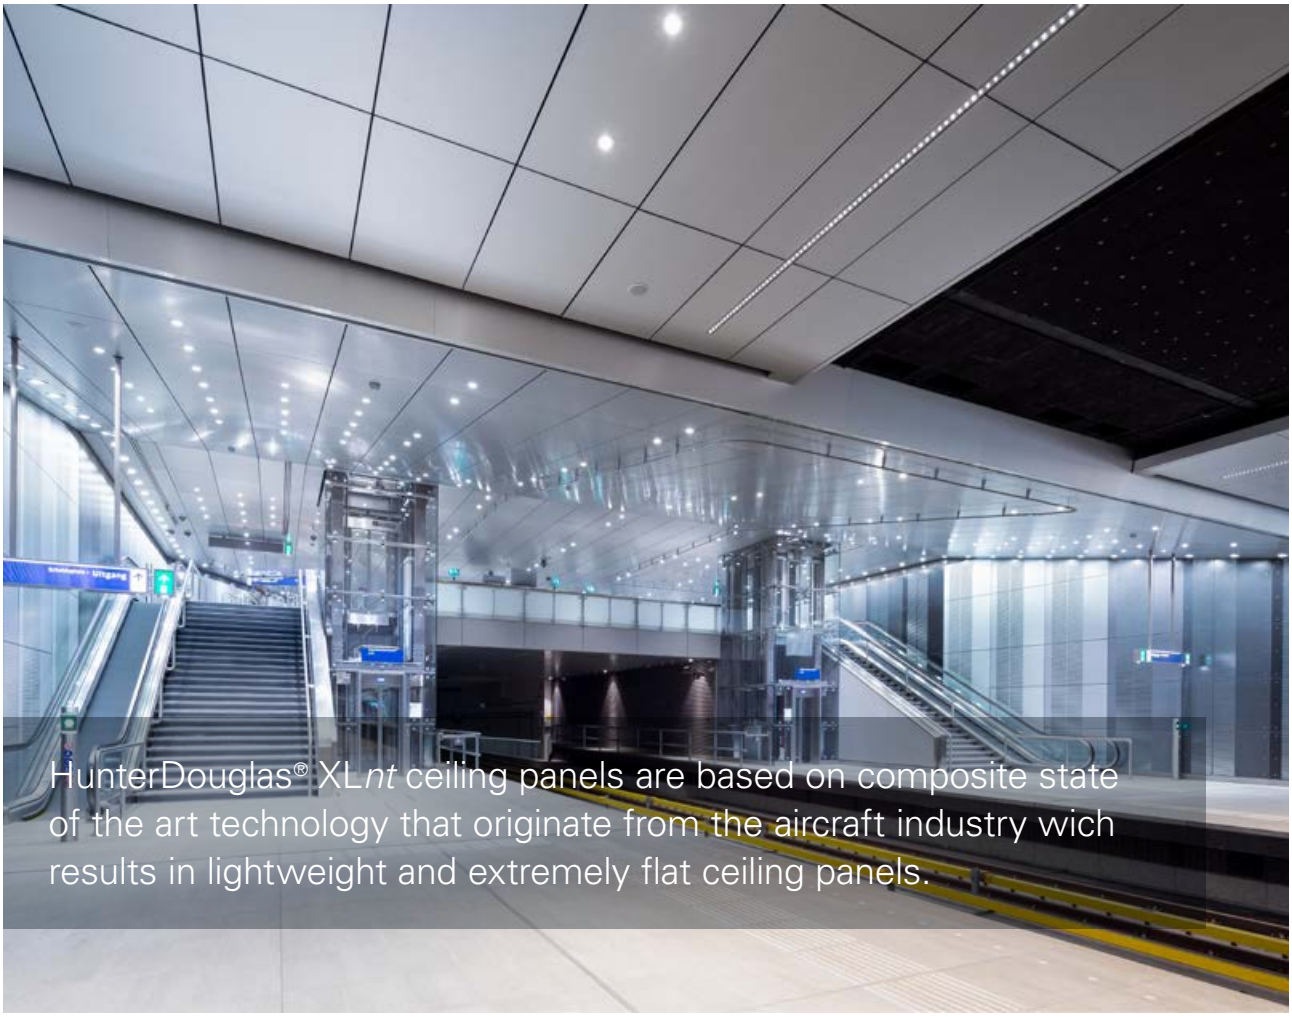
A UNIQUE CUSTOM CEILING

The solid wood linear system, with a C2C silver certification, is mounted on a special support system of rails and clips according to a fixed template. This fastening is located on the back of the system and is invisible. The linear system is especially suitable for spaces with acoustic requirements. Thanks to a wide range of wood types, system types, sizes and finishes, there are many possibilities for the construction of your ceiling or wall with the desired appearance.



Project: North-South metroline, Amsterdam, The Netherlands - Product: XL Acoustic panels XLnt (Swing-Down) - Architect: Benthem Crouwel Architects

THE PROJECT

The Amsterdam metro North/South Line trajectory is constructed between the stations Amsterdam-Noord (North) and Amsterdam-Zuid (South). This required laying tubes beneath the historic central area of Amsterdam and erecting eight stations; three above ground and five below.

To get enough daylight in the underground areas, as is characteristic for all the underground stations, reflecting walls and ceilings are integrated in the design. Therefore Hunter Douglas created aluminium panels with a high reflective value of 82 percent. In order to improve the acoustics, the ceiling panels are perforated.

OVERVIEW AND UNIFORMITY

The new interchange hall at Amsterdam Central station was one of the first parts of the North/ South Line that was put in use. The underground area is accessible via three different entrances at the station square. Passengers can change in this hall from/to the existing East Line, the new metro line, as well as the train station.

The ceiling in the interchange hall consists of uniform, rectangular panels of 180 x 90 cm, that are placed in the running direction. These large panels contribute to overview and uniformity, so the travellers can easily orientate themselves.

EXTERIOR CEILINGS

Offering a wide range of design possibilities, exterior ceilings have been developed with the same appearance as the range of HunterDouglas® interior ceilings.

NINEPOLIS

Project : Kinepolis, Braine, Belgium
Architect: Espace architectes
Product : Exterior wide panel

"AN IMPRESSIVE ENTRANCE WITH A NEW AND MORE MODERN LOOK"

A popular cinema complex in a Belgium municipality has undergone an extensive transformation, with a high-performance Hunter Douglas Architectural exterior metal ceiling creating an impressive entrance.

Kinepolis was keen to update its 10-screen cinema theatre in Braine and as part of the modernisation, 600 m² of Luxalon® 300C exterior ceiling was specified. Ideally suited for large, open spaces, the 300C ceiling is made from lightweight, corrosion-resistant aluminium alloy, yet is extremely robust, having been tested for wind load resistance.

Paul Eeckhout, of Kinepolis, said the cinema chain had used Hunter Douglas products in previous locations and knew that it could rely on the quality and aesthetics.

"The main entrance and the look of the complex were outdated. In order to create a new and more modern look to the building, the decision was taken to add a pentroof," he said.

"This also increases the comfort of our visitors, as it acts like a rain shelter. It was also designed to have lights placed randomly in the ceiling, creating a 'stars' sky. The collaboration with Hunter Douglas was excellent, with technical support on issues such as wind stability provided."

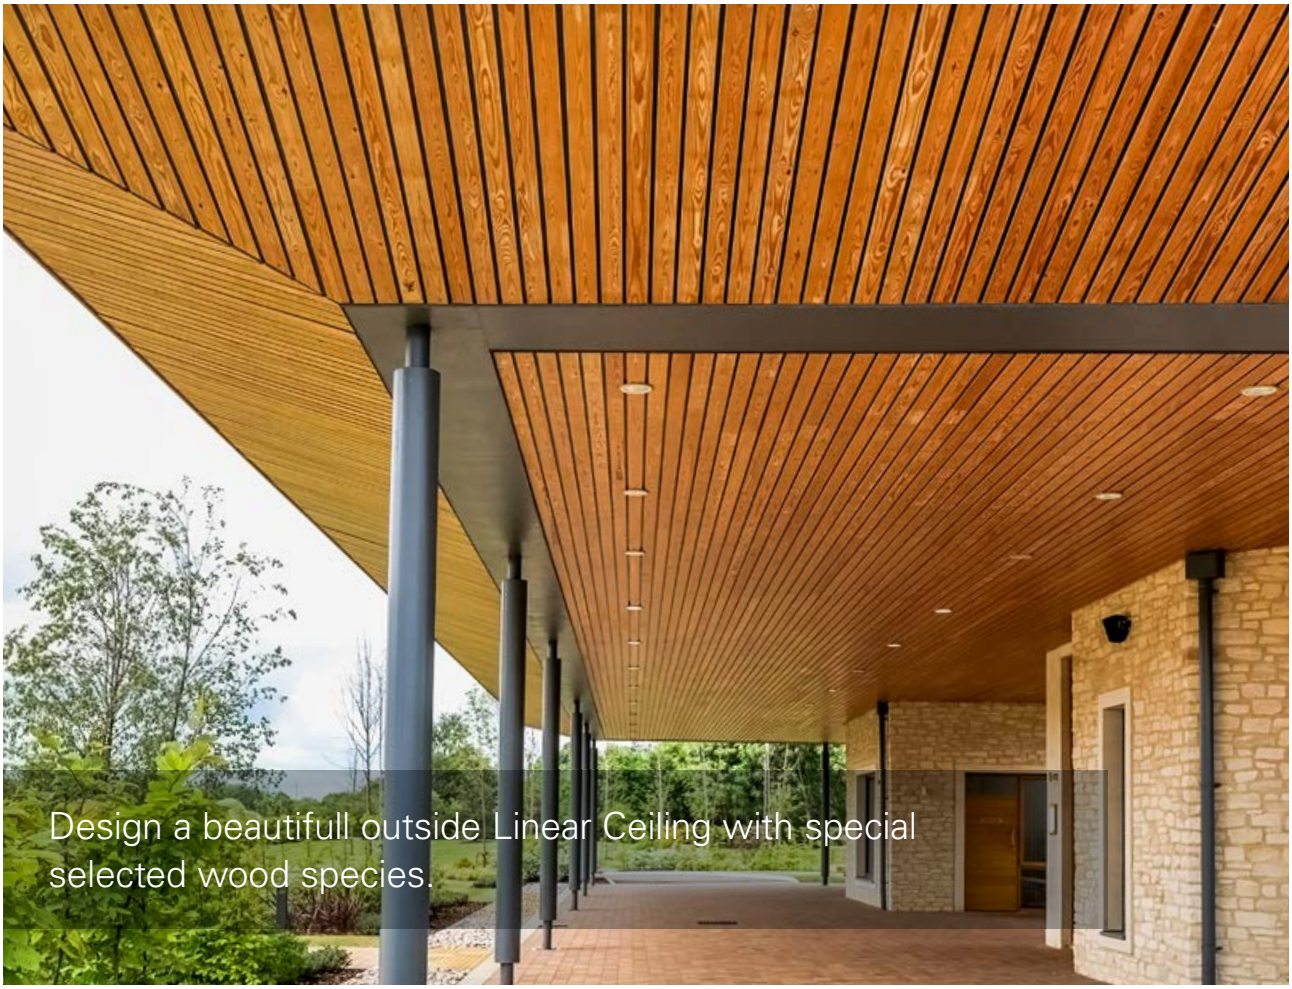
EXTERIOR CEILINGS



Project: Crematorium, Aylesbury, United Kingdom - Product: Solid Wood Linear, Exterior - Architect: na

KEY FEATURES

- Exterior applications
- Two outside ceilings solutions: Linear open & Multi-panel system
- Panel widths from 70 mm until 116 mm, depending per wood specie
- Mixed length with a minimum of 900 mm, manufactured inclusive tongue and groove connection. Fixed lengths on request
- Panel thickness from 15 mm up to 20 mm
- Available in different modules and joint width
- For outside application the joint between the panel will be covered with a special Ultra Fiber black glued and stapled
- With the multi-panel system various widths can be combined to create a dynamic look and feel
- Other sizes are available upon request
- Quick and invisible mounting according to a fixed pattern due to the specially developed fixing method
- Budgetary flexibility due over 13 wood species within various price categories
- High-quality finishing specially for outside apllication against moisture, dust and dirt. Transparent or wide range of colours available
- Curved and undulating shapes possible
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

KEY FEATURES

- Exterior applications
- Made to measure wooden ceiling solution. Design the sizes of the slats and the distance between the slats. Together this will form the Grill element
- The slat thickness can be between 15 mm and 35 mm, depending per wood specie.
- The slat height can be between 35 mm and 120 mm, depending per wood specie
- The distance between the slats can be 25 mm until 140 mm
- The length of the assembled grill elements will be determined by the structural conditions. This can vary between 590 mm and 3590 mm, depending on the available raw material
- The Grill element is available with 12 mm or 20 mm metal dowel. The standard colour is black, other colours are on request
- Easily and individually demountable
- Budgetary flexibility due over 13 wood species within various price categories
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

WOOD SPECIES AND FINISHES

An extensive range of wood species is available, ranging from deep warm colours to the light wood tones. Other types of wood possibilities can be looked at on request. Standard, the wood is finishes in a transparent varnish. Optionally a wide range of colour is available. The finish adds a nice touch to the wood with the natural tones and structures of the wood being maintained. For each application the right system coating is determined that is necessary to protect the wood.

PROTECTED BY LUXACOTE®

Luxacote® is a unique treatment for Luxalon® Exterior Ceilings.

Unprecedented Protection
LUXACOTE®
for exterior application

Proprietary Hunter Douglas' Luxacote® makes exterior ceilings extremely durable, providing colour and gloss stability, high scratch resistance, and resistance to corrosion. With Luxacote®, there is no need to recoat, which reduces maintenance costs and additional environmental impact.

Luxacote® protects the aluminium surface from corrosion and permanently anchors the paint to the metal surface. It contains highly colour-stable pigments for optimal colour-fastness and a highly scratch- and wear-resistant surface.

Architect: HPP
Product : HearFelt® linear Wall

"A VISUALLY ATTRACTIVE AND ACOUSTICALLY EFFECTIVE WALL"

The food court of the largest shopping centre in Germany features a wall of Hunter Douglas Architectural's innovative and award-winning HeartFelt®.

CentrO Oberhausen in Oberhausen, North Rhine-Westphalia, underwent an extensive refurbishment, which included a restructure of the food court - taking it from one to two storeys - to house about 20 restaurants and accommodate 1300 people.

The vision was to enhance the comfort of the space and Hunter Douglas Architectural recommended the world's first modular and linear felt ceiling and wall system to architect Robert Bönsch, of Cologne-based HPP because he was keen to provide a visually attractive wall covering for the large seating area on the second floor.

The challenge was to create an acoustically effective wall cladding on a rounded wall. When HeartFelt® was introduced as a wall system, we devised a solution specifically for curved walls, so it is ideal for this setting.

Hunter Douglas supplied HeartFelt® linear panels in various shades of grey, in 70 mm module and panel dimensions of 40 x 55 mm. The curve was created by the use of curved carriers and for added acoustics, an additional acoustic mat in PE foil was mounted behind the panels.

Project: Rehau Werk Strontium, Germany - Product: Solid Wood Linear Wall - Architect: Kaiser & Dressel

KEY FEATURES

- Interior applications
- Three wall solutions: Linear Open, Multi-panel & Linear Closed
- Panel widths from 63 mm up to 184 mm
- Mixed length with a minimum of 900 mm, manufactured inclusive tongue and groove connection. Fixed length on request
- Panel thickness from 15 up to 20 mm
- Available in different modules and joint width
- With the multi-panel system various widths can be combined to create a dynamic look and feel
- Other sizes are available upon request
- Black, grey or white non woven tissue or if necessary Ultra Fiber will be glued and stappled between the joint
- Quick and invisible mounting according to a fixed pattern due to the specially developed fixing method
- Budgetary flexibility due over 15 wood species within various price categories
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible
- Special system coatings available for humid area application
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

Project: Office de Alliantie, Amersfoort, The Netherlands - Product: Solid Wood Grill, FSC European Oak - Architect: Ookarchitecten

KEY FEATURES

- Interior applications
- Made to measure wooden ceiling solution. Design the sizes of the slats and the distance between the slats. Together this will form the Grill element
- The slat thickness can be between 15 mm and 35 mm, depending per wood specie.
- The slat height can be between 35 mm and 140 mm, depending per wood specie
- The distance between the slats can be 25 mm until 140 mm
- The length of the assembled grill elements will be determined by the structural conditions. This can vary between 590 mm and 3590 mm, depending on the available raw material
- The Grill element is available with 12 mm or 20 mm dowel. The standard colour is black, other colours are on request
- Easily and individually demountable
- Budgetary flexibility due over 15 wood species within various price categories
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible. Also radial panels and CNC milled panels on request available
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance

WOOD SPECIES AND FINISHES

An extensive range of wood species is available, ranging from deep warm colours to the light wood tones. Other types of wood possibilities can be looked at on request. Standard, the wood is finishes in a transparent varnish. Optionally a wide range of colour is available. The finish adds a nice touch to the wood with the natural tones and structures of the wood being maintained. For each application the right system coating is determined that is necessary to protect the wood.

WOOD SPECIES

Hunter Douglas offers a wide choice of wood species and finishes. As wood is a 100% natural product, the images below can differ from actual samples or products. Please request a sample at your nearest sales office.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer types shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during his lifetime, making each veneer unique.

Birch

Spruce

Unsteamed Beech

Steamed Beech

Sycamore

Cherry

Ash

Basswood

Hemlock

Maple

Gaboon

Zebrano

Bamboo Natural

Pine

Oak

Pear

Walnut

Chestnut

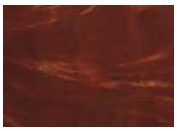
Yellow Poplar

Ayous

Red Oak

Bamboo Caramel

Teak



Sapeli Mahogany

Besides the wide range of Organic Veneers, Hunter Douglas also offers a selection of other finishes.

Engineered veneers
Engineered Veneer is a type of veneer that is known for their consistent appearance. Although Engineered Veneer is made from 100% wood, due to the special production process, a uniform look can be obtained.

High Pressure Laminate
Hunter Douglas works with some of the worlds leading HPL manufacturers. In most cases, we are able to apply HPL instead of veneer, to match other finishes in your project.

RAL Finishes
We offer the possibility to have the products finished in any RAL colour.

For more information, please contact your local sales office.

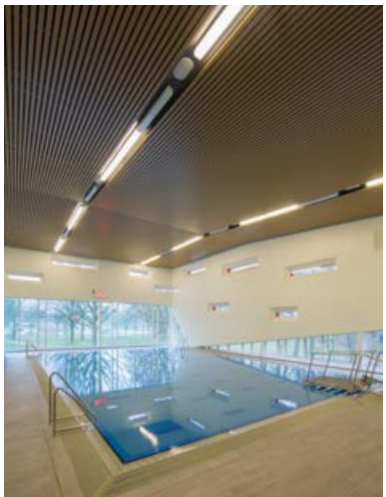
SPORTS CEILINGS

Our ceiling systems for sports halls combines quality with a specific appearance. The ceilings can withstand direct impact from balls used for indoor sports.



Project : Swimming pool, Stein, The Netherlands
Architect: O&B
Product : 70U Linear ceiling

"A SPECIAL CEILING USED IN A HUMID ENVIRONMENT AND READY FOR IMPACT"

The swimming pool in the town of Stein, the Netherlands, is located next to the Stein town hall. The complex replaces the former municipal swimming pool from the '70s of the 20th century which is demolished. The architect office O&Bs has been selected for the execution of the architectural and consultancy work for the new construction of this public swimming pool based on a European tendering procedure with 36 registrations.

The swimming pool complex consists of:

- A new indoor swimming pool, with a 25 m competition pool, an instruction pool, a toddler pool and associated spaces.
- An entrance for both the outdoor swimming pool and the Steinerbos recreation park.
- Renovation of the existing outdoor swimming pool, including the new construction of changing rooms, toilets, showers and a catering building.

The building fits in with the park-like environment, the park panorama is visible in the swimming pool. From the bath water it looks like you are swimming in the middle of nature; the changing colours of the seasons pass by the swimmers and visitors. The ceiling is made of the Hunter Douglas aluminium Linear 70U panels which can be used in a humid environment and are tested to withstand impact from ball sports.

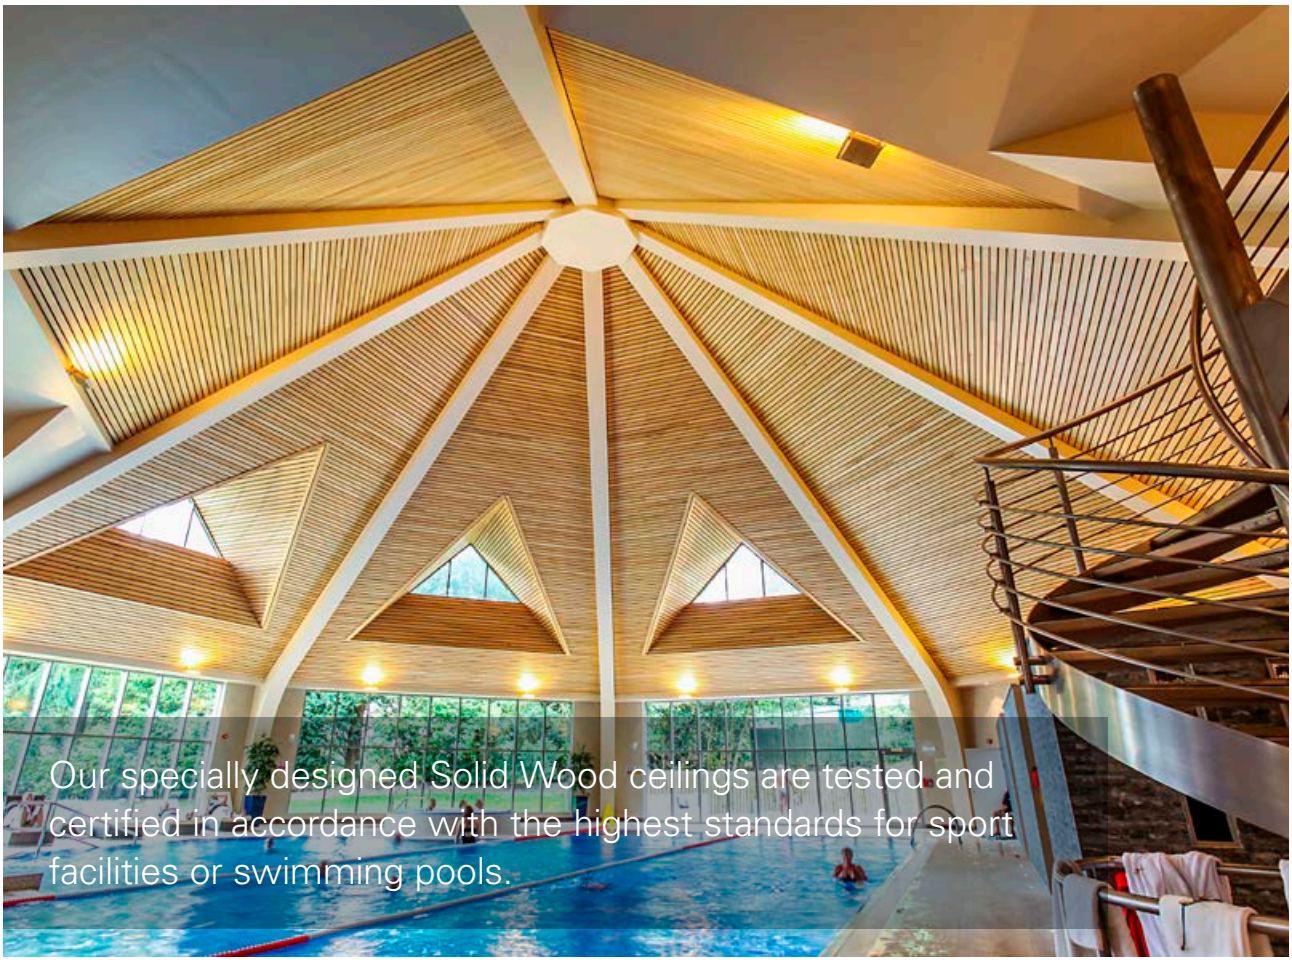
SOLID WOOD
LINEAR INDIVIDUAL



Project: Kenwick Park Hotel, Louth, Lincolnshire, United Kingdom - Product: Solid Wood Linear open ceiling - Architect: Franklin Ellis Architects

KEY FEATURES

Sport hall applications, certified according to DIN 18032 Part 3 and EN 13964 Annex D

- Three ceiling solutions: Linear Open, Multi-panel & Linear Closed, fixed or 50% demountable
- Panel widths from 63 mm up to 184 mm
- Mixed length with a minimum of 900 mm, manufactured inclusive tongue and groove connection. Fixed length on request
- Panel thickness from 15 up to 20 mm
- Available in different modules and joint width
- With the multi-panel system various widths can be combined to create a dynamic look and feel
- Other sizes are available upon request
- The standard colours of the non woven tissue between the joint is black, white or grey. Other options on request
- Quick and invisible mounting according to a fixed pattern due to the specially developed fixing method
- Budgetary flexibility due over 15 wood species within various price categories
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible
- Special system coatings available for humid area application
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

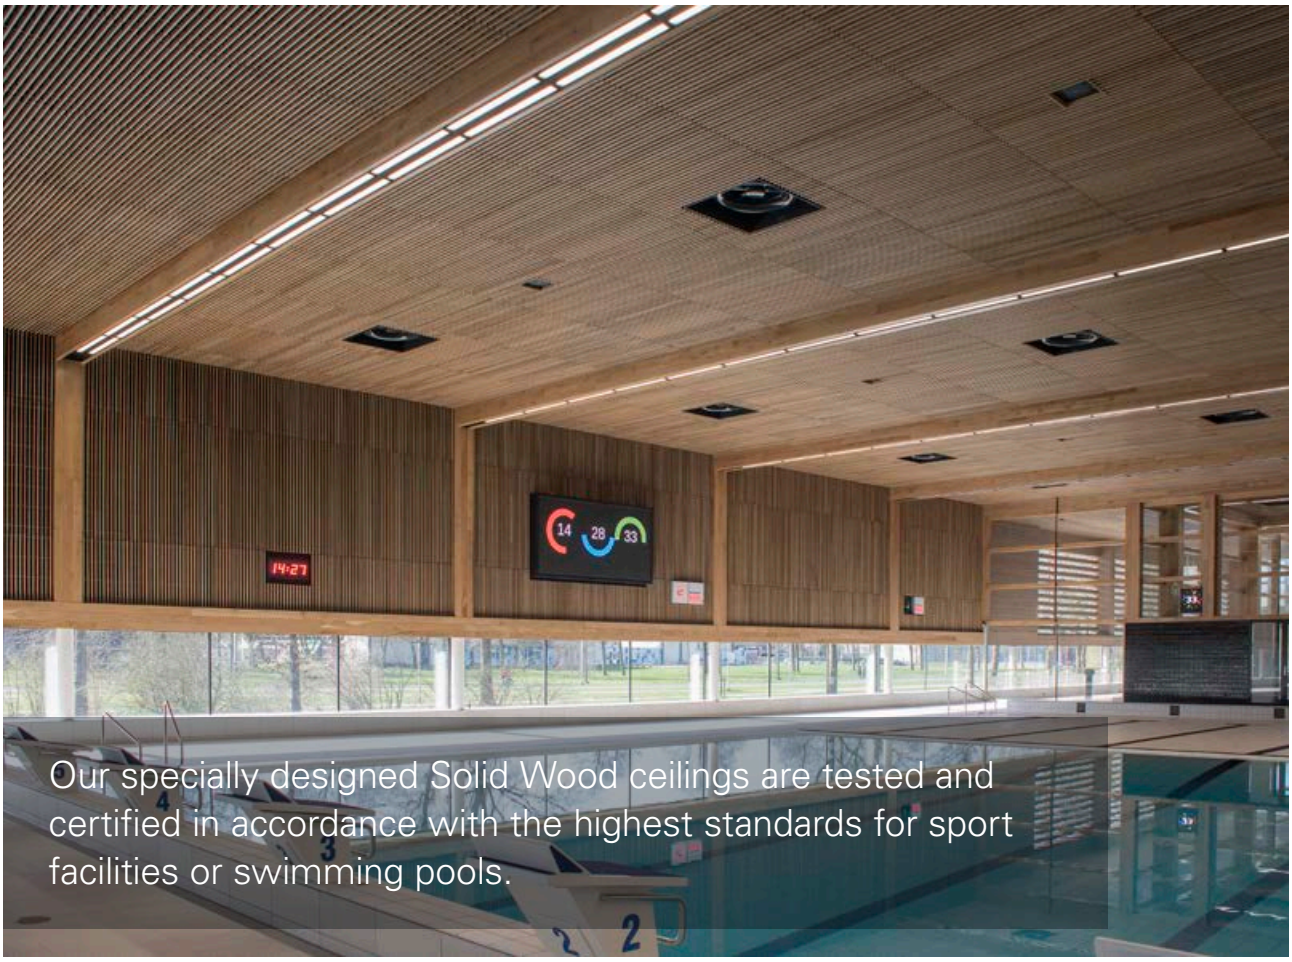
SOLID WOOD
GRILL ELEMENT



Project: Swimming pool De Steur, Kampen, The Netherlands - Product: Solid Wood Grill - Architect: VenhoevenCS Architecture + Urbanisme

KEY FEATURES

- Made to measure wooden ceiling solution. Design the sizes of the slats and the distance between the slats. Together this will form the Grill element
- The slat thickness can be between 15 mm and 35 mm, depending per wood specie.
- The slat height can be between 35 mm and 140 mm, depending per wood specie
- The distance between the slats can be 25 mm until 140 mm
- The length of the assembled grill elements will be determined by the structural conditions. This can vary between 590 mm and 3590 mm, depending on the available raw material
- The Grill element is available with 12 mm or 20 mm dowel. The standard colour is black, other colours are on request
- Easily and individually demountable
- Budgetary flexibility due over 15 wood species within various price categories
- Optionally supplied with acoustic non woven tissue cut to size of the panel
- High-quality finishing against moisture, dust and dirt. Transparent or wide range of colours available
- Curved, undulating and special shapes possible.
- Compatible with industry standard lighting, HVAC, speaker, fire safety and security services
- Certified: FSC, PEFC, Cradle to Cradle silver
- Integral guarantee for support systems, wood, finish and fire retardance
- Contribution to obtaining credits within BREEAM and LEED

WOOD SPECIES AND FINISHES

An extensive range of wood species is available, ranging from deep warm colours to the light wood tones. Other types of wood possibilities can be looked at on request. Standard, the wood is finishes in a transparent varnish. Optionally a wide range of colour is available. The finish adds a nice touch to the wood with the natural tones and structures of the wood being maintained. For each application the right system coating is determined that is necessary to protect the wood.

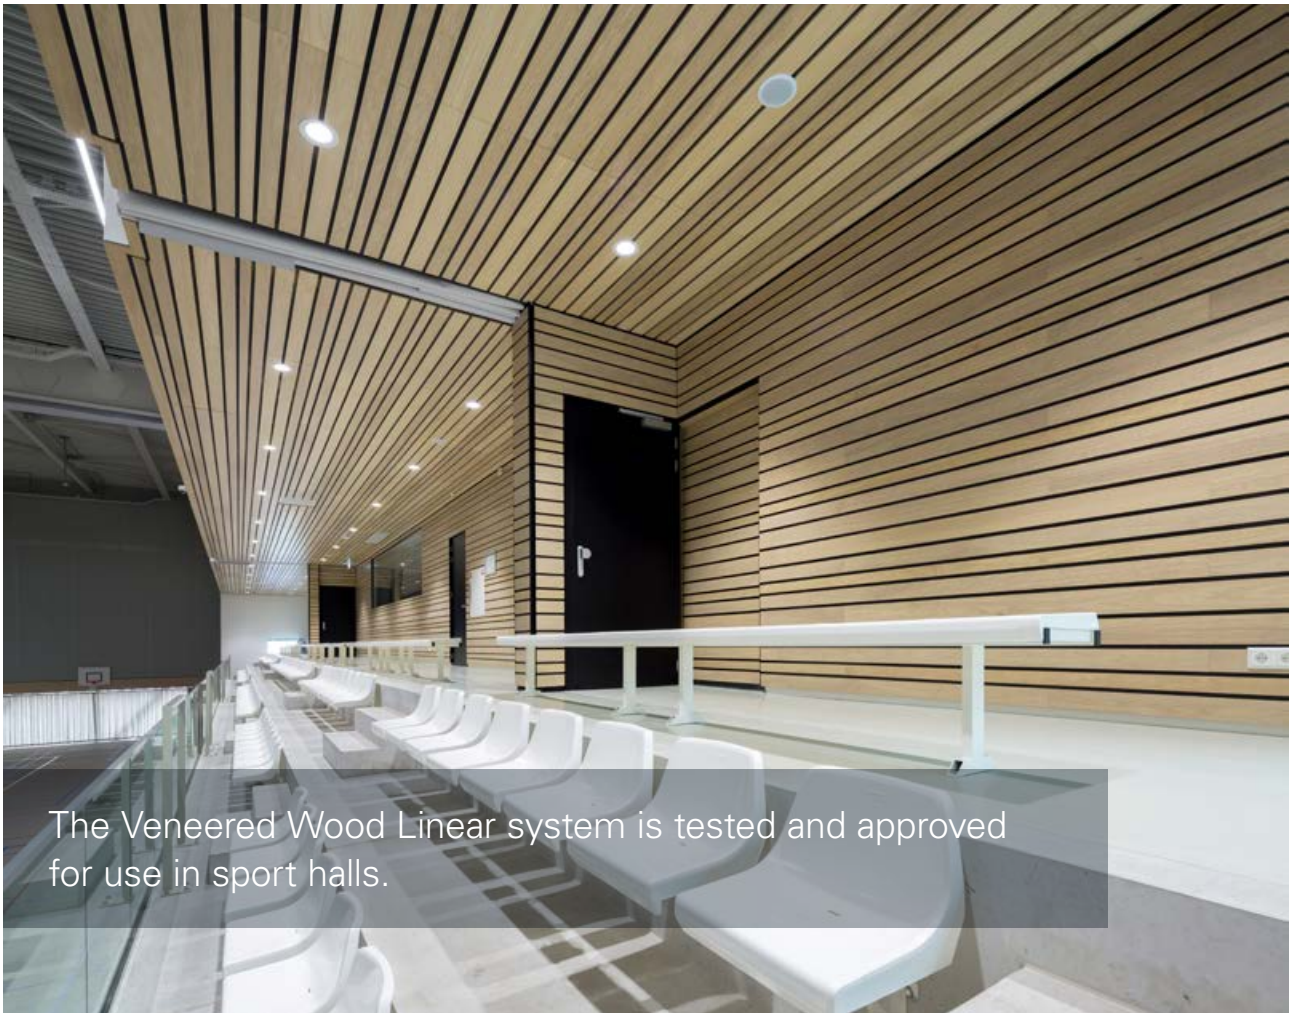
Project: Freizeitbad Calivornia, Leverkusen, Germany - Product: Solid Wood Grill - Architect: Foest Architektur



Project: Sports hall, Amersfoort, The Netherlands - Product: Veneered Wood Linear

KEY FEATURES

- Interior Sports Hall applications
- Certified for safety against ball throwing DIN 18032 Class 1A
- MDF core with a wooden top layer
- Multi-panel layouts possible, combining different widths
- Fire retardant and moisture resistant solutions
- Acoustic fleece to fill gaps
- Staining possibilities
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Installation with nonius hangers
- Panel length: 1500 / 1950 / 2400 / 2700mm / 3000 mm
- Panel width: 65 / 90 / 120 / 150 / 200 / 230 mm
- Joint width: 5 / 10 / 15 / 20 / 30 mm
- Panel thickness: 17 mm
- Other sizes and dimensions are available upon request

VENEERED WOOD
GRILL

Project: Sports center De Streepen, Sint-Oedenrode, The Netherlands - Veneered Wood Grill - Architect: Rienks Architecten

KEY FEATURES

- Interior applications
- Pre-assembled grill elements connected with metal dowel
- MDF core finished with wood veneer
- Fire retardant and moisture resistant solutions
- Add acoustical wool for increase sound absorption
- Staining possibilities
- Available as wall solution
- Variety of organic or engineered wood veneers, FSC or PEFC certified
- Easy installation and demounting in standard T 24 grid
- Element length: 1200 / 1500 / 1950 / 2400 / 2700 mm
- Element width: varies between 300 to 500 mm
- Slat width: 17 / 25 / 31 / 39 mm
- Slat height: 55 / 62 / 81 / 104 / 143 mm
- Slat gaps: varies
- Other sizes and dimensions are available upon request
- Note: Grill dimensions may be restricted due to weight or may require a reinforced substructure

WOOD SPECIES

Hunter Douglas offers a wide choice of wood species and finishes. As wood is a 100% natural product, the images below can differ from actual samples or products. Please request a sample at your nearest sales office.

ORGANIC VENEERS

Organic veneer is a natural material sliced from tree logs without alterations or enhancements. This veneer types shows all the characteristics and intrinsic patterns of the tree, caused by the natural influences during his lifetime, making each veneer unique.

Birch

Spruce

Unsteamed Beech

Steamed Beech

Sycamore

Cherry

Ash

Basswood

Hemlock

Maple

Gaboon

Zebrano

Bamboo Natural

Pine

Oak

Pear

Walnut

Chestnut

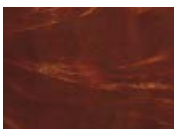
Yellow Poplar

Ayous

Red Oak

Bamboo Caramel

Teak



Sapeli Mahogany

Besides the wide range of Organic Veneers, Hunter Douglas also offers a selection of other finishes.

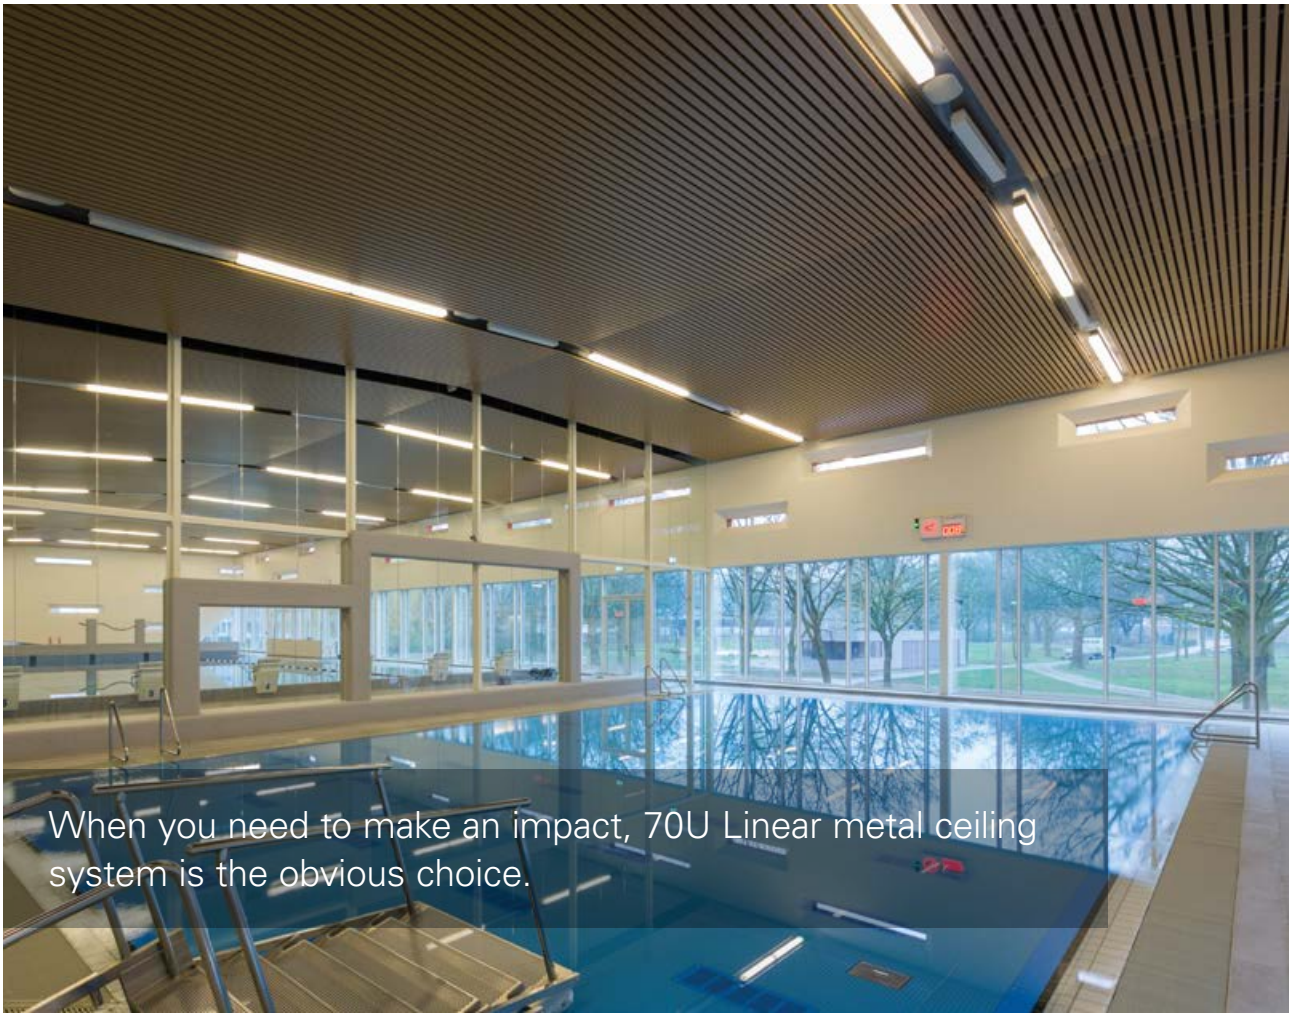
Engineered veneers
Engineered Veneer is a type of veneer that is known for their consistent appearance. Although Engineered Veneer is made from 100% wood, due to the special production process, a uniform look can be obtained.

High Pressure Laminate
Hunter Douglas works with some of the worlds leading HPL manufacturers. In most cases, we are able to apply HPL instead of veneer, to match other finishes in your project.

RAL Finishes
We offer the possibility to have the products finished in any RAL colour.

For more information, please contact your local sales office.

Project: Sports center De Streepen, Sint-Oedenrode, The Netherlands - Veneered Wood Grill - Architect: Rienks Architecten



Project: Swimming Pool Steinerbos, Stein, The Netherlands - Product: Linear 70U ceiling - Architect: Op 't Root en Beerts Architecten

KEY FEATURES

- Panel width: 70 mm, joint width 30 mm
- Panel length: 800 mm up to 6000 mm
- Panel depth 25 mm
- Square edge design
- Tested on ball impact resistance
- On site waste reduction with factory fabricated dimensional material
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

PROTECTED BY LUXACOTE®

Luxacote® is a unique treatment for Luxalon® Exterior Ceilings.

Unprecedented Protection
LUXACOTE®
for exterior application

Proprietary Hunter Douglas' Luxacote® makes exterior ceilings extremely durable, providing colour and gloss stability, high scratch resistance, and resistance to corrosion. With Luxacote®, there is no need to recoat, which reduces maintenance costs and additional environmental impact.

Luxacote® protects the aluminium surface from corrosion and permanently anchors the paint to the metal surface. It contains highly colour-stable pigments for optimal colour-fastness and a highly scratch- and wear-resistant surface.

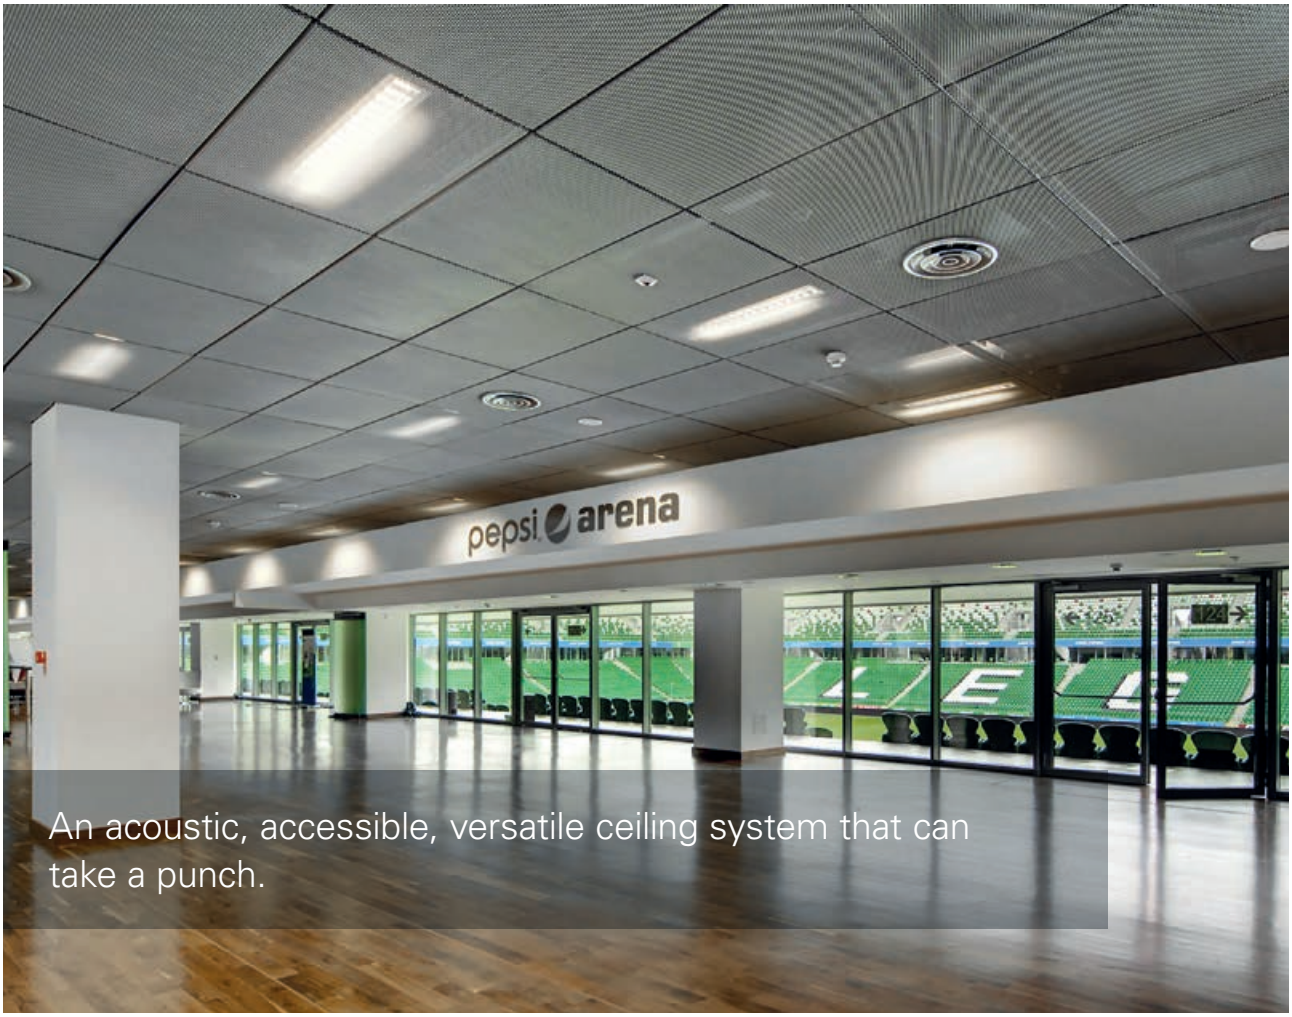
STRETCH METAL

BETA SAFETY-LOOP



An acoustic, accessible, versatile ceiling system that can take a punch.

Project: Pepsi Arena Legia Football Stadium, Warsaw, Poland - Product: Stretch Metal Beta (Safety-Loop) - Architect: JSK

KEY FEATURES

- Panel sizes 900 x 1940 mm
- Square-edge design
- Mesh panels with lay-on pads for acoustic control
- Tested on ball impact resistance
- On site waste reduction with factory fabricated dimensional material
- Downweight: reduce static load with lightweight aluminium or steel
- Easy plenum access
- Compatible with industry standard lighting, HVAC, speaker, fire safety, and security services

ACOUSTIC TEST RESULTS

SOUND ABSORPTION (α_w) SUMMARY

Ceiling panels are available in a variety of perforation patterns for optimum acoustical performance.
Sound absorption can be achieved by fitting these panels with acoustical tissue or pad.

SOUND ABSORPTION CLASSIFICATION GRAPH

α_w	Sound absorption class

SUSTAINABILITY

Hunter Douglas Ceilings utilizes metal, wood and felt materials to design, engineer and manufacture ceiling systems that optimise interior environmental quality, material resources and energy usage. Hunter Douglas incorporates sustainable materials and employs sustainable practices in its manufacturing processes. When applied as part of an overall building plan for new and renovation construction, solutions from Hunter Douglas may contribute to Green Globes and LEED BD+C and ID+C certification for schools, retail, hospitality, healthcare and commercial interiors.

DAYLIGHTING

Hunter Douglas ceilings diffuse light for visual comfort and move daylight into a space, reducing energy used by artificial lights.

ACOUSTIC COMFORT

Noise of equipment and conversation have been shown to impact worker comfort and productivity. Hunter Douglas acoustical ceilings have noise reduction coefficients α_w up to 1.00.

ENERGY PERFORMANCE

Interior spaces designed with light colours and a minimum of 70% reflectance on the ceilings and walls can reduce artificial lighting requirements significantly, reducing energy consumption.

BUILDING PRODUCT DISCLOSURE

Hunter Douglas Ceilings uses products and materials for which life-cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts.

INDOOR AIR QUALITY

Perfect for projects where air quality is a priority, nearly all Hunter Douglas products meet low emissions standards for GREENGUARD and GREENGUARD Gold certification.

RECYCLED CONTENT

Using both pre-consumer and post-consumer materials, many Hunter Douglas systems feature recycled components in steel, aluminium, and HDPE plastics.

PARTNERS & PROGRAMS

LEED

LEED is transforming the way we think about how building spaces are designed, constructed, maintained and operated. Hunter Douglas' continued research and development to create ceilings products that are more environmentally friendly contribute to the overall performance of a building, as well as to LEED certification by optimising daylighting and improving acoustical comfort and energy efficiency.

ENVIRONMENTAL PRODUCT DECLARATION (EPD)

Hunter Douglas understands the importance of transparency to sustainable design and building. From raw material extraction through final disposal or reuse, we can provide life-cycle assessments on many of our products environmental impacts.

GREENGUARD

Hunter Douglas is committed to meeting the growing demand for healthier, more sustainable products. Meeting the rigorous and comprehensive standards for low emissions of VOC's, our Greenguard Gold Certified ceilings contribute to the overall indoor air quality and general health of a building space.

FSC® CERTIFIED (FOREST STEWARDSHIP COUNCIL)

Hunter Douglas is committed to protecting our forests for future generations. Many of our wooden ceilings are FSC certified, which employ forest friendly resource management and help to reduce environmental impact by promoting responsible consumption. Hunter Douglas' FSC Chain of Custody Certificate # is NC-COC-016324.

CRADLE TO CRADLE

Hunter Douglas adopts the cradle to cradle (C2C) product philosophy to the design of products that fit the circular paradigm. Both our metal and felt ceilings are *Cradle to Cradle™* Bronze certified. They are designed for longevity, using materially healthy technical nutrients that can be reused at end of life as a high-quality source for something new.

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

OEKO-TEX® STANDARD 100

Hunter Douglas is committed to products that are safe to use and do not contain harmful chemicals or have a detrimental effect on health. Products that are cerified according the OEKO-TEX® Standard 100 contribute to high and effective product safety from a consumer's point of view.

TAIM

As member of TAIM we are obliged to audit our production plant to the requirements of the TAIM certifcation scheme. Proof of a positive conclusion is the annually issued TAIM Certificate.

HUNTER DOUGLAS

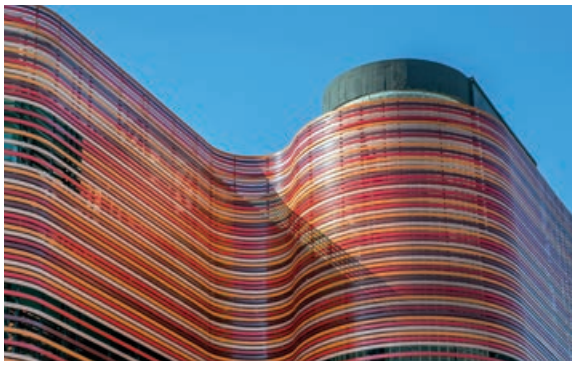
ARCHITECTURAL

For more than 60 years, we've been fortunate enough to help turn countless innovative sketches into innovative buildings. Architects, designers, investors and contractors from around the world have taken advantage of Hunter Douglas' unmatched product development, service and support. Chances are, you've seen more of Hunter Douglas than you think.

Major operation centres in Europe, North America, Latin America, Asia and Australia, we've contributed to thousands of high-profile projects, from retail and commercial facilities to major transit centres and government buildings.

▲ *SUN LOUVRE* *CEILINGS* ▼

▲ *CEILINGS* *FAÇADES* ▼



Not only are the world's architects and designers our partners, they're our inspiration. They continue to raise the bar for excellence. We create products that help bring their visions to life: Ceilings, Sun Louvres and Façades.

Designed to work for you

HISTORY HUNTER DOUGLAS

1919 - Henry Sonnenberg founds his machine tool distribution, later manufacturing, company in Düsseldorf, Germany

1933 - Henry uses 150 railroad cars to move his entire operation to Rotterdam, The Netherlands.

1942 - Henry moves to the US and founds Douglas Machinery Corporation.

1946 - Joe Hunter joins forces with Henry and develops new technology and equipment for the continuous casting and fabrication of lightweight aluminium, leading to the production of Venetian Blinds.

1960 - Hunter Douglas expands into Europe, Australia and Latin America.

1969 - Hunter Douglas stocks are first listed on the Montreal and Amsterdam Stock Exchanges.

2007 - Two new companies join the Hunter Douglas Group - 3Form and NBK Architectural Terracotta. High design, high performance sustainable building solutions, extending Hunter Douglas' commitment to architectural products that are good for people and the planet.

2014 - Hunter Douglas launches BXD 3-dimensional linear ceiling.

2015 - XL*nt*, a super flat swing down acoustic ceiling is launched.

2016 - Hunter Douglas launches HeartFelt®, the first modular Felt Ceiling system ever.

2020 - Hunter Douglas launches HeartFelt® Baffle ceilings, combining our innovative soft ceiling material with a bold product design.

ARCHITECTURAL SERVICES

We support our business partners with a wide range of technical consulting and support services for architects, developers and installers. We assist architects and developers with recommendations regarding materials, shapes and dimensions, colours and finishes.

We also help with the creation of design proposals, visualisations, and installation drawings. Our services to installers range from providing detailed installation drawings and instructions to training installers and advising on the building site.

Printed on EU Ecolabel certified paper

keen on green

Hunter Douglas products and solutions are designed to improve indoor environmental quality and conserve energy, supporting built environments that are comfortable, healthy, productive, and sustainable.

alu

Our paint and aluminium melting processes are considered to be one of the industry standards in terms of clean production processes. All aluminium products are 100% recyclable at the end of their lifecycle.
